

**VETERINARY HEALTH CERTIFICATE
EXPORT BOVINE SEMEN TO TRINIDAD AND TOBAGO**

CONSIGNOR: _____

ADDRESS: _____

CONSIGNEE: _____

ADDRESS: _____

I hereby certify that:

- 1) Canada is free from foot and mouth disease.
- 2) The bull from which the semen was obtained was born and raised in Canada/USA and originated from a herd into which no introductions have been made from a foot and mouth disease, rinderpest and lumpy skin disease infected area.
- 3) The bull from which the semen was obtained had been examined and found free of clinical signs of communicable diseases including tuberculosis, brucellosis, trichomoniasis, campylobacteriosis, IBR, IPV, BVD, Johne's disease, leptospirosis, and BSE, and if the bull is kept in a herd such a herd is also free from the diseases mentioned above.
- 4) The bull from which the semen was obtained was tested using the agar gel immunodiffusion test or ELISA within the past twelve (12) months and found to be free from enzootic bovine leucosis.
- 5) The bull from which the semen was obtained has reacted negatively to the intradermal tuberculin test for tuberculosis and to serological tests for leptospirosis and brucellosis within the previous twelve (12) months.
- 6) The artificial insemination centre where the bull is located is officially free of bovine tuberculosis.
- 7) The bull is an official resident of the artificial insemination centre and showed no clinical signs of leptospirosis on the day of collection.
- 8) Based on testing in accordance with Canada's program for artificial insemination centres, the bulls and the centre from which the semen originated are free of campylobacteriosis and trichomoniasis.
- 9)
 - i) That the bull(s) showed no clinical signs of bluetongue on the day of collection and for the following forty (40) days; or
 - ii) all of the bulls in the artificial insemination centre are free of bluetongue based on Canada's Artificial Insemination program which requires bi-annual testing for the disease.
