

West Nile Virus National Surveillance Report

English Edition

September 3, 2006 - September 9, 2006 (Week 36)

Canada

Human:

During week 36, eight new human cases of West Nile virus infection (WNV) have been reported to the Public Health Agency of Canada (PHAC). As of week 36, 84 confirmed human WNV cases [Alberta (21), Saskatchewan (6), Manitoba (47) and Ontario (10)] and one asymptomatic infection [Manitoba (1)] have been reported to the PHAC. Of the 84 clinical cases, 13 (15.5%) were classified as West Nile Neurological Syndrome, 47(56.0%) as West Nile Virus Non-Neurological Syndrome, and 24 (28.6%) as unclassified. No deaths have been reported to date.

Bird:

As of week 36, 2424 dead birds have been tested, of which 267 (11.0%) were positive for WNV. Of these positive bird tests, 12 were reported in Alberta [Calgary (1), Palliser (8) and Chinook (3)], 3 were reported in Sastachewan [Heartland (1), Cypress (1) and Regina (1)] and 252 were reported in Ontario [Central East (57), Central West (46), East (29), North East (29), North West (27), South West (51) and Toronto (13)]. The positive birds were American crows (85.4%), blue jays (13.1%), black-billed magpies (0.8%), ravens (0.4%) and pelicans (0.4%).

Mosquito:

As of week 36, 498 WNV positive mosquito pools have been reported, including 114 in Alberta [Palliser (87), David Thompso (3), Calgary (7) East Central (1) and Chinook (16)], 35 in Saskatchewan [Cypress (3), Heartland (1), Five Hills (1), Saskatoon (2) and Sun Country (28)], 171 in Manitoba [Assiniboine (34), Central (7), Interlake (40), Brandon (7), North Eastman (9), South Eastman (4), and Winnipeg (70)], 169 in Ontario [Central East (30), Central West (39), East (3), North East (17), North West (4) South West (32) and Toronto (44)] and 9 in Quebec [Monteregie (6) and Montreal-Centre(3)]. Domestic Animal:

As of week 36, six WNV positive horses have been reported in Manitoba (1) and Alberta(5).

National WNV surveillance data and maps can be found on the PHAC web site at:

http://www.phac-aspc.gc.ca/wnv-vwn/index.html

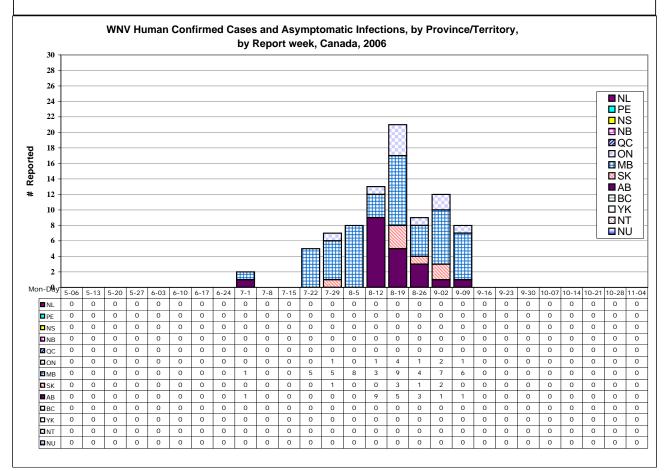

Provinces/Territories: Detailed WNV information can be accessed through the Links section on the PHAC WNV web site.

United States

Human:

Between 1January and 12 September 2006, 1634 human WNV cases [952 (58%) fever, 630 (39%) neuroinvasive disease and 52 (3%) clinically unspecified] have been reported to the Centers for Disease Control and Prevention (CDC) in the U.S. There have been 52 deaths reported.

States: Detailed State information can be accessed through the CDC web site: http://www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm

 $^{^{\}rm 1}\,$ Total clinical cases is the sum of WNNS + WN Non-NS + Unclassified / Unspecified

Details on human case definitions can be seen on the PHAC West Nile virus surveillance web site:

http://www.phac-aspc.gc.ca/wnv-vwn/hmncasedef_e.html

 $^{^{2}\,\,}$ Likely related to travel outside the province / territory

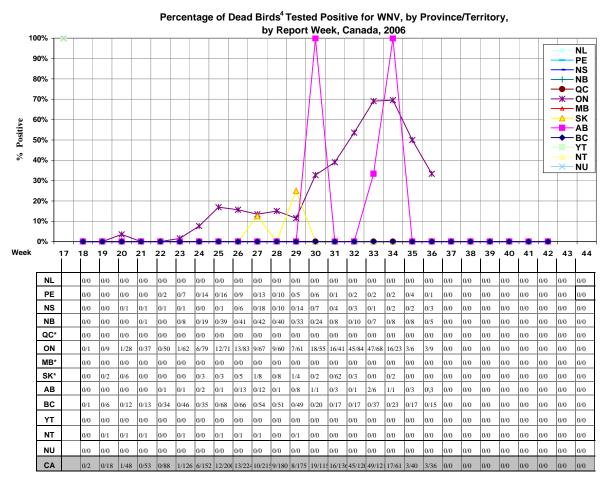

Episode date could include one of the following: onset date, diagnosis date, lab sample date, or reporting date.

Mostly corvids (e.g. crows, blue jays, and ravens).

Not all provinces are conducting dead bird surveillance as part of their own WNV surveillance program in 2006. However, WNV positive dead birds may be identified through the National Wildlife Disease Surveillance Program of the Canadian Cooperative Wildlife Health Centre (CCWHC).
