Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Note

Due to rounding of data, the tables may not add to the sum of their components.

Introduction

This document presents the geographical distribution of Federal Government expenditures on science and technology (S&T). The statistics presented in this report are supplements of data published in the Service Bulletin "Science Statistics" Vol. 29, No. 1, Catalogue 88-001XIE. S&T expenditures can be divided into research and development (R&D) and related scientific activities (RSA) expenditures. In this document, there are two other divisions which can be applied to any expenditure. They are science type and intramural versus extramural expenditures.

The terms "natural sciences" and "social sciences" are to be regarded as synonymous with "natural sciences and engineering" and "social sciences and humanities" respectively.

Included in this report are tables presenting expenditures and staff of federal government scientific establishments for the fiscal year 2002-2003.

In 2002-2003, the federal government spent a total of \$8,0 billion on S&T. Of this amount, \$4,7 billion, or 64%, was spent in the provinces and territories. The rest consists of categories of expenditures which are not distributed geographically. They are the following:

- All federal expenditures in the National Capital Region (NCR) for the performance of S&T in federal institutions (intramural S&T), whose expenditures were \$2,608 million;
- All payments abroad for S&T of \$284 million; and
- Various other categories of federal expenditures which could not be assigned geographically, amounting to \$408 million.

Expenditures and personnel for S&T performed by the federal government in the National Capital Region (NCR) are excluded from the provincial totals and are reported separately. The NCR is, in effect, treated as a separate entity, however, these data distributed geographically, are presented.

Estimates of S&T activities by region may be easily misunderstood. For example, the financial data are identified with the region of the physical location of an S&T unit. It would be wrong to assume all of the expenditures of a unit are spent in the region of location. Supplies and equipment can be purchased from other regions or countries. Furthermore, in cases such as the National Capital Region, labour moves freely between the two provinces so that even wages and salaries paid by a unit are partly spent outside the area of location.

We are grateful to the departments and agencies who completed our questionnaires. Without their co-operation a provincial representation such as this could not be prepared.

This report was prepared by **Gisèle Bellefeuille** under the direction of **Lloyd Lizotte**, Subject Matter Manager, Science Innovation and Electronic Information Division.

Note of appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Standard of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136.

How to obtain more information

For information on the wide range of data available from Statistics Canada, you can contact us by calling one of our toll-free numbers. You can also contact us by e-mail or by visiting our website.
