

Figure 1

Tuberculosis incidence and mortality rates – Canada: 1924-2002

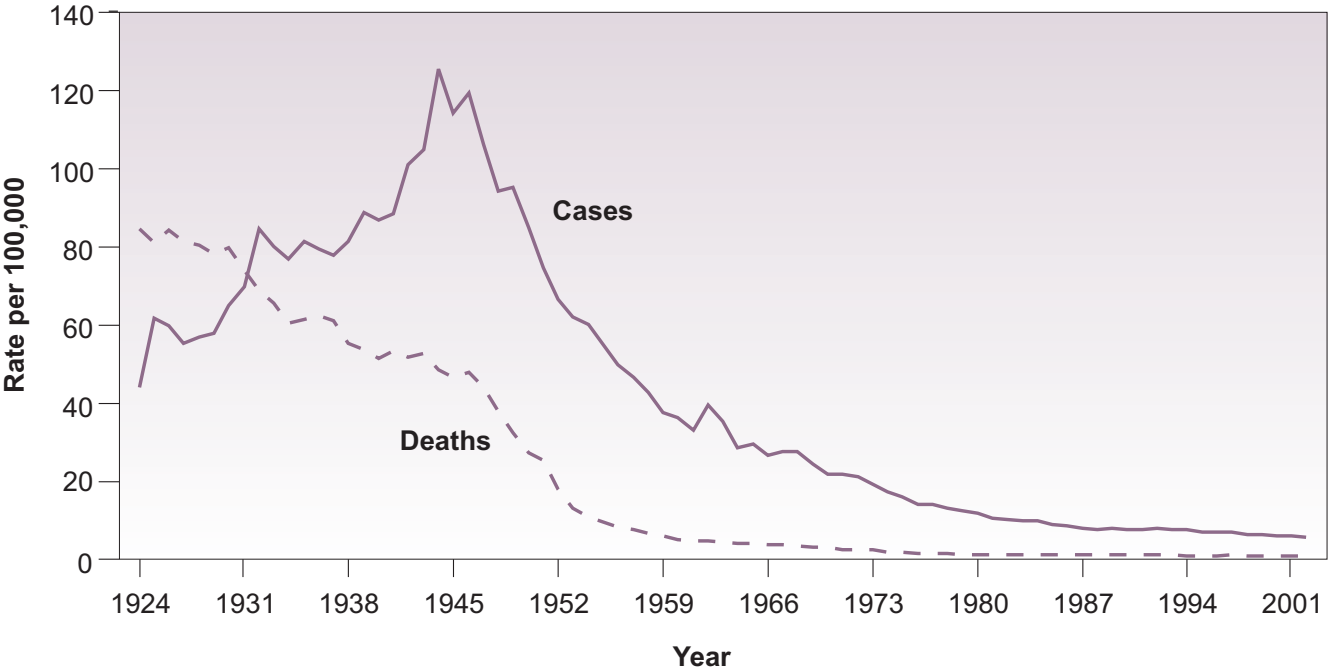

Figure 2

Tuberculosis cases and incidence – Canada: 1982-2002

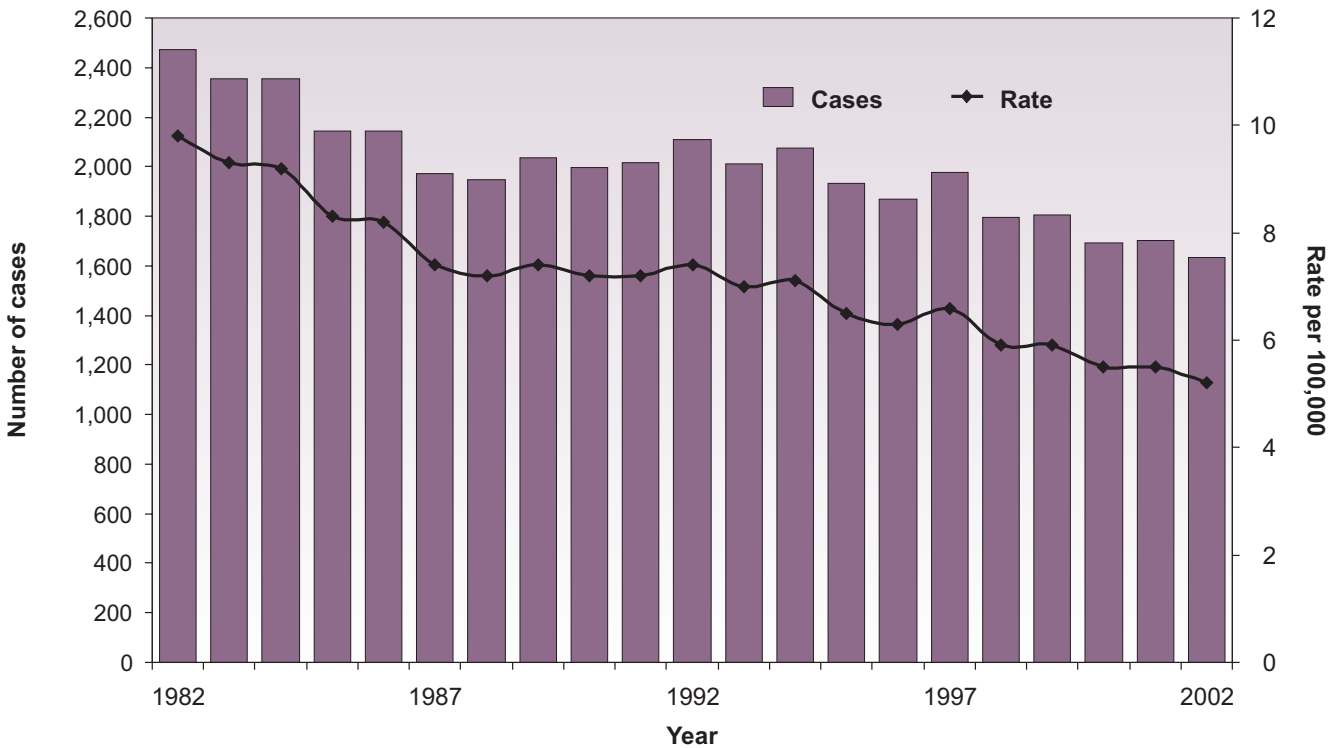

Figure 3

Tuberculosis incidence by province/territory as compared with national rate (5.2 per 100,000): 2002

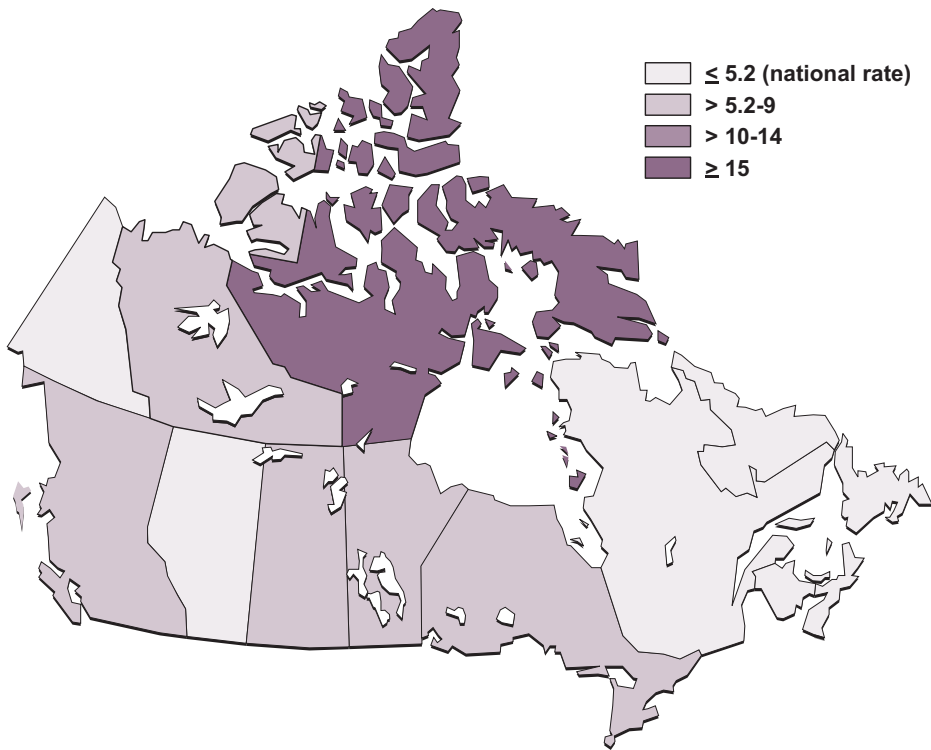

Figure 4

Tuberculosis incidence by sex – Canada: 1982–2002

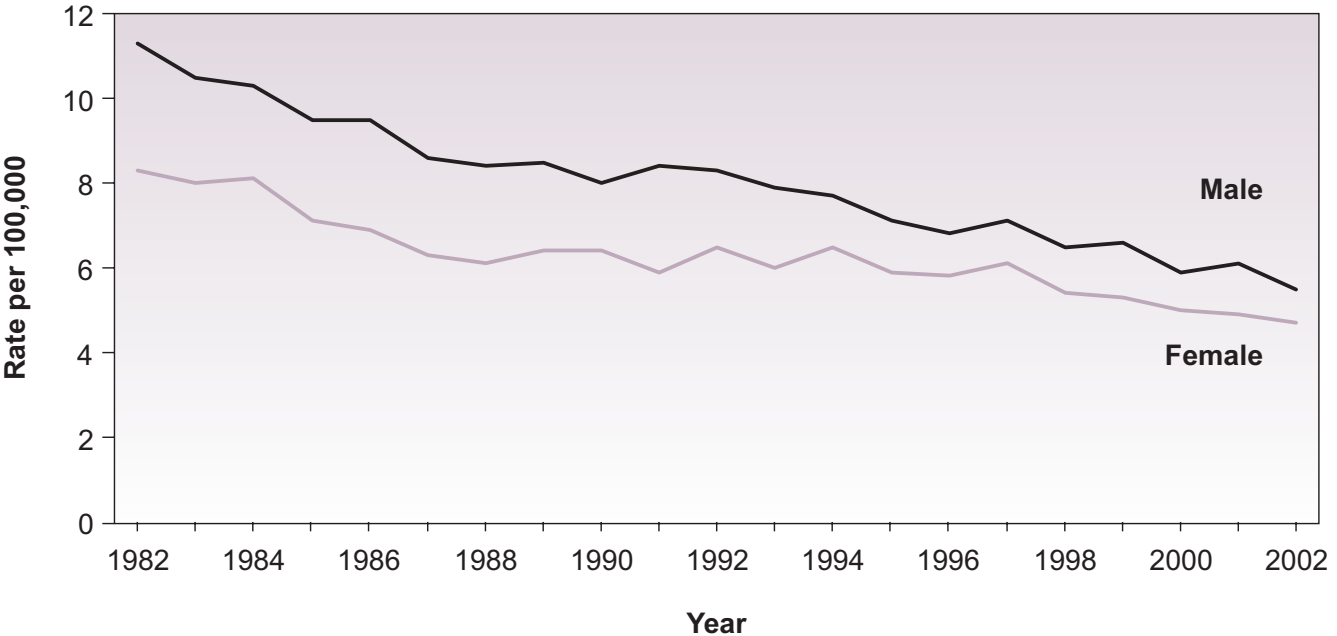

Figure 5

Tuberculosis incidence by age group – Canada: 2002

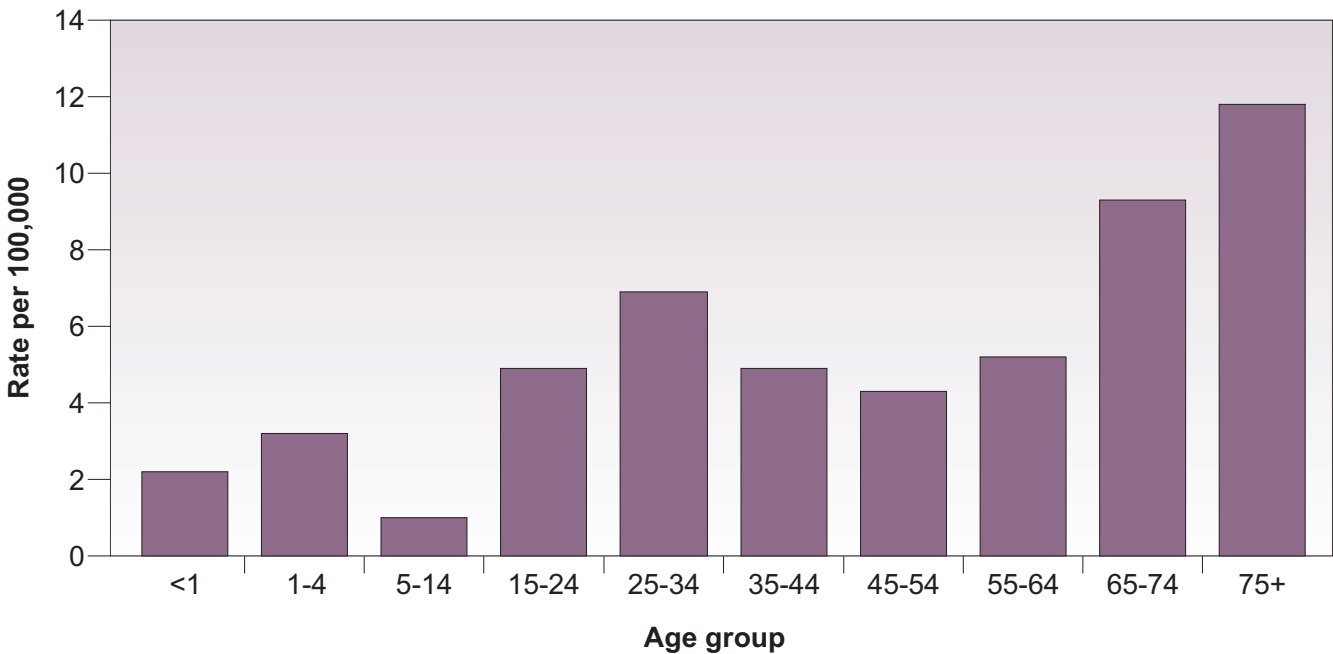

Figure 6

Tuberculosis incidence by age group and sex – Canada: 2002

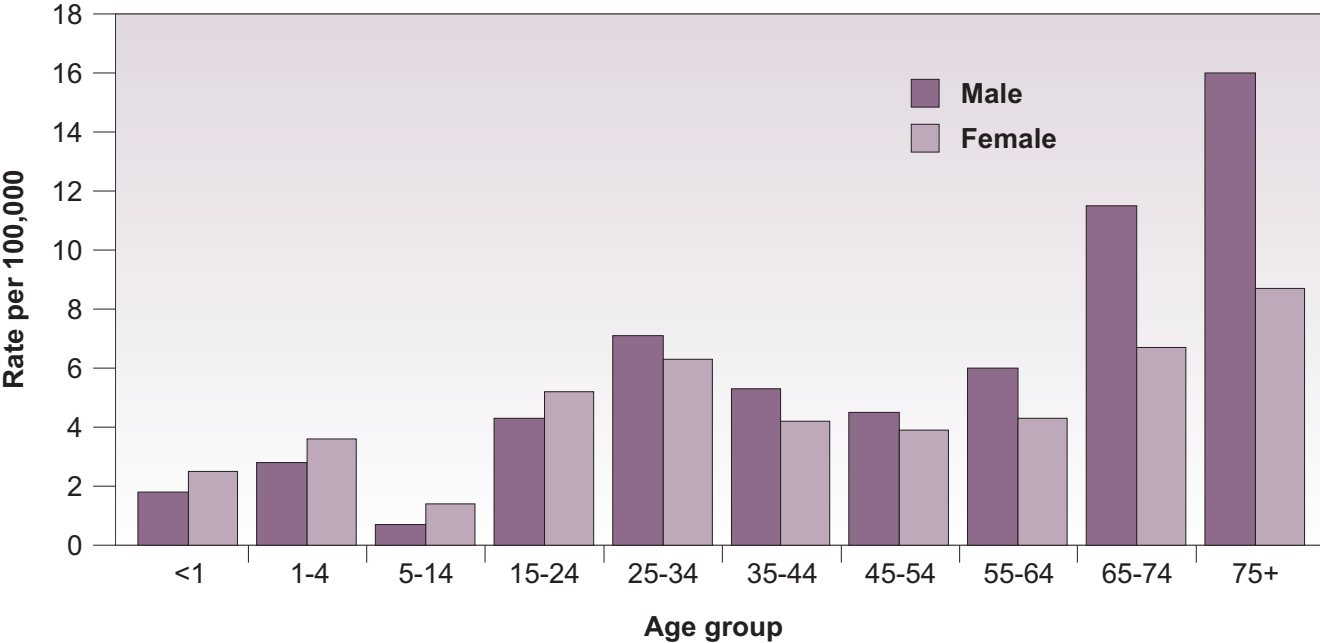

Figure 7

Proportion of tuberculosis cases by origin – Canada: 1992-2002

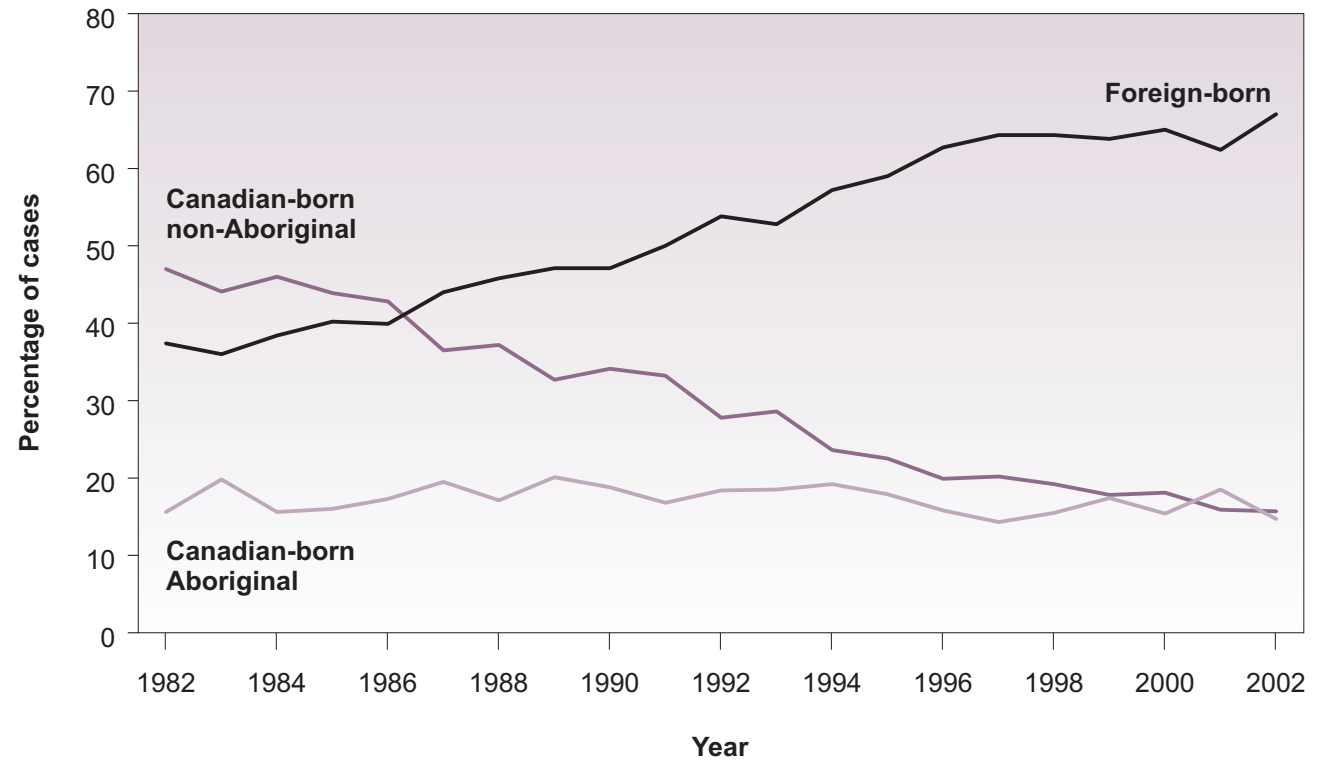

Figure 8

Number of tuberculosis cases by origin – Canada: 1982-2002

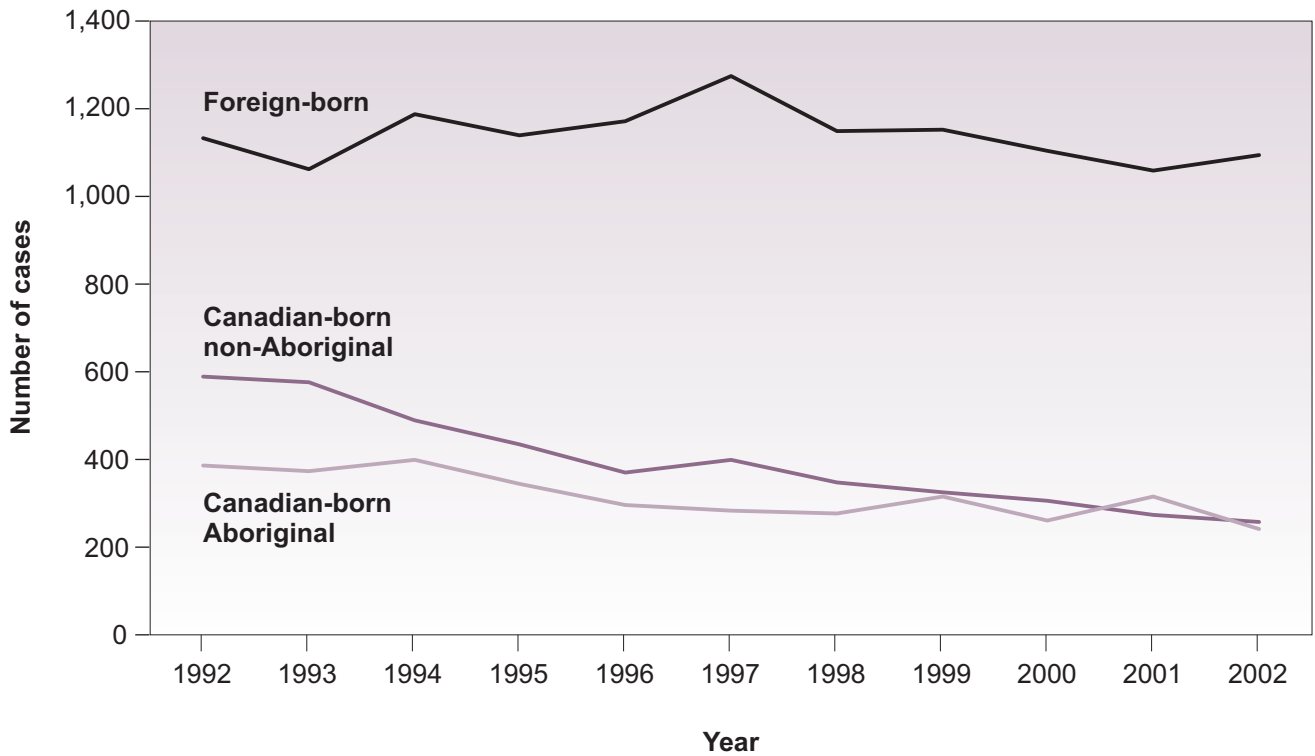

Figure 9

Tuberculosis incidence by origin – Canada: 1992-2002

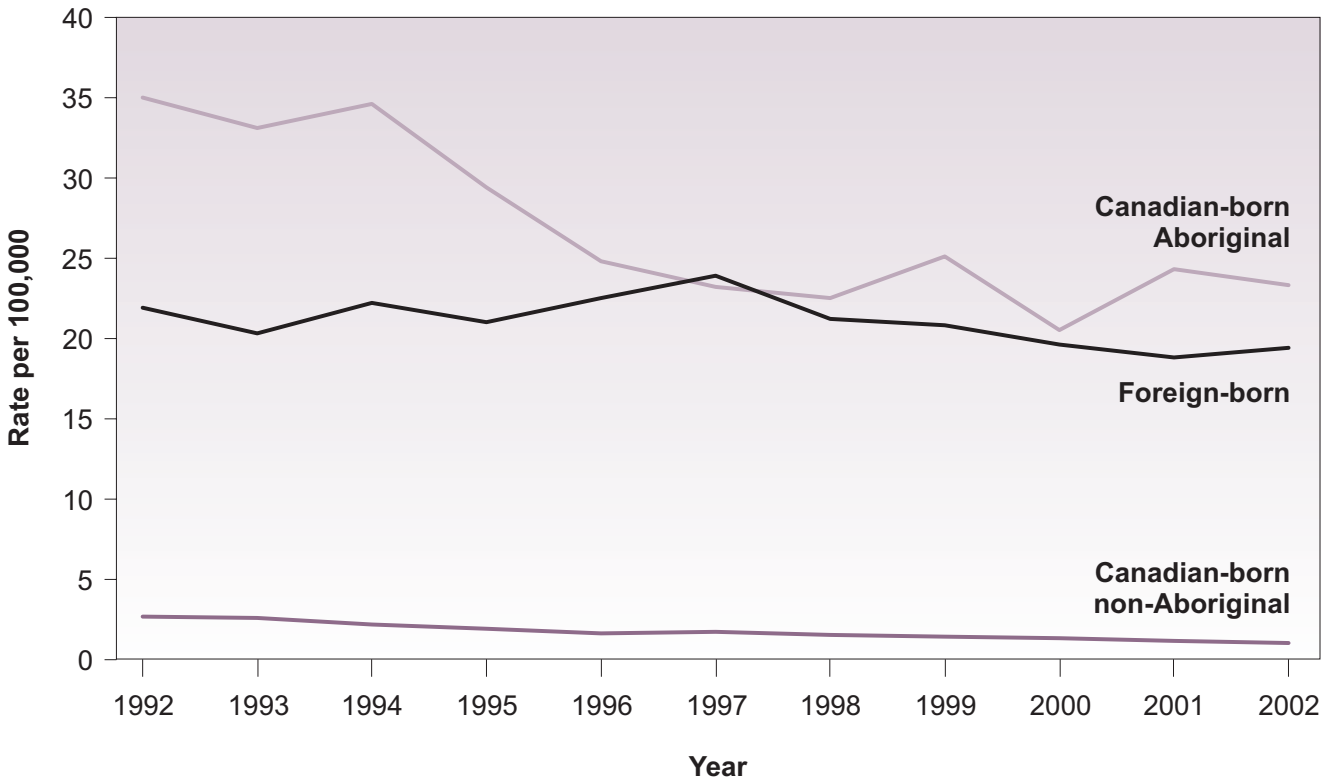

Figure 10

Tuberculosis cases by age group and origin – Canada: 2002

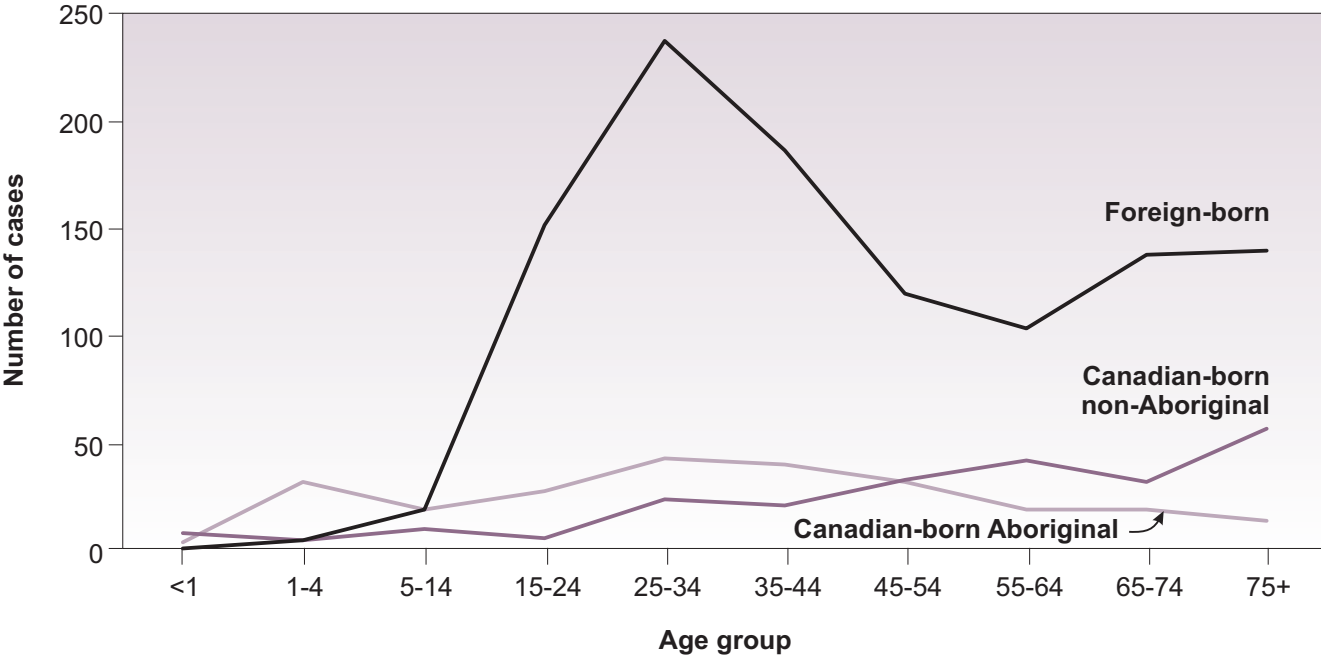

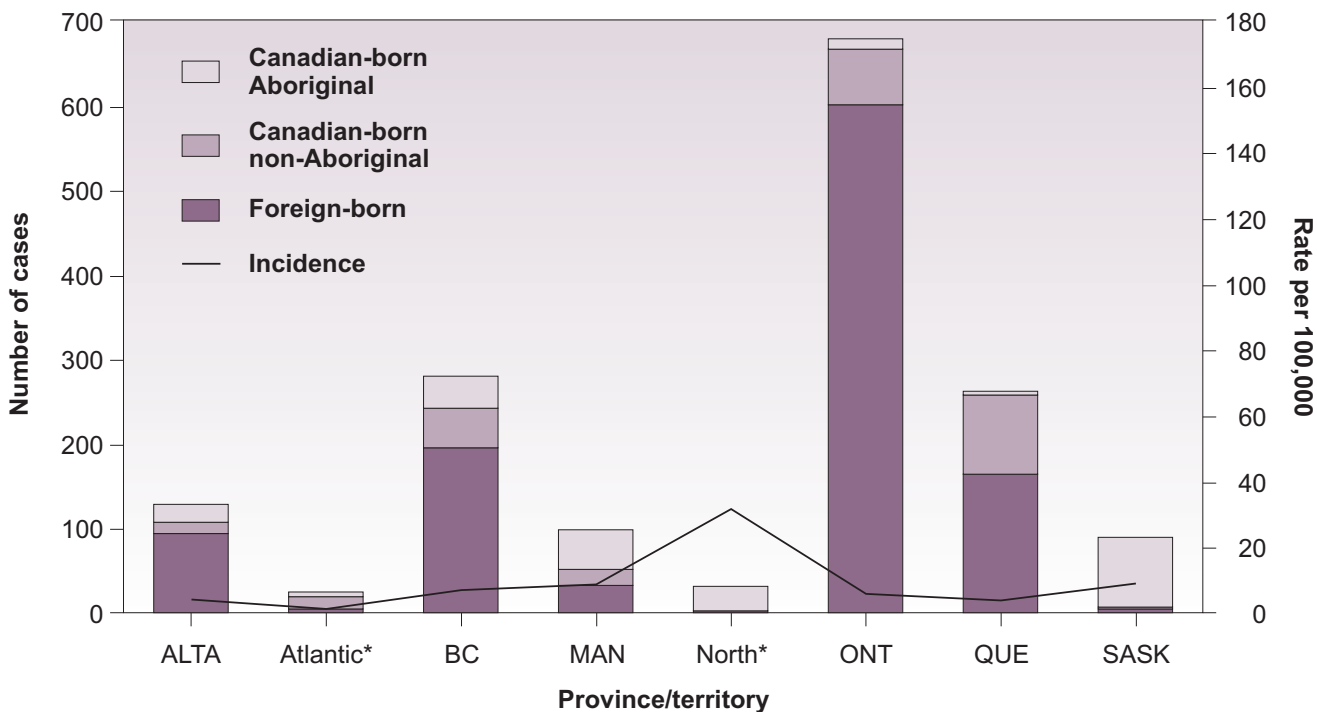

Figure 11

Distribution of tuberculosis cases by origin and incidence – provinces/territories: 2002

*"Atlantic" includes New Brunswick, Newfoundland and Labrador, Nova Scotia, Prince Edward Island.
"North" includes Northwest Territories, Nunavut, Yukon.

Figure 12

Proportion of foreign-born tuberculosis cases by WHO region – Canada: 1992–2002

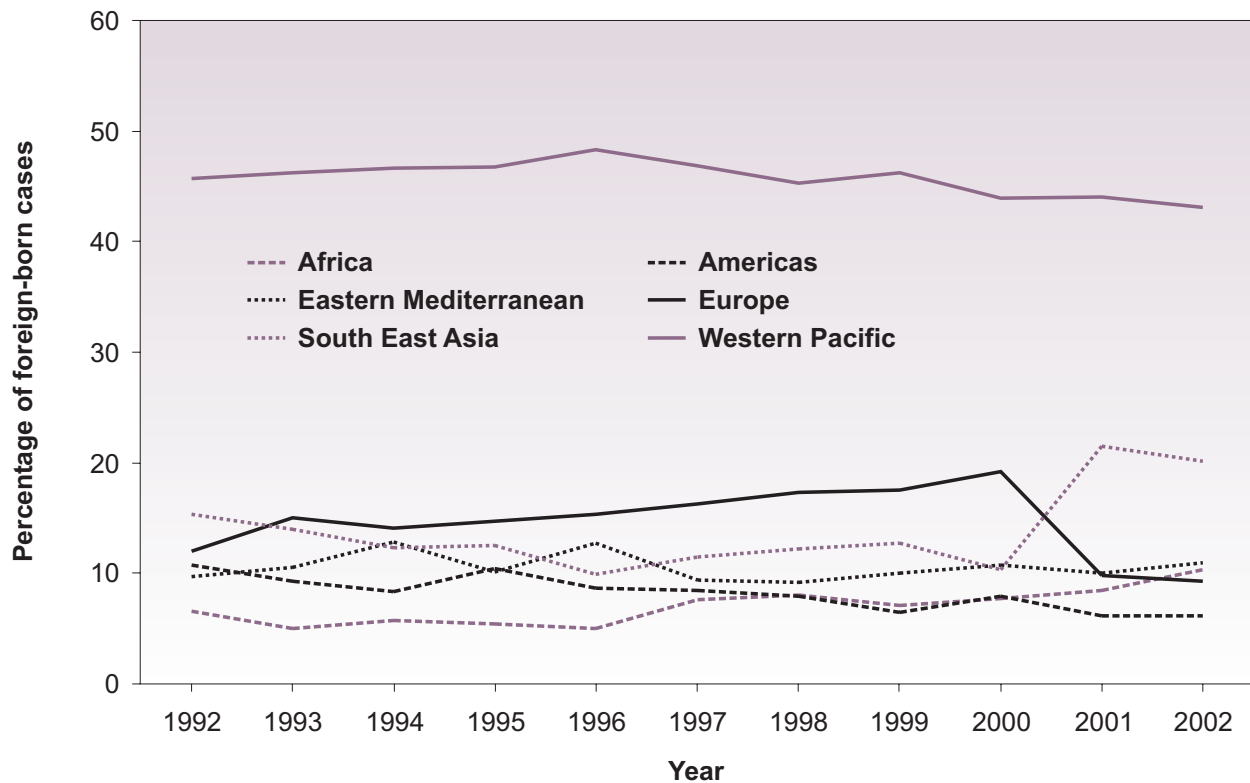

Figure 13

Reported foreign-born tuberculosis incidence in Canada by WHO region of birth and WHO estimated tuberculosis incidence in the respective region

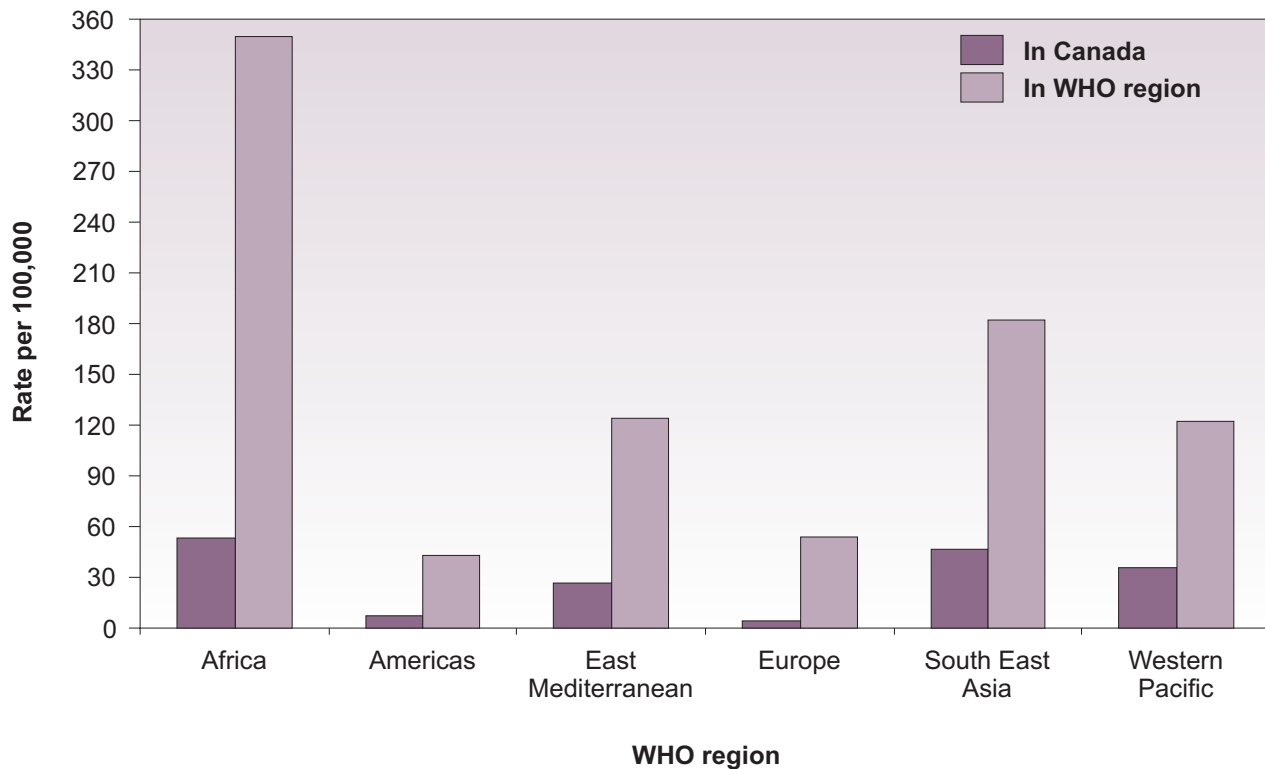

Figure 14

Tuberculosis cases by main diagnostic site and origin – Canada: 2002

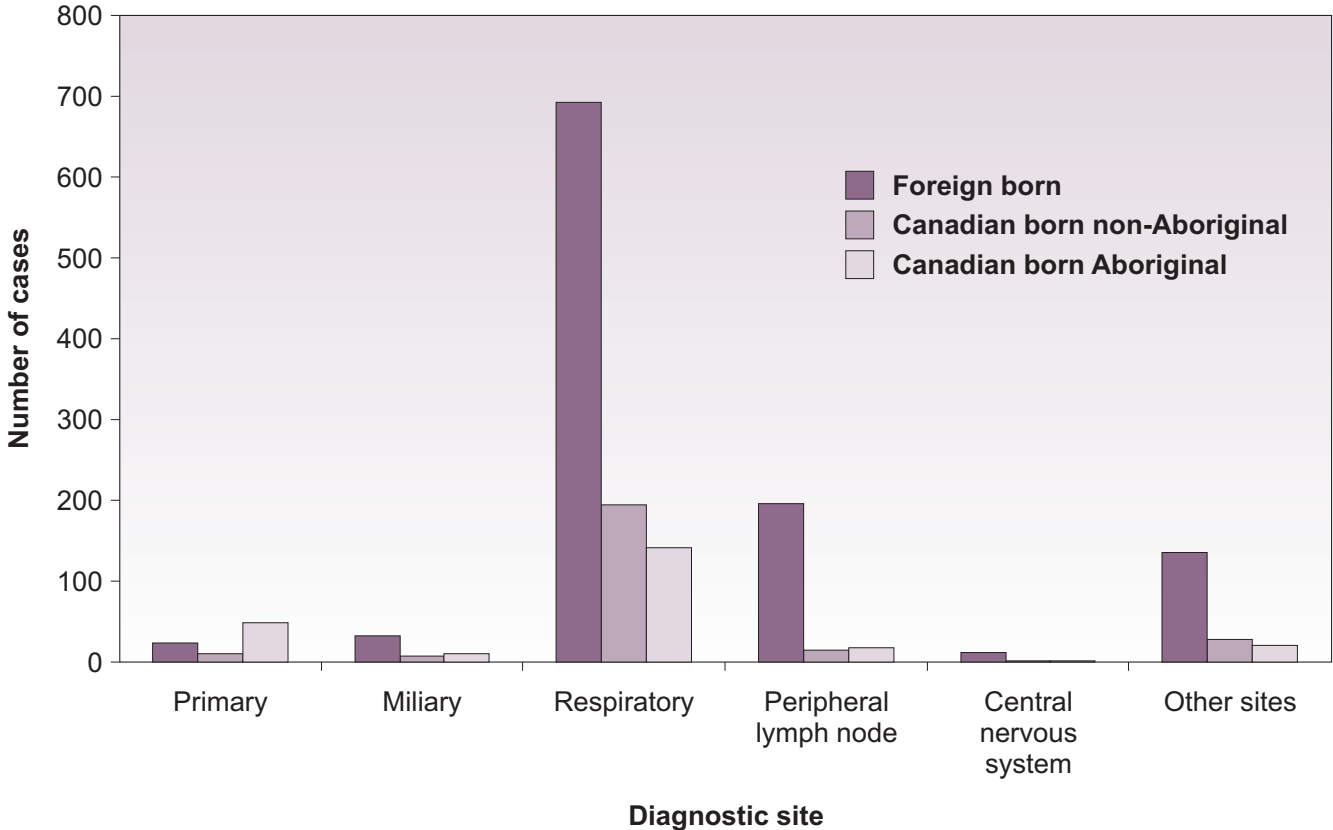

Figure 15

Pulmonary sputum smear positive tuberculosis cases – Canada: 1992-2002

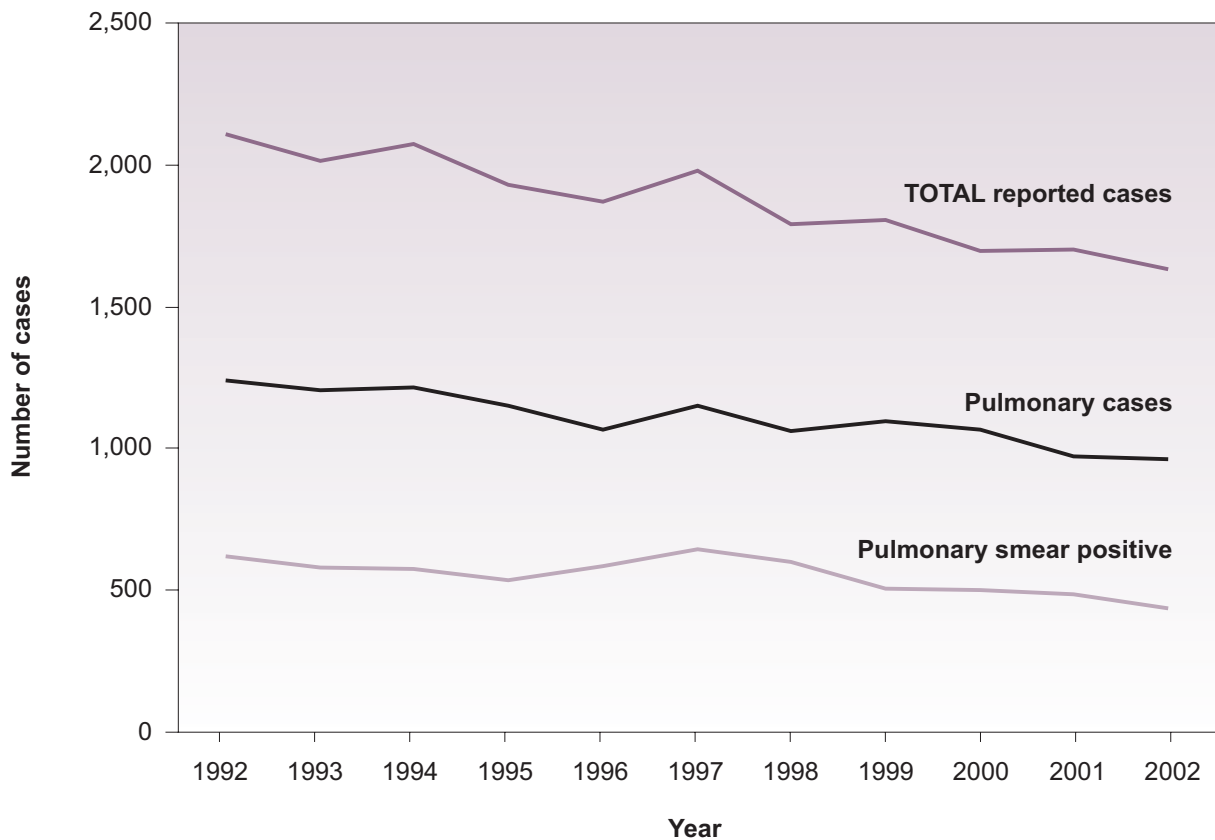

Figure 16

Proportion of tuberculosis cases for which HIV status is known – Canada: 1997-2002

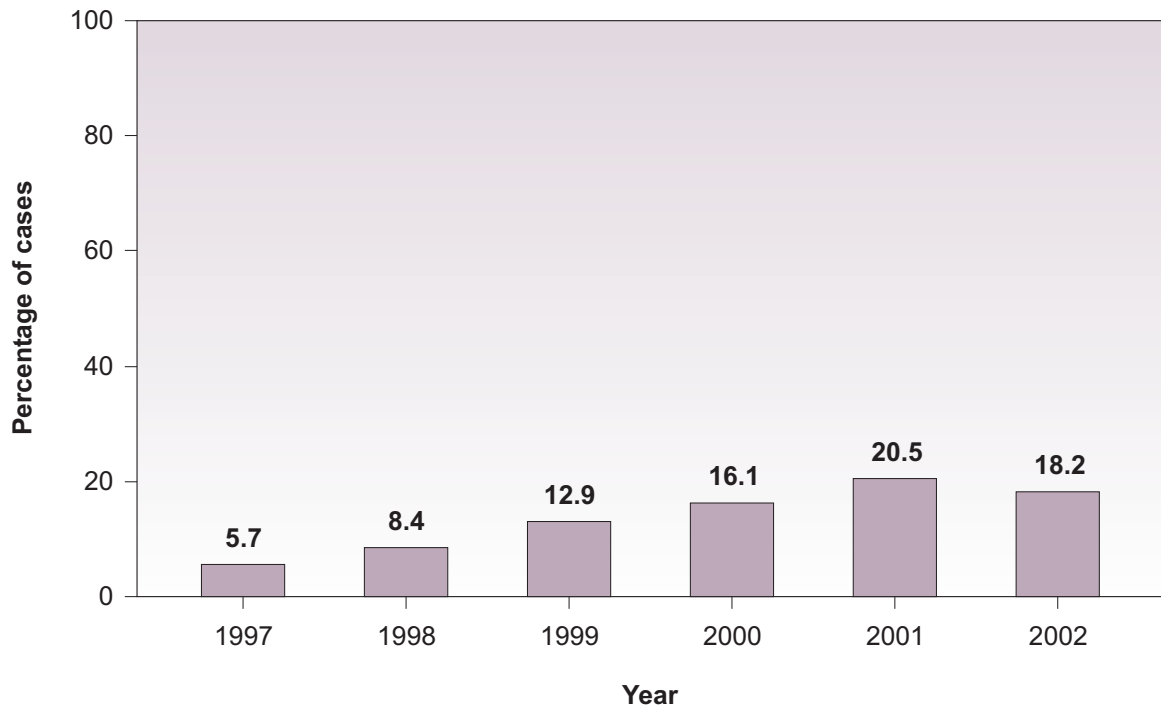

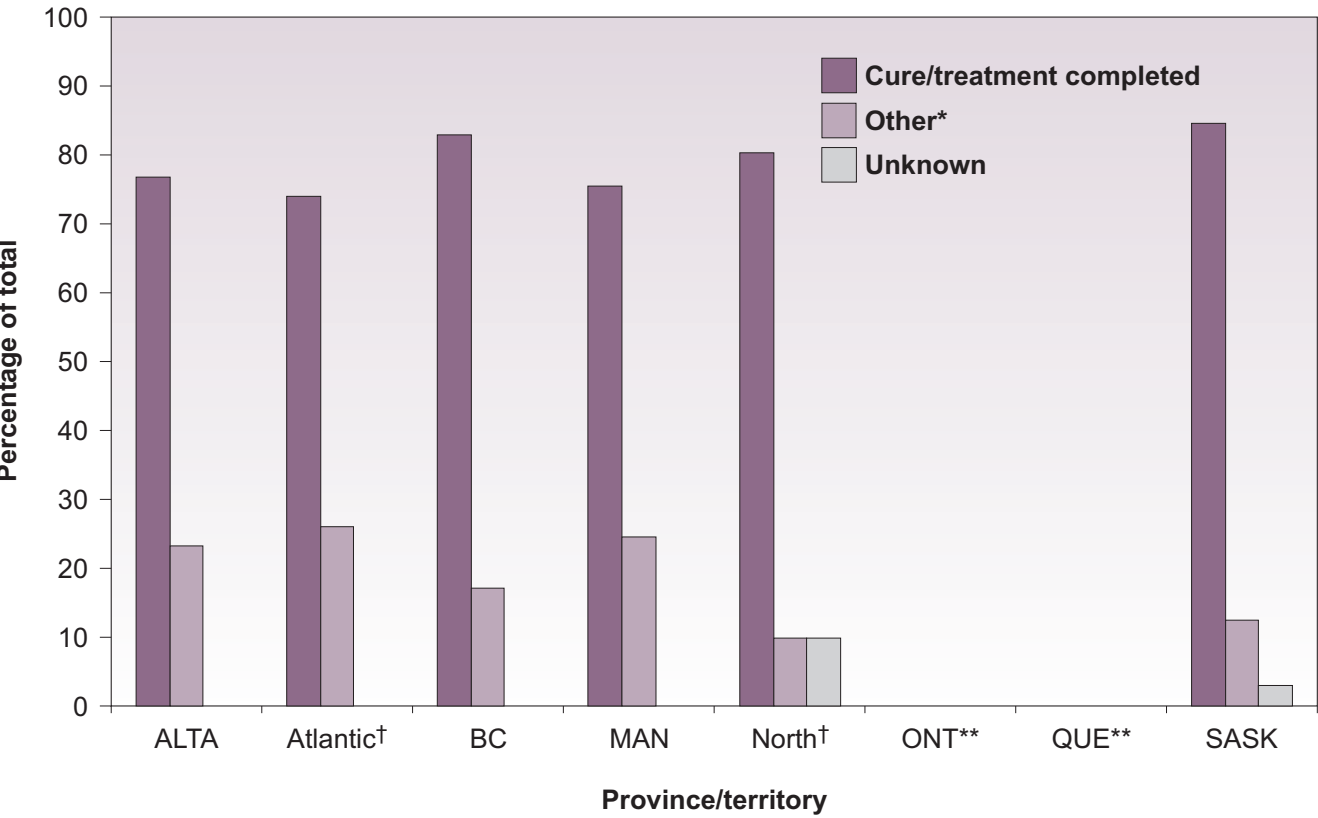

Figure 17

Treatment outcome status of tuberculosis cases by provinces/territories – Canada: 2002

* Other – died, absconded, transferred, treatment ongoing

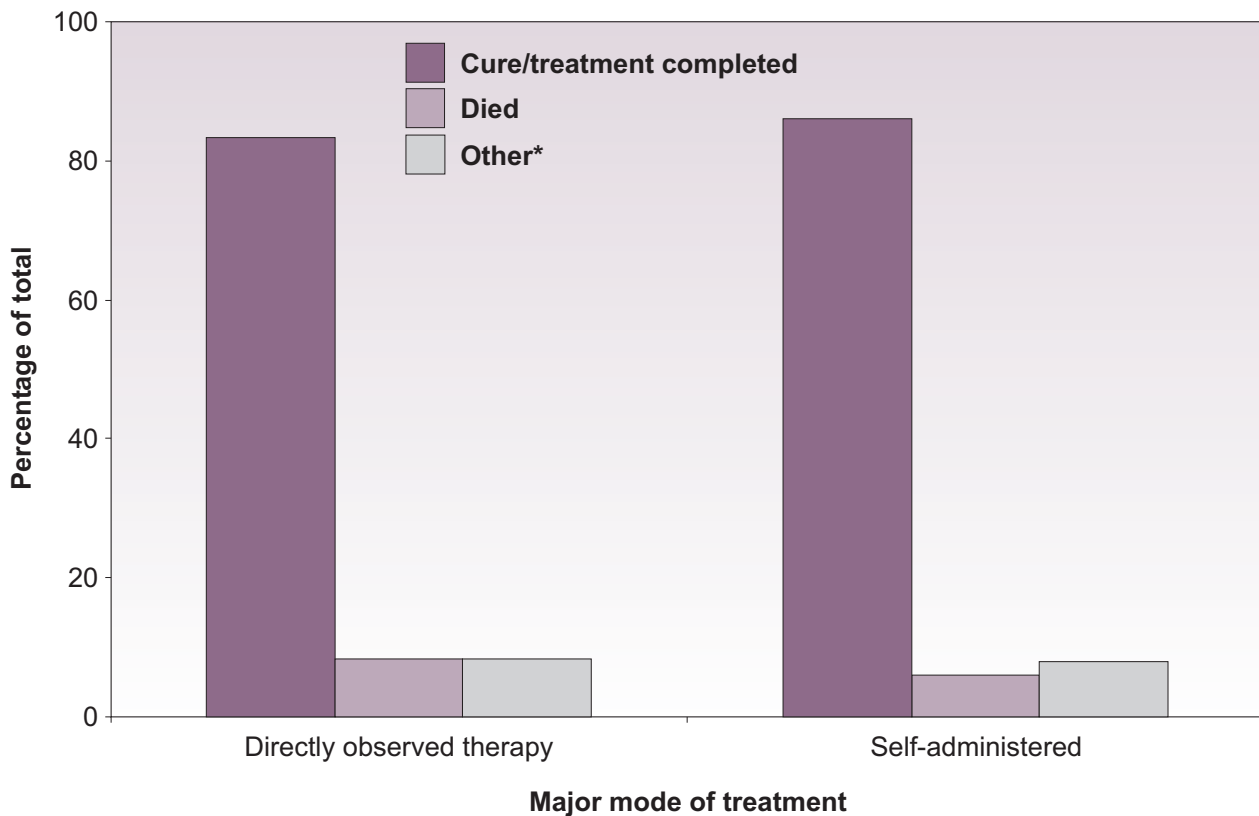

** No data for ONT and QUE

† "Atlantic" includes New Brunswick, Newfoundland and Labrador, Nova Scotia, Prince Edward Island.

"North" includes Northwest Territories, Nunavut, Yukon.

Figure 18

Treatment outcome status of tuberculosis cases by major mode of treatment – Canada: 2002

* Other – absconded, transferred, treatment ongoing, unknown
