## **OSH References** – featuring **OSHLINE™** with **NIOSHTIC®**

**Complete, current, diverse and reliable, OSHLINE with NIOSHTIC helps you stay on top of health and safety literature!**

OSHLINE provides continued, authoritative coverage to keep you current, following the discontinuation of updates to NIOSHTIC. Containing over 10,000 records, approximately 1,000 new references are added to OSHLINE every three months. NIOSHTIC, the highly respected bibliographic database produced by NIOSH, contains over 100 years of published literature from the field of occupational health and safety and related fields including:

- Difficult to obtain toxicology studies from before 1960
- Diverse subject coverage
- Detailed summaries which are informative and useful
- Thousands of case reports on actual exposures

### **OSH References also includes:**

#### **CISILO**

a bilingual, bibliographic database, with references to international occupational health and safety literature, is produced by International Occupational Safety and Health Information Centre/Centre international d'informations de sécurité et d'hygiène du travail (CIS) in Geneva. CIS scans more than 400 journals annually on basic safety and health topics. Use it as your gateway into international health and safety literature!

#### **HSELINE**

is produced by HSE Information Service (UK) and provides you with excellent coverage – more than 200,000 citations with abstracts to worldwide literature on occupational safety and health! This database contains practical, safety-oriented materials, including all UK Health and Safety Commission and Health and Safety Executive publication – An invaluable source of periodicals, books, conference proceedings, reports, and legislation.

#### **CANADIANA**

produced by CCOHS, offers you references to occupational health and safety documents published in Canada, regarding Canadian subjects, or by Canadian authors. It includes references on reports, articles, conference proceedings, monographs and unpublished or limited distribution materials. The database also includes selected TOXLINE® records. References are described in either English or French.

**PLUS The French Chercheur SST collection** includes the CISILO (français) and INRS' Bibliographie database.
