

**VETERINARY HEALTH CERTIFICATE
EXPORT PORCINE SEMEN TO BARBADOS**

SECTION I

Consignor: _____

Consignee: _____

Address: _____

Address: _____

Name of Semen Production Centre where semen collected: _____

Address: _____

Registration Number: _____

Import Permit Number: _____

SECTION II - Health Information

I, the undersigned Official Veterinary Officer of the Government of Canada, certify that to the best of my knowledge and belief:

1. The semen was collected from a boar which has been resident for at least six (6) months in an artificial insemination centre which is under official veterinary control and during this time has not been used for natural service.
2. The donor boar was inspected within the seven (7) days preceding collection and found to be healthy and free of evidence of infectious disease including atrophic rhinitis and showed no signs of any defect known to be transmitted genetically.
3. All animals maintained at the artificial insemination centre are isolated from contact with other livestock and are required to pass tests internationally recognized for tuberculosis, brucellosis, leptospirosis, transmissible gastroenteritis, and Aujeszky's disease at six month intervals.

The last regime of such tests was performed on: _____

4. The donor boar described above showed negative results at the time of the last tests performed for the following:
 - a) Tuberculosis - intradermal tuberculin test, using OIE standard mammalian PPD tuberculin
 - b) Brucellosis - complement fixation test (<20 ICFTU)
 - c) Leptospirosis - microagglutination lysis test at 1:400 for serotypes *L. pomona*, *L. canicola*, *L. icterahemorrhagiae*, *L. grippityphosa* and *L. hardjo*
 - d) Transmissible gastroenteritis - ELISA test
 - e) Aujeszky's disease - ELISA test
 - f) PRRS - ELISA test
5. During the six (6) month period prior to the collection of the semen destined to Barbados, there has been no clinical or serological evidence of transmissible gastroenteritis or swine influenza recorded in any swine resident at the semen production centre.
6. No case of foot and mouth disease, Teschen disease, classical swine fever, African swine fever swine vesicular disease or vesicular stomatitis has occurred in Canada in the twelve (12) months preceding semen collection.
7. The artificial insemination centre meets the recommendations of the World Organization for Animal Health (OIE), Terrestrial Animal Health Code, Appendix 3.2.2 for the collection and processing of porcine semen.

SECTION II - Donor Identification:

DONOR BIRTH DATE/IDENTIFICATION	REGISTRATION NUMBER/ NAME	BREED	DATE OF COLLECTION	NUMBER OF STRAWS	VOLUME OF STRAWS	IDENTIFICATION CODE ON STRAWS

Total Number of straws in consignment: _____

Method and degree of dilution (including preservatives and antibiotics added): _____

_____ Date

_____ Official Export Stamp
