

**HEALTHY ENVIRONMENTS AND CONSUMER SAFETY BRANCH
INDUSTRIAL HEMP REGULATIONS
LIST OF APPROVED CULTIVARS
FOR THE 2006 GROWING SEASON
Cannabis sativa L.**

Pursuant to Subsection 39(1) of the *Industrial Hemp Regulations*, the following industrial hemp varieties are approved for commercial cultivation under licence for the year 2006. The list may contain variety names that are synonyms for the same variety.

VARIETY	COUNTRY WHERE MAINTAINED	Exempt from THC testing under subsection 16(1) of the <i>Industrial Hemp Regulations</i>*
<i>Alyssa</i>	Canada	No
<i>Anka</i>	Canada	No
<i>Carmagnola</i>	Italy	No
<i>Carmen</i>	Canada	No
<i>Crag</i>	Canada	No
<i>C S</i>	Italy	No
<i>Deni</i>	Canada	No
<i>ESTA-1</i>	Canada	No
<i>Fasamo</i>	Germany	No
<i>Fedrina 74</i>	France	No
<i>Felina 34</i>	France	No
<i>Ferimon</i>	France	No
<i>Fibranova</i>	Italy	No
<i>Fibriko</i>	Hungary	No
<i>Fibrimon 24</i>	France	No
<i>Fibrimon 56</i>	France	No
<i>Finola</i>**	Canada (Finland)	No
<i>Kompolti</i>	Hungary	No

LIST OF APPROVED CULTIVARS - 2006

INDUSTRIAL HEMP REGULATIONS

VARIETY	COUNTRY WHERE MAINTAINED	Exempt from THC testing under subsection 16(1) of the <i>Industrial Hemp Regulations</i>*
<i>Kompolti Hibrid TC</i>	Hungary	No
<i>Kompolti Sargaszaru</i>	Hungary	No
<i>Lovrin 110</i>	Romania	No
<i>UC-RGM</i>	Canada	No
<i>Uniko B</i>	Hungary	No
<i>USO 14</i>	Canada (Ukraine)	Yes****
<i>USO 31</i>	Canada (Ukraine)	Yes***
<i>Zolotonosha 11</i>	Canada (Ukraine)	No
<i>Zolotonosha 15</i>	Canada (Ukraine)	No

* Samples may still be taken by inspectors designated under the CDSA for routine variety monitoring.

** Denotes variety under observation.

*** Denotes the variety is exempt from annual THC testing in all regions of Canada.

**** Denotes the variety is exempt from annual THC testing in the province of Manitoba only.

Amendments to the List of Approved Cultivars for 2006:

Additions: One new variety, UC-RGM was added to the list this year.

Deletions: No varieties were deleted from the list this year.

Observation: The variety *Finola*, remains under observation, and will be re-evaluated next year. Sampling and monitoring of production, as well as, a thorough verification of eligible parent seed planted will continue in 2006.

Please Note:

Subsection 14(3) of the *Industrial Hemp Regulations* (IHR) requires that all seed planted for the production of industrial hemp in Canada must be of pedigreed status (Certified or better). This means that seed cannot be imported directly from countries that are not recognized by one of the Seed Certification Schemes of which Canada is a member. Canada is a member of two schemes, the Organization for Economic Cooperation and Development Seed Scheme (OECD) and that administered by the Association of Official Seed Certifying Agencies (AOSCA). Farmer-saved seed cannot be planted, unless it is Certified seed. Official seed tags will be requested by an inspector as evidence of compliance.

Under Subsection 16(1) of the IHR, a person who holds a licence to cultivate industrial hemp is required by law to have their crop sampled by an authorized Crop Sampler, unless the variety is specifically exempted from this testing. Sampling by a designated inspector does not exempt a licence holder from this testing. The sample taken by the authorized Crop Sampler must be tested by a competent laboratory, licensed for testing industrial hemp. A list of licensed laboratories is available on our website. Test results must be reported to the Office of Controlled Substances, at the address below.

Two varieties, USO 14 and USO 31 have been exempted from annual testing as required under paragraph 16(1) of the IHR. **The variety USO 14 is only exempt in the province of Manitoba.** These varieties have been evaluated against the *Policy on the Exemption of Industrial Hemp Varieties from THC Testing During the Growing Season*. A copy of this policy can be found on our website.

The Office of Controlled Substances must be informed immediately in writing in the event of crop failure where samples cannot be drawn for testing.

If test results exceed the 0.3% limit for THC, the crop may be subject to immediate harvest. Stalks from plants harvested under these conditions may still be used for fibre. Varieties which are found to exceed 0.3% THC consistently may be removed from the *List of Approved Cultivars*.

At this time, the *List of Approved Cultivars* applies to all regions of Canada.

Questions regarding the *List of Approved Cultivars - 2006* may be submitted to:

Results of THC Testing for 2005: All Varieties

Variety Name	Number of Samples	THC range (%)	Average	Number of samples over 0.3%	% of total	Comments
<i>Alyssa</i>	12	0.05 - 0.2	0.1025	-		
<i>Anka</i>	1	n/a	0.05	-		
<i>Carmen</i>	2	0.0354 - 0.04	0.0377	-		
<i>Crag</i>	43	0.01 - 0.15	0.0623	-		
<i>ESTA-1</i>	6	0.08 - 0.13	0.118	-		
<i>Fasamo</i>	1	n/a	0.12	-		
<i>Felina 34</i>	5	0.08 - 0.24	0.16	-		
<i>Finola</i>	130	0.0302 - 0.52	0.1496	7	5.6	
<i>USO 14</i>	7	0.01 - 0.06	0.0214	-		
<i>USO 31</i>	3	0.01 - 0.02	0.0133	-		
<i>Zolotonosha 11</i>	2	0.01 - 0.05	0.03	-		

Results as of February 1, 2006 as reported to the Office of Controlled Substances.
