New Home Market

Starts hold firm

Total housing starts have been trending lower since the end of 2004. Low mortgage rates and job growth have, however, kept new home starts virtually unchanged in the second quarter of 2005 in the Hamilton Census Metropolitan Area (CMA), hereafter referred to as Hamilton. Total housing starts edged 0.7 per cent lower to 1,026 units in the second quarter compared to the same time period last year.

Escalating new detached home prices have led to increases in demand for multi-family dwelling types. Multiple starts soared by 19 per cent to 578

units in the second quarter from the same time period last year. This large increase helped to offset the dramatic decline in detached home starts, which plunged by 18 per cent to 448 units.

The shift towards condominium apartments and town houses is also a reflection of diminishing family size. Recent demographic survey results suggest that household composition is tilting towards smaller households (usually two member families). Housing demand is thus being shaped by changing demographic patterns.

8 Definitions

Hamilton City witnessed the biggest gain in housing construction where total starts more than doubled in the second quarter compared to last year. This surge in demand is attributed to Hamilton City recording the lowest new home price level within the CMA. Burlington in contrast, which is one of the most expensive sub-markets within Hamilton, saw its share of total starts drop by 15 per cent.

Dana Senagama, CMHC - Market Analysis
dsenagam@cmhc-schl.gc.ca * (416) 218-3329

It is interesting to observe that the Flamborough sub-market, which is traditionally associated with more expensive detached homes, is driving new multi-family construction activity. This is evident from its tripling of year-to-date multi-family starts compared to the same time period last year. This is both a reflection of affordability shaping housing demand as well as a shortage of land dictating the type of new home construction.

The average absorbed detached home price rose by 9.5 per cent to \$346,367 compared to the same time period last year. Six out of the nine sub-markets within Hamilton recorded an average detached home price above \$300,000. Hamilton City and Stoney Creek remained the only markets to post detached home prices below \$300,000. Burlington recorded the highest average price growth for an absorbed detached home posting a 19.3 per cent increase.

Lack of serviceable land, rising lot prices, labour and increasing material costs continued to push new home prices higher in the second quarter of 2005. Rising detached house prices explain the significant decline in detached housing starts during the second quarter.

Resale Market MLS® sales remain unchanged

Seasonally adjusted sales have been trending lower since the second quarter of 2004. Strong job growth, influx of migrants from Toronto and low mortgage rates however kept home sales at strong levels during the second quarter of 2005. Multiple Listing Service® (MLS) sales remained steady with a marginal decline of 0.3 per cent to 4157 units compared to the same time period last year.

A shortage of new listings has been a characteristic feature in the Hamilton resale market. New listings have not kept pace with sales. Seasonally adjusted new listings have been on the decline since the early 1990s. It would seem that once people take up residence in Hamilton, they simply do not want to move!

Soaring resale home prices in Hamilton has been driven by a shortage of new listings. The sales-to-new listings ratio is considered a good indicator of price pressures in a resale home market. A market with a ratio in excess of 55 per cent favours sellers with average price growth

being above the general rate of inflation. A market is considered balanced if this ratio falls below 55 per cent. The Hamilton resale market has been in strong sellers' territory for the past four consecutive years. The second quarter of 2005 was no exception as the sales-to-new listings ratio stood at 76 per cent. Hamilton continues to be one of the tightest resale markets in Ontario.

The seasonally adjusted average MLS price has been trending higher since the late 1990s. A tight resale home market, increasingly sparked by recent demand from Toronto home buyers hoping to escape rising prices, was a key factor driving resale home prices higher. The average MLS home price rose by six per cent to \$232,461 during the second quarter of 2005 from the same time period last year. This increase was roughly three times the rate of inflation (as measured by the Consumer Price Index) over the same period.

Did you know?

For those who have difficulty meeting their housing needs on their own, CMHC plays a key role in helping them gain access to safe, affordable housing.

On behalf of the Government of Canada, we provide annual housing support to hundreds of thousands of low-income households in communities across the country. We also work in partnership with public, private and non-profit organizations as well as other levels of government to develop innovative financing and to increase the supply of affordable housing in Canada.

We are and we will continue to be
“Home to Canadians.”

Visit us at www.cmhc-schl.gc.ca and you will see a lot of information under one roof.

Definitions

1. Starts: refers to units where construction has advanced to a stage where full (100%) footings are in place. For multiple dwellings (semi-detached, row housing and apartments) the definition of a start applies to the structure or block of row units rather than to the project as a whole.

2. Under Construction: those units which have been started but which are not complete.

3. Completions - Single-detached/semi-detached units: this generally is the stage at which all proposed construction work is complete. A unit may be completed at the 90% stage where the remaining work is largely cosmetic. **Row housing/ Apartment:** completions means that 90% or more of the dwelling units within a block of row units or an apartment structure are completed and ready for occupancy

4. Completed and Not Absorbed: all completed units of new construction (excluding model homes not available for sale) which have never been sold or leased.

5. Absorptions: the number of completed units (excluding model homes) that have been sold or leased.

6. Seasonally Adjusted (SA): Actual monthly (or quarterly) figures adjusted to remove normal seasonal variation.

7. Seasonally Adjust Annual Rates (SAAR): Seasonally adjusted monthly figures multiplied by 12 (or quarterly figures multiplied by 4) to reflect annualized levels of activity.

8. Definitions for CMA, NHPI, CPI, and Inflation Rate can be found in the Statistics Canada website - <http://www.statcan.ca>

Your Guide to Renting a Home – CMHC's new, online guide for tenants, landlords, and property managers

CMHC is breaking new ground with the introduction of “Your Guide to Renting a Home”. A comprehensive rental guide, developed by the Research and Information Transfer team, this free, online tool launched this spring. It will help the estimated four million Canadian households in rental accommodation, as well as landlords and property managers, to find plain language information on tenant and landlord rights and rental practices across the country.

“Your Guide to Renting a Home” is located on the CMHC Web site at www.cmhc.ca. From the left-hand menu, you can select “Buying or Renting a Home” and click on “Renting a Home”.

Ontario's 2004 Retirement Homes Report

Do you want to learn more about the dynamic private retirement home market in Ontario? The 2004 Retirement Homes Report has detailed Ontario-wide survey findings by market area covering vacancy rates and per diems by bed type, capture rates, new supply and vacancy rates by rent range for private beds as well as rent distributions. Order your copy today by calling **1-800-493-0059**.

Housing Now is published four times yearly for the Hamilton Metropolitan market. Forecast Summary Supplement is included with the 1st and 3rd quarter reports. An annual subscription to the Hamilton Housing Now is \$55.00 plus GST. To order, please contact Ontario customer service at 1-800-493-0059.
