**VETERINARY HEALTH CERTIFICATE
EXPORT SWINE TO TAIWAN (REPUBLIC OF CHINA)**

Exporter: _____

Importer: _____

Address: _____

Address: _____

I, the undersigned Veterinarian, duly authorized by the Government of Canada, do certify, that:

1. Canada has been free of foot-and-mouth disease, swine vesicular disease, vesicular exanthema, vesicular stomatitis, African swine fever, hog cholera, pseudorabies, Teschen's disease (enterovirus encephalomyelitis) and rinderpest for at least the preceding five (5) years.
2. To the best of my knowledge and belief, the animals described in this certificate originate from farms where brucellosis, tuberculosis, porcine reproductive and respiratory syndrome (PRRS), and swine hemorrhagic septicemia (pasteurellosis) has not been reported during the preceding year and atrophic rhinitis, actinobacillus pleuropneumonia, transmissible gastroenteritis, leptospirosis, toxoplasmosis, swine influenza, and swine erysipelas has not been reported during the preceding six (6) months.
3. The swine were inspected on the farm of origin, during the quarantine period, and prior to departure and found free of evidence of infectious disease.
4. The swine were not vaccinated against foot and mouth disease, African swine fever or any other vaccine that has not been approved by the Bureau of Animal and Plant Health Inspection and Quarantine.
5. For at least fourteen (14) days prior to shipment, the swine were held in a quarantine approved and supervised by the Canadian Food Inspection Agency (CFIA) and during that time were subjected to tests for the following diseases with negative results:

Dates of quarantine period: from _____ to _____

	Injection date	Reading date	Result
i) tuberculosis - intradermal tuberculin test :	_____	_____	_____
	Sampling date	Test date	Result
ii) brucellosis - tube agglutination test with titer under 50 i.u.:	_____	_____	_____
iii) transmissible gastroenteritis - serum neutralization test :	_____	_____	_____
iv) toxoplasmosis - haemagglutination or latex agglutination test :	_____	_____	_____
v) PRRS - indirect immunofluorescence antibody test :	_____	_____	_____

6. The swine were transported in clean and disinfected containers and vehicles.
7. The swine are not be trans-shipped through a country or district where foot-and-mouth disease, rinderpest or African swine fever is known to occur.
8. The exporter/freight forwarder and airlines were advised that no additional feed, fodder or bedding be supplied or other animals be loaded with the transportation.
