Mixed Results for Alberta's Rental Markets

The trend toward first-time home buying did not translate to higher vacancies in all of Alberta's urban centres with a population of 10,000 or more. According to the results of Canada Mortgage and Housing Corporation's (CMHC) annual Rental Market Survey, six of Alberta's 13 major urban centres reported an increase in apartment vacancies in October 2004.

The largest increase in the vacancy rate occurred in Canmore where vacancies rose from 1.2 per cent in October 2003 to 3.8 per cent in October 2004. The largest decrease in vacancy rate occurred in Cold Lake where vacancies fell from 15.4 per cent to 10.6 per cent. Despite the decrease, Cold Lake continues to have the highest vacancy rate among Alberta's urban centres.

Meanwhile, Wood Buffalo/Fort McMurray boasts the lowest vacancy rate at 0.2 per cent, down from 3.5 per cent a year earlier. Tight vacancies led to an increase in average rent. The average two-bedroom apartment rent rose nine per cent in 2004 to \$1,242 per month. Wood Buffalo/Fort McMurray has retained its ranking as Canada's second most expensive urban centre in which to rent. The only urban centre with higher average two-bedroom rent was Yellowknife at \$1,282 per month.

The majority of Alberta cities surveyed reported an increase in average two-bedroom apartment rent. The only exception occurred in Red Deer where the

average rent decreased a modest \$1 per month.

Five cities – Camrose, Cold Lake, Grande Prairie, Medicine Hat and Wood Buffalo/Fort McMurray – reported average rent increases in excess of inflation. The remaining six* cities; Brooks, Calgary, Canmore, Edmonton, Lethbridge and Wetaskiwin, experienced an average rent increase below inflation.

Alberta's two Census Metropolitan Areas (CMAs), Calgary and Edmonton, saw their rental markets diverge somewhat. In Calgary, the vacancy rate and average two-bedroom rent were basically stable while Edmonton recorded increases in vacancies and rental rates.

In the Calgary CMA, the average two-bedroom apartment rent increased from \$804 per month in October 2003 to \$806 per month in October 2004. The minimal \$2 per month increase in rent, combined with generous rental incentives and a 909-unit reduction in the apartment rental universe, helped prevent a further escalation in vacancies. After climbing to the highest rate since 1994, Calgary's apartment vacancy rate slipped marginally from 4.4 per cent in 2003 to 4.3 per cent this year.

For the third consecutive year, apartment vacancies across the Edmonton CMA rose due to a combination of strong multi-family unit construction and high levels of first-

time home buying activity encouraged by low mortgage rates. The apartment vacancy rate in Metro Edmonton increased from 3.4 per cent in October 2003 to 5.3 per cent this October. Vacancies are now at the highest level since 1996. The rising supply of apartments slowed rent increases as landlords attempted to retain and attract renters. The average rent for a two-bedroom apartment inched upward by 1.1 per cent from last October to an average of \$730 per month.

*Due to the small universe size, average two-bedroom apartment rent is not available for Okotoks.

Canada Mortgage and Housing Corporation conducts the Rental Market Survey in apartment buildings with three or more units annually in October in all urban centres of 10,000 population or more. To obtain information on other communities, please call 1-877-722-CMHC.
