

User Requested Minor Use Label Expansion Program Registrations for October 1, 2001 – March 31, 2002

The User Requested Minor Use Label Expansion (URMULE) Update provides timely information on the latest proposals for minor use label expansion of pesticides that have been evaluated and accepted for registration.

For the following pesticides, a Certificate of Registration has been issued based on a Supplemental Label, making the use legal. Registrants are required to add the new use to the full product label at the next printing. Provincial authorities, in publishing recommendations on the use of agricultural chemicals, may incorporate such acceptable uses in the knowledge that they meet the requirements of the *Pest Control Products Act*. Users must consult the product label as the ultimate authority on whether or not the product can be used to control a specific pest on a specific site, as a product's uses are subject to change.

NOTE: The URMULE Updates are available on the Pest Management Regulatory Agency's Internet site, address provided below. If Internet access is not available, arrangements can be made to receive this publication via facsimile or electronic mail. Please contact the Publications Coordinator at the location provided below.

Field Crops

MRL¹

Dicamba (Banvel II—BASF),
registration number 23957, as a tank mix
with Accent for weed control in field corn
in the Prairie Provinces.

dicamba 0.1 ppm
nicosulfuron 0.1 ppm

Imazamox + Imazethapyr (Odyssey—BASF),
registration number 25111, for weed control on
seedling and established alfalfa grown for seed
production.

n/a

Imidacloprid (Gaucho 480FL—Gustafson),
registration number 26124, as a seed treatment
for the control of wireworms and corn flea beetle
in field corn for seed production and sweet corn.

0.1 ppm

Fruit

Tebufenozide (Confirm 240F—Rohm&Haas),
registration number 24503, for the control of listed
leafrollers on pears in British Columbia only.

proposed 1 ppm²

s-metolachlor (Dual Magnum—Novartis),
registration number 25728, for weed control in
strawberries in the year of planting.

n/a

Oxyfluorfen (Goal 2XL—Rohm&Haas),
registration number 24913, for weed control in
dormant strawberries.

n/a

Vegetables

Permethrin (Ambush 500EC—Syngenta),
registration number 14882, for the control of
listed insects on wasabi.

proposed 0.5 ppm³

Metalaxyl-m (Apron XLS—Novartis),
registration number 25585, for the control of Pythium
damping off on onion seeds (dry bulb and bunching).

dry onions 3 ppm
green onions 10 ppm

Imidacloprid (merit 60WP—Bayer),
registration number 25636, for the reduction of
pre-harvest intervals on greenhouse tomatoes. 1 ppm

Carbathiin + thiabendazole (Crown—Crompton),
registration number 23430, for the control of
seed-borne *Ascochyta rabei* on chickpeas. carbathiin 0.1 ppm
thiabendazol 0.1 ppm

Other

Pyrethroid insecticide (Ectiban25—Schering-Plough),
registration number 15701, for the control of Rocky Mountain
wood tick on beef cattle. 0.1 ppm

Fluoxypyr + 2,4 D ester (AttainA + Attain B—DowAgroSciences),
registration numbers 24834 + 24833, for weed control in
seedling and established tall fescue grown for seed production. n/a

Footnotes

- ¹ Maximum residue limits (MRLs) have been added to this document for the user's information and convenience. Under the *Food and Drugs Act*, it is prohibited to sell food containing residues of pest control products at a level greater than 0.1 ppm unless a higher MRL has been established in Table II, Division 15, of the Food and Drug Regulations, or an Interim Marketing Authorization (IMA) has been issued. In case of discrepancy between this document and the Food and Drug Regulations, information in the latter will prevail. For more information on MRLs and IMAs, please refer to PMRA Regulatory Directive DIR2001-01, *User Requested Minor Use Label Expansion*, Sections 4.2 and 5 (step 5), or under *Maximum Residue Limits for Pesticides* on the PMRA Internet at <http://www.hc-sc.gc.ca/pmra-arla/english/legis/maxres-e.html>.
- ² An IMA was issued February 9, 2002, to permit the sale of pears containing residues of tebufenozide up to 1 ppm while the regulatory process to amend the Food and Drug Regulations is completed.
- ³ A request for an IMA is being processed to permit the sale of food containing residues of the active ingredient up to the proposed MRL listed above while the regulatory process to amend the Food and Drug Regulations is completed
