**Female Young Offenders in Canada:
Revised Edition**

**FEMALE YOUNG OFFENDERS
IN CANADA:
REVISED EDITION**

by:

Colleen Anne Dell & Roger Boe

Research Branch
Correctional Service Canada

December, 1998

SUMMARY

NOTE

- The data used to compile this report does not measure the actual number of female youth charged with a crime, processed through the youth court system or remanded into custody, but rather, the unit of analysis is cases (Youth Court Survey), incidents (Uniform Crime Report Survey) or counts (Corrections Key Indicator Report). An explanation and definition of the data sources are presented in Appendix A to Appendix F respectively. For further clarification, please refer to the original source.
- The Youth Court Survey and Corrections Key Indicator Report data are presented for fiscal years. The Uniform Crime Report Survey data are presented for calendar years. Caution must therefore be made in comparison of the data sources. As well, the Postcensal and updated Postcensal population estimates (Statistics Canada) are for July 1 of the indicated years.
- The data sources and population estimates used in this report may not be the most recent revision of the data. The Canadian Centre for Justice Statistics revises data the year following the original release. The changes, however, are small and do not effect the findings of this report. For example, property crime rate comparisons are as follows: 1992 (17,051 / 17,038), 1993 (15,749 / 15,759), 1994 (14,261 / 14,251), 1995 (15,193 / 15,149).

RESEARCH QUESTIONS

QUESTION 1:

HAS THERE BEEN AN INCREASE IN FEMALE YOUTH CHARGED BY THE POLICE?

QUESTION 2:

HAS THERE BEEN AN INCREASE IN FEMALE YOUTH PROCESSED THROUGH THE YOUTH COURT SYSTEM?

QUESTION 3:

ARE FEMALE YOUTH GETTING INVOLVED WITH CRIME AT A YOUNGER AGE?

QUESTION 4:

ARE FEMALE YOUTH GETTING MORE VIOLENT?

QUESTION 5:

HAS THERE BEEN AN INCREASE IN THE FREQUENCY OF FEMALE YOUTH REMANDED INTO CUSTODY PENDING DISPOSITION OF A CHARGE?

QUESTION 6:

ARE FEMALE YOUTH GETTING MORE SERIOUS DISPOSITIONS?

QUESTION 7:

HAS THERE BEEN AN INCREASE IN THE NUMBER OF FEMALE YOUTH TRANSFERRED TO ADULT COURT?

* Refer to Appendix A for definitions of data sources

** Refer to Appendix B for format of data presentation

QUESTION 1:

HAS THERE BEEN AN INCREASE IN FEMALE YOUTH CHARGED BY THE POLICE, 1992 - 1997?

Canada

- Examining the 6-year period, there was a very slight decrease. Note, there was a drop in 1994 followed by an increase in 1995 to a rate similar to 1993. This is true both for female youth charged by police and the rate of female youth charged by police per 10,000 female youth population.
- By offence, one trend was a decrease in property crimes from 1992 to 1994, followed by a slight increase in 1995 and then a decrease to 1997 to substantially below the 1992 level.
- Both violent and other crimes increased from 1992 to 1997, noting a slight decrease in 1994.
- Drug offences increased slightly from 1992 to 1997, noting a slight decrease in 1995.

Regions

- A general fluctuation occurred in 1994 where there was a decrease in all regions, except the Atlantic, which increased.
- Overall, the rate remained quite steady for the Prairie region.
- From 1992 to 1997, there was a trend decrease in the Ontario region.
- In the Atlantic region there was a trend increase from 1992 to 1997.
- In the Pacific region there was a trend decrease from 1992 to 1997.
- The Quebec region decreased slightly over the 6-year period.
- The Prairie region had the highest rate per 10,000 female youth population, followed by the Pacific, Ontario, Atlantic and Quebec regions.

Female Youth Charged by Police Per 10,000 Female Youth Population, Regions

QUESTION 2:

HAS THERE BEEN AN INCREASE IN FEMALE YOUTH PROCESSED THROUGH THE YOUTH COURT SYSTEM, 1991/92 - 1996/97?

Canada

- Per 10,000 female youth population, there has been yearly fluctuation, with a slight overall decrease from 1991/92 to 1996/97.
- By offence, there was a significant trend decrease in property crimes from 1991/92 to 1996/97. There was an anomalous drop in 1994/95.
- There was a noteworthy increase in violent and YOA offences, a slight increase in drug offences and relative stability in other crimes from 1991/92 to 1996/97.

Regions

- The rate remained quite stable for most regions with the exception of the Atlantic, which experienced a trend increase from 1992/93 to 1996/97. Minor trends in the other regions are a slight increase in the Quebec and a slight decrease in the Ontario, Prairie and Pacific regions over the 5-year period.
- The Prairie region had the highest rate per 10,000 female youth population, followed by the Ontario, Pacific, Atlantic and Quebec regions.

Per 10,000 Female Youth Population, Regions**

QUESTION 3:

ARE FEMALE YOUTH GETTING INVOLVED WITH CRIME AT A YOUNGER AGE?

Canada

- Overall, it appears females are not getting involved with crime at a younger age. This is true both for female youth charged by police and the rate of female youth charged by police per 10,000 female youth population.
- A mean age of 15 remained stable from 1991/92 to 1996/97.

Regions

- Examining total rates of female youth processed through youth court, by principle charge and age, the following is characteristic of each region:
 - Atlantic Region:** In 1994/95 and 1996/97, the greatest number of female youth processed through youth court were 15 years of age. In 1995/96 the greatest number were 16 years of age. 1991/92, 1992/93 and 1993/94 revealed a different general trend: overall, the higher the age the greater the number of females processed through youth court.
 - Quebec Region:** From 1991/92 to 1995/96 there was a steady trend with the higher the age the greater the number of female youth processed through the youth court system. In 1996/97, however, the greatest number of female youth processed through court were 15 years of age. Noteworthy as well is the marked increase in 1992/93 of 17 year olds processed through youth court.
 - Ontario Region:** For all years the greatest number of females processed through youth court were 15 years of age.

Prairie Region: In 1991/92, 1992/93, 1994/95 and 1996/97 the greatest number of females processed through youth court were 15 years of age. In 1993/94, however, the greatest number of females processed were 16 years of age. Noteworthy as well is the higher number of 15-year-olds processed through youth court in 1995/96 in comparison to the other years.

Pacific Region: For all years, except 1992/93, the greatest number of females processed through youth court were 15 years of age. In 1992/93, the greatest number were 14 years of age followed closely by 15-year-olds. Additionally, in 1994/95 there was a marked decrease in the number of 16 and 17-year-old females processed through youth court in comparison to the other years. And in 1996/97, there were a notably higher number of 14 to 17-year-old females processed through youth court in comparison to the other years.

* See Appendix C for additional research findings

* - Youth Court Survey
 ** By Principle Charge: The principle charge is the most serious charge for a person or case upon entering the youth court process. Where a young person or a case has only one charge, it is defined as the principle charge. Where more than one charge is linked to a person or a case, three criteria are used to select the principle charge: (1) the nature of the offence, (2) the decision of the court, and (3) the disposition of the charge. Violent charges are given first priority in the selection process, followed by drug and narcotic offences, property offences, other Criminal Code offences, offences under the Young Offenders Act, and other federal statute offences.
 *** Age at the time the most significant charge was committed
 **** Other = Other Crime
 ***** Drugs = Narcotics Control Act & Food and Drugs Act
 **** Rate per 10,000 total female youth (aged 12 - 17 years) population
 ***** - is nil or zero

QUESTION 4:

ARE FEMALE YOUTH GETTING MORE VIOLENT?

Canada

Uniform Crime Report:

- Overall, there was a trend increase from 1992 to 1997.
- There was a slight increase in the rate of homicide from 1992 to 1997.
- There was a relatively steady rate of abduction from 1992 to 1995, followed by the highest rate in 1996 and the lowest in 1997.
- There was a slight decrease in the rate of non-sexual assault from 1993 to 1994, followed by an increase to 1997.
- There was a decrease in the rate of attempted murder from 1992 to 1996, followed by an increase in 1997 to a rate similar to 1992.
- There was a decrease in the rate of sexual assault and other sexual offences from 1993 to 1996, followed by an increase in 1997 to a rate similar to 1992.
- Overall, there was a significant increase in robbery from 1992 to 1997.
- The highest rate of charges for a violent offence occurred in the order of non-sexual assault, robbery, sexual assault and other sexual offences, attempted murder, homicide and abduction.

Youth Court Survey:

- There was a steady increase in the number of female youth processed through the youth court system for a violent offence per 10,000 female youth population from 1991/92 to 1993/94, followed by a slight decrease in 1994/95 and an increase to 1996/97 similar to the 1993/94 level.
- There was relative stability in the six year period for the rate of homicide, attempted murder, abduction and sexual assault and other sexual offences. From 1991/92 to 1992/93, robbery slightly decreased followed by a notable increase to 1996/97. Overall, non-sexual assault slightly increased from 1991/92 to 1996/97, with an anomalous increase in 1993/94. Weapons offences increased slightly from 1991/92 to 1996/97.

Regions

Uniform Crime Report

- Overall, the Quebec region increased slightly from 1992 to 1997. The Atlantic, Ontario and Prairie regions all increased over the 6-year period. The Pacific region increased from 1992 to 1996 and decreased in 1997. As well, there was a notable increase in 1993 for all regions except Quebec, which remained stable.
- The Prairie region had the highest rate per 10,000 female youth population, followed by the Pacific, Ontario, Atlantic and Quebec regions.

* See Appendix D for additional research findings

QUESTION 5:

HAS THERE BEEN AN INCREASE IN THE FREQUENCY OF FEMALE YOUTH REMANDED INTO CUSTODY PENDING DISPOSITION OF A CHARGE*?

*** Due to data only from British Columbia and Manitoba, conclusions are tentative:**

Manitoba: There was a decrease from 1992/93 to 1994/95 followed by a marked increase to 1996/97.

British Columbia: There has been a steady increase from 1992/93 to 1996/97.

Table 5.1: Female Youth Remanded into Custody* Per Month, Select Provinces*****

* 1992 figures are rounded

Chart 5.1A: Female Youth Remanded Into Custody Per Month, Per 10,000 Female Youth Population, Select Provinces

QUESTION 6:

ARE FEMALE YOUTH GETTING MORE SERIOUS DISPOSITIONS*?

Canada

- For the most serious disposition, secure custody, there was an increase from 1991/92 to 1996/97. The second most serious disposition, open custody, (and so forth) also increased from 1991/92 to 1996/97. Overall, probation increased from 1991/92 to 1996/97. Fine and Community Service Order decreased from 1991/92 to 1996/97. Absolute discharge decreased steadily from 1991/92 to 1996/97.

Regions

- Examining the percentage of female youth dispositions per total female youth dispositions, the following is characteristic of each region:

- Atlantic Region:** Stability from 1991/92 to 1996/97 in fine and community service order, but with fluctuation over the 6 year span. Following a slight decrease from 1991/92 to 1993/94, there was a slight increase in open custody to 1996/97. As well, there was an increase in secure custody, an overall slight decrease in absolute discharge and following an increase from 1991/92 to 1993/94, there was a decrease in probation.
- Quebec Region:** Overall, increase in probation between 1991/92 and 1996/97. Inconsistent fluctuation in open custody. Stability in fine and community service order and secure custody, noting a drop in 1993/94 for the latter. Decrease in absolute discharge.
- Ontario Region:** Dramatic increase in probation and dramatic decrease in fine and community service order starting in 1993/94. Slight increase in open custody and steady increase in secure custody. Steady decrease in absolute discharge.
- Prairie Region:** Increase in probation, open custody and secure custody. Overall decrease in fine and community service order and absolute discharge from 1991/92 to 1996/97.

Pacific Region: Relative stability in probation and fine and community service order (except in 1993/94 for the latter where there was anomalous increase). Increase in open custody and secure custody. Decrease over the 6-year period for absolute discharge.

Order of the greatest frequency of dispositions per region:

Atlantic Region: Probation, Open Custody, Fine & CSO, Secure Custody, Absolute Discharge.

Quebec Region: Probation, Fine & CSO, Secure Custody, Open Custody, Absolute Discharge.

Ontario Region: Probation, Open Custody, Fine & CSO, Secure Custody, Absolute Discharge.

Prairie Region: Probation, Fine & CSO, Open Custody, Secure Custody, Absolute Discharge.

Pacific Region: Probation, Open Custody, Fine & CSO, Secure Custody, Absolute Discharge.

Table 6.1: Female Youth Disposition*, Canada

* Source: Youth Court Survey

** Disposition is the most serious disposition for a person or a case. The seriousness of the disposition is determined by the effect it has on the young person. The dispositions above are ordered from most to least serious. If the disposition with the highest priority is a fine, compensation on pay purchases, and there is a combination of these, the disposition with the largest dollar value is selected as the most significant. In the event that multiple charges result in multiple custody orders, the highest priority is assigned to the largest custody order. The same situation applies in the case of multiple probation orders.

*** - is nil or zero

QUESTION 7:

HAS THERE BEEN AN INCREASE IN THE NUMBER OF FEMALE YOUTH TRANSFERRED TO ADULT COURT?

- Overall, very few female youth are transferred to adult court in Canada: a total of 20 from 1991/92 to 1996/97. From 1991/92 to 1996/97 there was no notable trend: In 1991/92 there were only 3 transfers, in 1992/93 there were 2, in 1993/94 there were 0, in 1994/95 there were 6, in 1995/96 there were 4, and in 1996/97 there were 5. Note that in 1994/95 all 6 transfers were in Manitoba.

APPENDIX A

DATA SOURCES

1. UNIFORM CRIME REPORT SURVEY

- A continuous historical record of crime and traffic statistics that have been investigated and reported by every police agency in Canada since 1962.
- As of 1995, there were approximately 1,800 separate police locations responding to the Survey, comprising about 420 different police forces. The most significant loss of information occurs in the rare situation where a police force fails to submit data to the Centre. In this situation, estimates are calculated for that particular force.
- Collected information includes the number of criminal incidents, the clearance status of those incidents and information on persons charged.
- Data is available for nearly 100 separate criminal offences.
- Incidents are classified according to the most serious offence occurring in the incident (generally the offence which carries the longest maximum sentence under the Criminal Code of Canada). Violent offences always take precedence over non-violent offences (i.e., an incident involving a breaking and entering offence and an assault is counted as an assault incident).

2. REVISED, OR INCIDENT BASED, UNIFORM CRIME REPORT SURVEY

- In 1984 the UCR Survey was re-developed to expand the information collected from the UCR Survey.
- The Revised UCR Survey allows detailed examinations of accused and victim characteristics (e.g., age, sex, alcohol/drug consumption, relationship, level of injury and weapon causing injury), as well as characteristics of the incident itself (e.g., location, targets of violations, secondary violations, the presence of weapons, property type, date and time).
- In 1996, the Revised UCR Survey had 154 police forces reporting to it, representing about 47% of the national volume of reported crime: 39% of incidents were from Quebec, 38% from Ontario, 10% from Alberta, 8% from British Columbia, 4% from Saskatchewan and 1% from New Brunswick. With the exception of Quebec, the majority of police departments are urban.

3. YOUTH COURT SURVEY

- National database of statistical information on charges, cases and persons involving accused who are aged 12 to 17 years (up to the 18th birthday).
- Basic charge data are used to 'create' cases, a case being all the charges against one young person that have the same date of first appearance.
- Data is collected from all youth courts in Canada and is intended to achieve complete coverage of charges dealt with by youth courts.
- Is a census of federal statute charges (Criminal Code, Narcotic Control Act, Food and Drugs Act, Young Offender Act, and other federal statutes) heard in youth courts.
- Excludes appeals, reviews, provincial statutes, and municipal by-law infractions.

4. CORRECTIONS KEY INDICATOR REPORT FOR ADULTS AND YOUNG OFFENDERS

- Data is quite general in nature.
- Is used mainly to monitor corrections population trends.
- Allows for historical comparisons and provides for some indication of current trends and demands.

5. OTHER STUDIES

A. Report of the Federal-Provincial-Territorial Task Force on Youth Justice. A Profile of the Juvenile Justice System in Canada Sharon Moyer, November 1996

- Provides a detailed quantitative description of the ways in which young offenders are dealt with by the justice system.
- Details the characteristics of youth crime and the processing of these crimes by the youth justice system.

**B. Serious Violent Offences and Offenders in Youth Court
Naomi Lee and Tim Leonard, December 1995**

- Provides a statistical profile of a set of young persons who have at least one charge relating to any of the following serious offences adjudicated under the YOA: murder, attempted murder, manslaughter, aggravated sexual assault, sexual assault with a weapon, rape and aggravated assault for an eight year period (1986-1993).

6. CANADIAN CENSUS

- Source: Statistics Canada, Census and Household Statistics Branch, Demography Division (Final Postcensal Estimates for 1991, 1992; Updated Postcensal Estimates for 1993, 1994, 1995; and Preliminal Postcensal for 1996 and 1997).
- Note that the population estimates used in this report are not the most recent. However, the changes are very slight and do not affect the results. To illustrate, the most recent population statistics available are the Final Postcensal Estimates for 1991 and 1992; Updated Postcensal Estimates for 1993, 1994, 1995; and Preliminal Postcensal for 1996 and 1997.
- Comparison:

	1992	1993	1994	1995	1996
Used	1,126,400	1,140,600	1,150,300	1,163,500	1,179,063
Updated	1,128,324	1,140,815	1,150,771	1,163,544	1,179,063

APPENDIX B

DATA PRESENTATION

- This report presents data on the national and regional levels separately and provides comparisons between regions. This is done because there is often disparity between regions and Canadian totals are greatly influenced by what happens in large population provinces, such as Ontario.
- The wording in this report, specifically the definitions, are often extracted verbatim from the sources (i.e., Uniform Crime Report and Youth Court Survey). If further clarification is needed on any definition, please refer to the original source.

APPENDIX C

REPORT Serious Violent Offences and Offenders in Youth Court
Naomi Lee and Tim Leonard, December 1995

- Lee and Leonard concluded in their research on serious violent youth offenders that “[o]ffenses involving accused under fifteen years of age accounted for only 17% of the charges of serious violence (15% for males and 2% for females). One-fifth of the charges related to offences that occurred when the accused was fifteen, 26% of offences at age sixteen and 35% of offences at age seventeen. Sixteen- and seventeen-year-old accused, therefore, accounted for the bulk (62%) of the charges” (1995:9).

APPENDIX D

**REPORTS: Serious Violent Offences and Offenders in Youth Court
Naomi Lee and Tim Leonard, December 1995**

**A Profile of the Juvenile Justice System in Canada
Sharon Moyer, November 1996**

- There is widespread consensus among the Canadian populace and research that large portions of young offenders are perpetrators of the most serious forms of violence. This is evident in the extensive media coverage afforded to the topic. However, according to Lee and Leonard (1995), these accounts “believe the fact...that the phenomenon of serious youth violence is actually so infrequent that it tends to elude statistical analysis” (1). Similarly, the research of Moyer (1996:2) concludes that “[e]ven a cursory look at the type of offences which result in system involvement shows that the vast majority of juvenile criminal behavior involved is not, by any definition, very serious in nature” (1996:2).
- To illustrate, referring to the research of Lee and Leonard (1995), “[b]oth the UCR and YCS indicate very small numbers per year of...[violent] offences....UCR data, from 1986 to 1993, yield the following average numbers of young [male and female] persons charged per year in all provinces and territories:

Murder:	39
Manslaughter:	5
Attempted Murder:	65
Aggravated Sexual Assault:	20
Sexual Assault with a Weapon:	51
Aggravated Assault:	254
All the above:	434” (2)

- Lee and Leonard (1995:4) further state that “[t]o put this base into perspective it is worth noting that during the reference period, in the nine jurisdictions included in the study, approximately three million individuals were at risk of being charged under the YOA, that is, they were between the ages of 12 and 17 years at some time during the reference period. The estimated number of young persons identified for this study, therefore, represents a mere 0.06% of the population at risk, and their charges relating to serious offences are approximately 0.3% of the 900,000 charges of all types dealt with by youth courts of the nine jurisdictions in the same period”.

1996 Incident Based Uniform Crime Report Survey

- Selected Violations Against the Person, by Gender of Victim and Accused, 1996

	Female Accused (%)	Male Accused (%)	Total Accused (#)
Female Victims (%)	7.2	48.2	43,328
Male Victims (%)	5.9	38.7	34,070
Total Victims (#)	9,958	66,440	76,398

- * Excludes incidents involving multiple accused and incidents where gender is unknown
- ** Counts the number of individual victimizations by sex of victim and accused
- *** Source: Incident Based UCR, Policing Services Program, Canadian Centre for Justice Statistics

APPENDIX E

**REPORT: Serious Violent Offences and Offenders in Youth Court
Naomi Lee and Tim Leonard, December 1995**

- Only a small fraction of young persons (females and males) charged with serious violent offences were transferred to adult court.
- Transfer orders were issued by youth courts in more cases that did not involve violent offences than in cases that did.
- Youth who were transferred tend to be of the upper limit of the age jurisdiction of the YOA.
- Youth who were transferred tend to have rather high charge to person ratios in their youth court histories. They share these characteristics, however, with many that remain in the youth justice system and receive dispositions under the Act. The data signal a need for more detailed research into the working and effects of the transfer provisions of the YOA (50).

APPENDIX F

DATA SOURCE EXPLANATIONS

Youth Court Survey

- A **case** is one or more charges against a young person which are presented in court on the same date. Basic charge data are used to 'create' cases, a case being all the charges against a young person that have the same date of first appearance. Identifiers used to link charges to cases are the coded name, sex, date of birth, date of first court appearance and court location code. This report uses case counts as the unit of analysis.

Uniform Crime Report

- An **incident** is the basis for counting reported crime. An incident is the set of connected events usually constituting an occurrence report. In the aggregate survey, the incident is used in conjunction with the Most Serious Offence rule to form the aggregate offence counts (see below for definition of the Most Serious Offence rule). In the incident based survey, information for each incident is reported individually. Aggregate most serious offence rules are then applied to these data in order to reconcile them with historical aggregate counts as well as with data from aggregate respondents.
- **Most Serious Offence Rule** - The UCR classifies incidents according to the most serious offence in the incident. In categorizing incidents, violent offences always take precedence over non-violent offences. The UCR Survey scores violent incidents differently from other types of crimes. For violent crimes, a separate incident is recorded for each victim (categorized according to the most serious offence against the victim). If, for example, one-person assaults three people, then three incidents are recorded. If three people assault one person, only one incident is recorded. For non-violent crimes, one incident (categorized according to the most serious offence in the incident) is counted for every distinct or separate occurrence.
- Robbery is one exception to the above ruling. Robbery is categorized as a violent offence. Unlike all other violent offences, one occurrence of robbery is equal to one incident, regardless of the number of victims. The reason for this exception is that robbery can involve many people who could all be considered victims. In a bank robbery with 5 tellers and 20 customers present, 25 incidents of robbery would be counted if the normal scoring rule for violent incidents were applied. This would seriously overstate the occurrence of robbery.
- Thus, the total number of incidents recorded by the UCR survey is not a census of all violations of the law that come to the attention of the police.

Rather, it is equal to the number of victims of violent crimes (other than robberies) plus the number of separate occurrences of non-violent crimes (and robberies).

- **Persons charged** - The UCR also records the number of persons charged. For incidents that are cleared, the survey collects the number of adults charged by gender, as well as the number of youths (aged 12 to 17 years) charged by gender. The “persons charged” category includes the number of people charged or recommended for charges by police, not the number of charges laid or recommended or laid against those people. A person who is simultaneously charged with more than one offence is counted according to the most serious offence, even if the offences occurred in more than one incident. In addition, persons may be counted more than once throughout the year; that is, individuals are counted on each occasion that they are charged by the police.
- Persons charged refers to persons who were charged in connection with a particular incident. These persons, however, may have been charged later with a lesser offence. For example, a person who commits a breaking and entering offence may end up being charged with possession of stolen goods if, for instance, the police have better evidence on the latter offence. Both the actual incident and the person charged are counted under breaking and entering, even though the person was actually charged with possession of stolen goods.

Corrections Key Indicator Report

- The data used in this report are the average month-end admission count to a facility. Averages are calculated by adding all month-end admission counts and dividing the total number of months for the corresponding period. Actual in counts includes all youths on remand and temporary detention, sentenced offenders and other young offenders who are legally required to be at a facility and are present at the time the count is taken.
