### Ontario Vacancies Move Higher

Despite a growing young renter aged population, Ontario's average vacancy rate rose for the fourth consecutive year, to the highest on record (since 1987). The province's vacancy rate jumped to 4.1 per cent in October 2004, up from 3.5 per cent a year ago. Vacancies grew for most bedroom types. Bachelor suites vacancies edged lower.

Vacancy rates were up in nine of the province's 11 Census Metropolitan Areas (CMAs). In Windsor, where rents are relatively high compared to the cost of ownership, the vacancy rate skyrocketed to the highest of the country's CMAs. St. Catharines-Niagara and Sudbury were exceptions. More favourable than usual migration and employment helped lower their vacancy rates.

Ontario's 1.2 per cent average annual rent increase was well below October's 2.3 per cent annual inflation rate. While the units with larger numbers of bedrooms had the higher average rent increases, even rents in units with three bedrooms or more did not keep up with the annual inflation rate. The average rent for two-bedroom units (the most popular bedroom type) rose by 1.4 per cent.

The drop in rental demand was mostly the result of renters buying homes in today's low mortgage rate environment and partly the result of less people moving to the province. First-time home buyers are more likely to purchase when borrowing costs are affordable. Mortgage rates, while up, are very low by historical standards.

Net migration to Ontario has come off its 2001 peak, reducing pressure on rental demand. New arrivals tend to initially rent. Latest available (at the time of writing this report) partial 2004 data suggests net migration (while still respectable) will be the lowest in three years.

Alex Medow, Ontario Regional Economist, Market Analysis Department, CMHC Ontario Business Centre. (416) 218-3344

## Mortgage Loan Insurance for Energy-Efficient Homes - Rental Properties

CMHC is proud to introduce mortgage loan insurance enhancements to support the development of energy-efficient housing.

On a two year pilot basis, CMHC will now provide eligible borrowers with a 10% refund on their mortgage loan insurance premiums when a rental residential property (such as an apartment, retirement or nursing home) is constructed to meet Natural Resources Canada (NRCan) energy standards or renovated using energy efficiency measures. These energy-efficient improvements will also be recognized in the value assessment of the project.

Discuss and arrange a CMHC insured mortgage with your financial institution.

## METHODOLOGY

Canada Mortgage and Housing Corporation (CMHC) conducts the **Rental Market Survey** (RMS) every year in October to estimate the relative strengths in the rental market. The survey is conducted on a sample basis in all urban areas with populations of 10 000 and more. The survey targets only structures with at least three rental units, which have been on the market for at least three months. The data collected for a structure depends on its initiation type (public or private), and whether it is an apartment or a row structure. The survey collects vacant unit data for all sampled structures. The market rent data are collected for only privately initiated structures. Most data contained in this publication refer to privately initiated apartment structures.

The survey is conducted by a combination of telephone interviews and site visits, and information is obtained from the owner, manager, or building superintendent. The survey is conducted during the first two weeks of October, and the results reflect market conditions at that time.

### Definitions

**Rent:** The rent refers to the actual amount tenants pay for their unit. No adjustments are made for the inclusion or exclusion of amenities and services such as heat, hydro, parking, and hot water. For available and vacant units, the rent is the rent being asked for by the owner for the unit.

**Rental Apartment Structure:** Any building containing three or more rental units, of which at least one unit is not ground oriented. Owner-occupied units are not included in the rental building unit count.

**Rental Row Structure:** Any building containing three or more rental units, all of which are ground oriented. Owner-occupied units are not included in the rental building unit count.

**Vacancy:** A unit is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

### Acknowledgement

The Rental Market Survey could not have been conducted without the cooperation of the rental property owners, managers and building superintendents throughout Canada. CMHC acknowledges their hard work and assistance in providing timely and accurate information. As a result of their contribution, CMHC is able to provide information that benefits the entire housing industry.

## October 2004 Rental Market Survey Reports

Get the latest results from Canada's most comprehensive survey of rental markets. Detailed reports with Tables, Analysis and Forecasts are prepared for most of Canada's metropolitan markets.

Vacancy rates and Availability rates  
Average rental rates by bedroom type
