I, the undersigned Veterinarian, duly authorized by the Government of Canada, hereby certify with respect to the swine described below that:

1. The animals have been examined and found to be free of any clinical evidence of communicable disease.
2. The animals originate from Canada, a country which is free from foot and mouth disease, vesicular stomatitis and swine vesicular disease for the past two (2) years; from African swine fever, rinderpest and peste des petits ruminants for the past three (3) years; and vaccination against these diseases has not been carried out in Canada.
3. There has been no occurrence in Canada of hog cholera, Teschen disease or Aujeszky's disease within the past two (2) years and the premises of origin of the swine for export have been free from clinical, serological and pathological evidence of those diseases for the past two (2) years.
4. The swine originated from premises on which there has been no clinical, serological, or pathological evidence of:
  - a) swine brucellosis for five (5) years,
  - b) bovine tuberculosis for two (2) years,
  - c) rabies or porcine transmissible gastroenteritis (TGE) for one (1) year, and
  - d) anthrax, leptospirosis, or swine atrophic rhinitis for six (6) months prior to export.
5. The swine originated from premises that are serologically free from PRRS antibodies based upon data provided by the Provincial Swine Improvement Programs or their equivalent recognized by CFIA and all official tests conducted by CFIA were negative.
6. The swine have not been vaccinated against Aujeszky's disease.
7. More than sixty (60) days and less than ninety (90) days prior to export, the exported animals have been subjected to an intradermal tuberculin test with negative results.

Date of Test: \_\_\_\_\_

8. The animals have been maintained in a pre-embarkation quarantine facility approved and supervised by the Canadian Food Inspection Agency for thirty (30) days prior to shipment.
9. During the quarantine period, the animals were inspected and found to be sound, healthy and free of any clinical evidence of communicable disease including hog cholera, Teschen disease, Aujeszky's disease, anthrax, rabies, swine atrophic rhinitis, swine erysipelas, trichinosis or other swine diseases subject to federal control, and the swine have been subjected to tests at an officially accredited laboratory with negative results for:

\*a) brucellosis (B. suis) - tube agglutination test negative at 1/50; or CF test or ELISA test.

Date of Test: \_\_\_\_\_ Result: \_\_\_\_\_

Name of Official Laboratory: \_\_\_\_\_

- \*(b) leptospirosis (*L. pomona*, *sejroe*, *hardjo*, *tarassovi*, *grippotyphosa*) - microagglutination test; or, for swine clinically negative for leptospirosis, the animals were injected on two (2) occasions at an interval of fourteen (14) days with long acting tetracycline at a dosage of 20mg/kg of body weight. The second injection to be within three (3) days of export.

Date of Test: \_\_\_\_\_ Result: \_\_\_\_\_

Name of Official Laboratory: \_\_\_\_\_

**OR**

Date of First Injection: \_\_\_\_\_

Date of Second Injection: \_\_\_\_\_

- \*c) transmissible gastroenteritis - virus neutralization test OR ELISA, with negative results, OR a certificate of vaccination of the parent sow;

Date of Test: \_\_\_\_\_ Result: \_\_\_\_\_

Name of Official Laboratory: \_\_\_\_\_

**\*Delete the option not used.**

- d) PRRS - indirect immunofluorescence or ELISA

Date of Test: \_\_\_\_\_ Result: \_\_\_\_\_

Name of Official Laboratory: \_\_\_\_\_

10. The animals were treated with ivermectin within seven (7) days of shipment at the dosage recommended by the manufacturers, on:

Date: \_\_\_\_\_

by (route of administration) \_\_\_\_\_

11. \*The animals have been vaccinated or treated with the following:

Name of Product: \_\_\_\_\_ Dosage: \_\_\_\_\_

Manufacturer: \_\_\_\_\_ Date: \_\_\_\_\_

**\*Delete if not applicable.**

12. Name of Farm of Origin: \_\_\_\_\_

Location: \_\_\_\_\_

Period of Quarantine from \_\_\_\_\_ to \_\_\_\_\_

Name and location of quarantine premises: \_\_\_\_\_

13. During transportation from the premises of origin to Korea, the animals for export have had no contact with other animals or materials that were not quarantined simultaneously, and all the crates, pens, equipment, vehicles, and the vessel or aircraft used to transport these animals were thoroughly cleaned and disinfected with disinfectants approved by the Canadian Food Inspection Agency (CFIA).

14. All fodder, litter, and other material supplied during the period of embarkation quarantine and during transportation for the animals to be exported was sanitary and was provided from the same lot of origin as the animals to be exported.
