*Government of Canada Services for You* offers practical information on health, the environment, finances, learning and living. At the end of each story, there is a phone number or a web site where you can go to find out more about what matters to you. You are only a telephone call, a visit or a few clicks of your mouse from using the programs and services that the Government of Canada has developed for you.

## Economic growth boosts demand for skills

Alberta has had the fastest growing economy in Canada for the past five years — and the momentum continues. In 2001, total employment growth will result in 43,000 new positions. The challenge now is to find skilled tradespeople to fill some of these positions. Skills Canada, with funding from the Government of Canada, brings together employers, educators, labour groups and government to make trade and technological careers a first choice for Canadian youth.

Competition is one way to encourage the pursuit of these exciting careers. The provincial and national Skills Competitions bring together

more than 1,000 youth prepared to demonstrate their skills while vying for top prize. Find out more about this and other initiatives:

<http://youth.gc.ca>

### Did you know?

Over 30 previous gold medal winners from past national competitions represented our country as “Team Canada” at the International Skills Competition in Seoul, South Korea, in September 2001.

## At work in Alberta

### Alberta unearths oil sands treasure

Larger than Saudi Arabia's reserves, Alberta's oil sands represent a vast source of energy and jobs for Canadians. Through the cooperative efforts of Natural Resources Canada, the oil sands industry, universities and the Government of Alberta, new technologies have been developed to improve the marketability of oil sands-derived crude oils. By 2010, it is projected that improved technologies will also help reduce sulphur oxide and carbon dioxide emissions to about half of previously recorded levels. Find out more about this and other initiatives:

 [www.nrcan.gc.ca](http://www.nrcan.gc.ca)

### Investing in our quality of life

Better water treatment and wastewater systems, upgraded parks and arenas, and affordable housing are all part of a new initiative aimed at improving Albertans' quality of life. The emphasis of the Canada-Alberta Infrastructure Program is on "green" projects, and other priorities include local transportation, roads and bridges, and cultural and recreational facilities. Working with municipalities and the province, the Government of Canada will

### Alberta leads in high-tech research

The study of genes and proteins by researchers at Genome Prairie and the Alberta Network for Proteomics Innovation is expected to revolutionize work in such areas as medicine, agriculture, forestry, the environment and industry. Support from Western Economic

Diversification is helping make Alberta a leader in biotechnology.

 [www.wd.gc.ca](http://www.wd.gc.ca)  
(Click on "Innovation")

### Welcome to the nano age

A blink is an eternity in the nano world; an eyelash, a mammoth structure. Nanotechnology, the science of building materials and machines ten thousand times smaller than a human hair, will change our world this century as dramatically as the computer did in the last century. Imagine a "nanocapsule" with medicine only for cancer cells, "nanotweezers" for individual molecules, or nanotubes for microelectronics. These are just some of the ways research at the National Research Council's Institute for Nanotechnology at the University of Alberta may change our lives.

 [www.nrc.ca/nanotech/home\\_e.html](http://www.nrc.ca/nanotech/home_e.html)

invest more than \$171 million over the next five years to upgrade infrastructures in communities across Alberta.

## Young Albertans get a jump on learning

Pre-schoolers of Aboriginal or First Nations descent are given an opportunity to start school with an eagerness to learn, based on skills they gain through the Aboriginal Head Start program. The program strengthens cultural traditions with the important contribution of Elders who offer traditional knowledge and language skills to teachers, children and parents. Over the last year, the program provided children and their families with the chance to participate in cultural events and

Fred Catroll & Associates

attend traditional language classes. Kindergarten teachers in the communities report that the program works. Children who have participated start school eager and ready to learn.

[www.hc-sc.gc.ca](http://www.hc-sc.gc.ca)  
(Click on “Children”, then on “Aboriginal Head Start”)

## Medicare reaches remote communities

One of the guiding principles of our medicare system is that Canadians in all parts of the country get the health care services they need. The Rural and Remote Health Innovations Initiative improves the health of rural Canadians by focussing on areas such as health promotion and

injury prevention. In Cochrane, this means support to single parents, seniors and teens in areas such as parenting and nutrition. In High River, it means help to develop an agriculture and home poison information kit.

[www.hc-sc.gc.ca/ruralhealth/funding.htm](http://www.hc-sc.gc.ca/ruralhealth/funding.htm)

## Diabetes research

Canadian researcher Sir Frederick Banting’s discovery of insulin in the 1920s meant people with diabetes could live into adulthood. Today, work by University of Alberta researcher Ray Rajotte is allowing people with diabetes to live without daily insulin injections. Support

from the Canadian Institutes of Health Research is making a difference in the quality of life of people living with diabetes everywhere. Find out more about this and other initiatives:

[www.cihr.ca](http://www.cihr.ca)

## A word on literacy

Our quality of life depends on our ability to read and write. In Canada, 48% of adults 16 years and over have trouble reading and writing.

Here in Alberta, the Centre for Family Literacy is committed to the development and promotion of innovative programs to help people improve their literacy skills. With strong government and community support, the Centre helps Canadian families develop the skills we all need to succeed.

### Did you know?

Alberta is home to the Canadian Council for Donation and Transplantation Secretariat. Almost 4,000 Canadians are waiting for organ transplants. Anyone at any age can be an organ and tissue donor. The oldest organ donor was over 90!

[www.organandtissue.ca](http://www.organandtissue.ca)

## Creating and sharing opportunity

# Canada

Canada's success in today's world — and our quality of life — depends on the contribution of all of us. The Government of Canada is committed to focussing on our shared priorities: a strong and innovative economy, children, health care, safe communities and a clean environment.

### Health care is a priority

Our quality of life depends on a strong health care system that helps us stay well and cares for us when we are ill. The Government of Canada is working with provinces and territories to meet the challenges of ensuring that Canadians have a top-quality health care system. There's also a lot each one of us can do to be healthy.

### Eat well, live well

Eating well and staying physically active are essential to good health, disease prevention and getting the most out of life. *Canada's Food Guide to Healthy Eating* offers practical guidelines you can use daily to make healthy food choices.

 **1 800 O-Canada**

*Canada's Physical Activity Guide to Healthy Active Living* is available to help all Canadians become more physically active.

### Get in the know

How safe is your cellular phone? Can you protect your family from food poisoning?

*It's Your Health* fact sheets provide you with practical tips and health

advice on a wide variety of important issues —

from safer drinking water to the proper use and storage of household cleaners.

 **www.hc-sc.gc.ca**

## Invest in children, invest in the future

One of the best ways to help our children is to start saving for their post-secondary education as soon as possible. The Canada Education Savings Grant is a special grant that is paid into a child's Registered Education Savings Plan (RESP). The Government of Canada will contribute an additional 20% on top of your annual RESP contributions to a maximum of \$400 a year until the child turns 17.

## Have you applied for the Canada Child Tax Benefit?

The Canada Child Tax Benefit is a tax-free monthly payment to help families with the cost of raising children under 18. To receive it, you must apply to the Canada Customs and Revenue Agency, and both spouses have to file income tax returns. Don't forget to tell us if you move so we can keep the payments coming, even if you use direct deposit.

## Fighting terrorism and acting to protect Canadians

As a result of the tragic events of September 11, 2001, the Government of Canada has undertaken further measures to fight terrorism and better protect Canadians. You may be affected. For example, if you plan to travel, you should be prepared for longer waits and more thorough security checks at airports and border points because officers are exercising extra vigilance. Other measures include new laws to fight terrorism, more funding for law enforcement and intelligence gathering, and working internationally and militarily with other governments. If you would like to know more:

- 📞 1 800 O-Canada
- 🌐 [canada.gc.ca](http://canada.gc.ca)

## Tax cuts for Canadians

The Government of Canada has introduced a \$100-billion five-year tax reduction plan — the largest tax cut in Canada's history.

In 2001 alone:

- A single-earner family of four with an income of \$40,000 is saving about \$1,100.

- A two-earner family of four earning \$60,000 is saving about \$1,000.

By the time the plan is fully in place in 2004, personal income taxes will be down by an average of 21%. Families with children will save even more — about 27% on average.

### How much money are you saving?

Find out using the online tax calculator.

 [www.fin.gc.ca](http://www.fin.gc.ca)  
(Click on "Taxes and Tariffs")

## Are you missing out on your GST/HST credit?

If you have a modest income, you can offset all or part of the Goods and Services Tax (GST) you pay. You can receive credit payments for GST or Harmonized Sales Tax (HST) for yourself, your spouse and your children, but first, you have to file a tax return, whether or not you have any income. Make sure you complete the GST/HST credit application section of the return.

 [www.ccra.gc.ca/benefits](http://www.ccra.gc.ca/benefits)

## Plan for your best years

Canada's Old Age Security program provides most seniors with a secure base of retirement income. It also provides additional benefits to eligible low-income pensioners and their spouses or common-law partners in the form of the Guaranteed Income Supplement and the Allowance. The Canada Pension Plan (CPP) pays a monthly retirement pension to people who have worked and contributed to the CPP. It also protects workers and their families against loss of income due to disability and death.

### Did you know?

- 2002 marks 75 years of public pensions in Canada.
- Canada's public pension system extends benefits and obligations to same-sex common-law partners.
- Your Canada Pension Plan and Old Age Security benefits are not started automatically. You must apply for them.

## Canadians click: our Internet advantage

By early 2001, more than one in two Canadians were using the Internet. We go online from our homes, our schools and libraries, and our workplaces. We talk to each other, we learn, we get information, and we buy goods and services — all at the click of a mouse. Through the Community Access Program, almost 10,000 sites across Canada get you online at no (or nominal) charge.

 **1 800 575-9200** to find the centre near you or visit  [cap.ic.gc.ca](http://cap.ic.gc.ca) (Click on "CAP communities")

## Smart consumers click to know

Shoppers can go online to get the information they need to make smart decisions. Find out what you need to know before you renovate your house, clear ice from your roof, plan an overseas vacation, or buy a car seat for your child.

 [www.consumerinformation.ca](http://www.consumerinformation.ca)

## Tips for shopping online

- Get detailed product information.
- Read and print out terms and conditions of sale.
- Make sure the merchant has a secure transaction system to protect your personal and financial information.

This is just some of the advice available for cybershoppers in *Shopping on the Internet: Get Informed*.
