

**VETERINARY HEALTH CERTIFICATE
FOR EXPORT OF BOVINE SEMEN TO INDIA**

Exporting country: CANADA

Competent Authority: CANADIAN FOOD INSPECTION AGENCY
GOVERNMENT OF CANADA

Area and District: _____

SECTION I. ORIGIN OF THE SEMEN

Name of exporter (centre or exporting owner): _____

Postal address: _____

Identification of semen container: _____

Official seal: _____

SECTION II. DESTINATION OF THE SEMEN

Name of consignee: _____

Postal address: _____

Nature and identification of means of transport: _____

SECTION III. SANITARY INFORMATION

I, the undersigned Official Veterinarian, duly authorized by the Government of Canada, do hereby certify that:

1. The donor animal:

- 1.1 showed no sign of disease on the day of collection;
- 1.2 was born and has continuously resided in Canada;
- 1.3 has been inspected and has been found to have no signs of any of diseases mentioned in section 4.1 within 30 days before and after semen collection;
- 1.4 according to records, is free of any known genetic disorders;
- 1.5 has been kept at the semen production centre for at least one year and has not been used for natural mating.

2. Country freedom

- 2.1 Canada is free from foot and mouth disease (type C, SAT 1,2,3), vesicular stomatitis, rinderpest, contagious bovine pleuropneumonia, lumpy skin disease and Rift Valley fever.

3. Semen production centre

- 3.1 The semen production centre is approved by the Canadian Food Inspection Agency (CFIA).

4. Semen production centre status

- 4.1 The donor bull was kept in a herd where brucellosis, tuberculosis, malignant catarrhal fever, campylobacteriosis, Johne's disease, bluetongue, enzootic bovine leucosis, bovine viral diarrhea, infectious bovine rhinotracheitis, vibriosis, trichomoniasis, foot and mouth disease (types O, A and Asia-1) and leptospirosis have not been known to occur in the preceding two years.

5. Tests

- 5.1 The donor bull has been tested against the diseases listed below with negative results in CFIA laboratories:
 - 5.1.1 Tuberculosis: intradermal tuberculin test;
 - 5.1.2 Brucellosis: seroagglutination or CF or ELISA test;
 - 5.1.3 Bluetongue: agar gel immunodiffusion or ELISA test;
 - 5.1.4 Trichomonosis: microscopic examination and culture of preputal washings;
 - 5.1.5 Johne's disease: CF or ELISA test

- 5.1.6 Bovine genital campylobacteriosis: culture of preputial washings;
- 5.1.7 Infectious bovine rhinotracheitis: * **Delete as appropriate**
 - 5.1.7.1 * **either** the donor bull is negative to a SN or ELISA test,
 - 5.1.7.2 * **or** the semen was tested negative for the presence of the virus;
- 5.1.8 Enzootic bovine leucosis: agar gel immunodiffusion or ELISA test;
- 5.1.9 Bovine viral diarrhea: virus isolation test using immunoperoxidase.

6. Semen collection and storage

- 6.1 The semen has been collected, processed, packaged and stored in accordance with the provisions of the Terrestrial Animal Health Code of OIE, section "Collection and processing of semen".
- 6.2 Antibiotics added to the diluent were (name and concentration): _____

- 6.3 The semen is transported under sanitary conditions.
- 6.4 Prior to export, the transportation container was sealed under veterinary supervision using an official seal as mentioned in Section I.
