

**VETERINARY HEALTH CERTIFICATE
EXPORT BOVINE SEMEN TO TAIWAN**

SECTION I

- i) **Country of origin:** **CANADA**
- ii) **Issuing Authority:** **Canadian Food Inspection Agency
Government of Canada**
- iii) **Region:** _____
- iv) **Name of Consignor:** _____
Address: _____

- v) **Name of Consignee:** _____
Address: _____

SECTION II

- i) **Name of A.I. Centre (where semen collected):** _____

- Address:** _____

SECTION III

I, the undersigned full-time salaried Veterinarian of the Government of Canada, hereby certify that:

1. Rinderpest, foot and mouth disease, contagious bovine pleuropneumonia, vesicular stomatitis and African swine fever do not occur in Canada and have not been reported by the O.I.E. for more than five (5) years.
2. The semen originated from the artificial insemination centre (name) _____
(address) _____ that is supervised by Canadian government veterinarians.
3. The donor bull originates from an artificial insemination centre where:
 - a) Brucellosis, tuberculosis, malignant catarrhal fever, Johne's disease, bluetongue and pseudorabies have not occurred during the preceding year;
 - b) Enzootic bovine leucosis, bovine virus diarrhea, infectious bovine rhinotracheitis, infectious pustular vulvovaginitis, bovine genital campylobacteriosis, trichomoniasis and leptospirosis have not occurred during the preceding six (6) months.
 - c) The cattle have been inspected within thirty (30) days prior to semen collection and have shown no signs of these communicable diseases.
4. Vesicular stomatitis and ephemeral fever has not occurred in Canada during the preceding five (5) years.
5. The donor bull has been resident at the artificial insemination centre for at least one (1) year and has not been used for natural mating.

6. The donor bull has been subjected to the following tests on dates shown and obtained indicated result:

	Sampling date	Test date	Result
a) Tuberculosis - intradermal tuberculin test	_____	_____	_____
b) Brucellosis - serum tube agglutination - titre less than 50 I.U.	_____	_____	_____
c) Paratuberculosis (Johne's disease) - Complement fixation or ELISA	_____	_____	_____
d) Enzootic Bovine Leucosis - agar gel immunodiffusion or ELISA	_____	_____	_____
e) Bluetongue - C-ELISA or agar gel immunodiffusion	_____	_____	_____
f) Bovine genital campylobacteriosis - culture of preputial washings	_____	_____	_____
g) Trichomoniasis - direct microscopic examination and culture examination of preputial washings	_____	_____	_____

7. The bulls at the A.I. centre have not been vaccinated with any vaccine against rinderpest, foot and mouth disease and contagious bovine pleuropneumonia and any other vaccines that have not been approved.
8. The semen has been collected and handled in accordance with Appendix 3.2 of the O.I.E. International Health Code and transported under sanitary conditions free from contamination by infectious agents.
