Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- P preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the Statistics Act
- E use with caution
- F too unreliable to be published

Note to readers

*The national balance sheet accounts are statements of the balance sheets of all of the various sectors of the economy. They consist of the non-financial assets owned in the various sectors of the economy and of financial claims outstanding. **National wealth** is the sum of non-financial assets — produced assets, land surrounding structures and agricultural land — in all sectors of the economy. **National net worth** is wealth less net foreign liabilities (i.e., what is owed to non-residents less what non-residents owe to Canadians). Alternatively, it is the sum of the net worth of persons, corporations and governments.*

Quarterly series run from the first quarter of 1990. Market value estimates have been available since June 2004. For more information, consult Balance sheet estimates at market value (www.stacan.ca/english/freepub/13-605-XIE/2003001/conceptual/2004marketvalue.htm).

National balance sheet accounts - highlights

Third quarter 2005

Growth in national net worth slows

National net worth reached \$4.4 trillion by the end of the third quarter, or \$135,500 per capita. The gain in net worth resulted from an increase in national wealth (economy-wide non-financial assets), which was largely offset by an increase in net foreign debt. As a result, growth in national net worth slowed to 0.7% in the third quarter, less than half the pace set in the second quarter and down from its average (+1.5%) over the past ten quarters.

Growth in national net worth slows

The strong performance of the economy in the third quarter was reflected in the continuing advance in national wealth (+1.3%). While residential real estate continued to be a main contributor to growth in national wealth, increases in machinery and equipment and non-residential structures were significant contributors in this quarter as well.

Canadians' net indebtedness to non-residents (the amounts owing to non-residents less foreign assets held by Canadians) increased in the third quarter, following three quarters of decline. Canadian liabilities to non-residents rose, driven by strong inward investment flows as well as appreciation of marketable shares held by foreigners. However, these gains were partly offset by declines in foreign holdings of Canadian debt securities. Canadian assets abroad grew very modestly, as foreign equity holdings were affected by the significant appreciation of the Canadian dollar against the U.S. dollar during the quarter and also reflected relatively weaker stock markets in the U.S.

Household net worth gains continue to be driven by equities and residential real estate

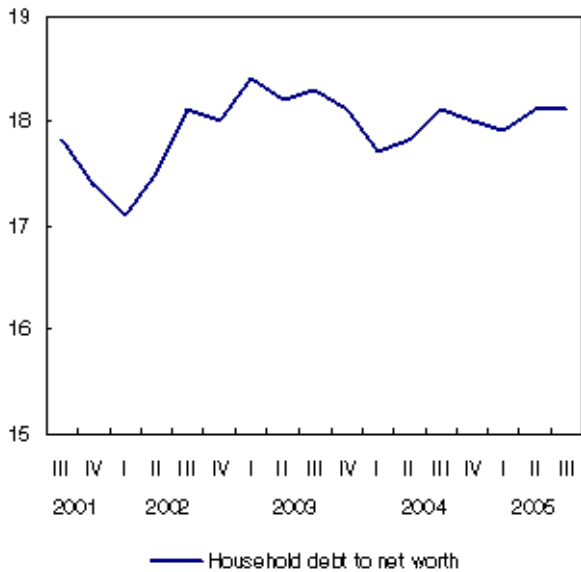

The personal saving rate was below zero in the quarter as it was during the previous two quarters. Even though saving was negative, household net worth accelerated (+2.3%) for the third consecutive quarter.

Gains in the market value of equities were the largest contributor to the change in household net worth. Stock market advances in Canada boosted the value of personal sector share holdings, investment fund units and pension assets. These gains were moderated somewhat by the impact of appreciation of the Canadian dollar on the holdings of U.S. dollar-denominated securities held by pension funds and other institutional investors. Gains in the value of residential real estate, driven by housing prices, continued to make a significant contribution to the change in household net worth. Increases in household assets, however, were partially offset by higher liabilities.

Households' appetite for consumer and mortgage debt continued, supported by sustained low interest rates. The growth in total household debt continued to outpace that of personal disposable income. This resulted in a debt-to-income ratio of 108.0 percent in the third quarter, up from 107.8 percent in the second quarter. Canadian households carry about \$1.08 in debt for every dollar of their disposable income. However, given the strong growth in household net worth, the ratio of household debt to net worth remained flat at 18.1% in the quarter.

Household leverage remains flat

As a % of net worth, not seasonally adjusted

Corporate debt-to-equity edges down

Corporations continued to generate more funds from internal operations than they required for financing their non-financial capital acquisition. As a result of this profit-driven string of surpluses, the corporate sector has been a net lender to the rest of the economy and has also used these funds to restructure their balance sheets, largely through paying down debt.

For non-financial private corporations, the ratio of debt-to-equity (at book value) edged down in the quarter extending its long-term trend. This was driven largely by further strength in undistributed profits coupled with a downward revaluation of U.S. dollar-denominated bond liabilities.

Corporate leverage continues to ease

As a % of equity, not seasonally adjusted

**Government debt-to-GDP at 20-year low**

Government net debt (total liabilities less total financial assets) edged down as the government sector registered another surplus in the third quarter. Net government debt as a percentage of GDP declined further, reaching 20-year lows where net debt stands at roughly half of GDP.
