INTRODUCTION

In July 2001, Health Canada invited Canadian voluntary not-for-profit organizations and educational institutions to submit National Proposals that applied the population health approach for one or more of the three life stages:

- Childhood and Adolescence
- Early to Mid-Adulthood
- Later Life

For complete information regarding the Request for National Proposals refer to:

<http://www.hc-sc.gc.ca/hppb/phdd/funding/index.html>

The Population Health Fund Section received and considered 109 proposals and 36 were approved by the Minister of Health and subsequently received funding. The Team of Population Health Fund invites you to consult the book of abstracts.

Early Childhood Vision Loss and Its Impact on Development: A Sourcebook for
Professionals

929 Bayview Avenue
Toronto, Ontario
M4G 3E8

Tel: (416) 480-7209
Fax: (416) 480-7453
www.cnib.ca

Amount: \$200,000.00
Duration: 22 months

This project will provide information to care providers and professionals of blind, visually impaired and deaf-blind children by developing a health source book. The purpose of this source book is to educate health professionals about the specific needs of children with visual disabilities, especially in regard to the numerous other developmental areas that are equally affected by vision. The book will include assessment and teaching strategies to accommodate the visually disabled. A compendium of Canadian resources will assist health care professionals to support families.

The supporters of this project include the Hospital for Sick Children, Ophthalmology Department, the Canadian Institute of Child Health, the Waskana Rehabilitation Centre, Regina, and divisional/district (CNIB) offices (Manitoba Division, Thunder Bay District, London District).

Healthy Start For Life - Promoting Healthy Eating And Lifestyle During The Toddler And Preschool Years

This project will develop resources promoting healthy eating and active living among toddlers and preschoolers. These resources will be targeted to parents, child-care workers and health intermediaries and will be widely promoted on the website of Dietitians of Canada (DC). This project will also develop a web-based workshop using these resources. Partners include: Canadian Child Care Federation, Canadian Institute of Child Health, Canadian Paediatric Society, DC Paediatric Nutrition Network, Department of Foods & Nutrition, NutriStep Project, Ontario Public Health Association Nutrition Resource Centre, Canadian Society of Exercise Physiologists, Dairy Farmers of Ontario, and YMCA. Expected outcomes include increasing parents' and daycare providers' knowledge of the nutrition and physical activity needs of preschoolers and increased use of activities that promote positive attitudes toward healthy eating and active living. Over time, the development of healthier eating and activity practices during the preschool years will reduce the risk of developing nutrition related problems including: heart disease, cancer, obesity, and type 2 diabetes.

The Baby F&ST Project

This project will adapt a healthy child development model Family and Schools Together (F&ST) which currently targets children aged 4-12, for use by teen mothers and their infants up to three years of age. The major objectives of this project are:

- to implement the Baby F&ST model in 3 communities in year 1;
- to translate the model into French;
- to evaluate the test sites and refine the model;
- to implement the model in 4 communities in Year 2; and
- to promote the model;

Media Pulse

The major objectives of this project are:

- to raise awareness among paediatricians, family doctors and other health professionals of the influence of media on the health and well-being of children and adolescents;
- to encourage the incorporation of media awareness in their practices and to advocate for media management in the home.

The project involves the following activities: develop a guide for health practitioners; develop a special themed issue of *Paediatrics and Child Health*; develop an educational presentation package; develop media history tools; and establish a section on Media Awareness Network website for health practitioners. Partners include the Canadian Paediatric Society and other professional organizations.

Durée : 22 moisLes adolescentes francophones et leur santé

This project aims to develop a practical guide to the health-related attitudes and perceptions of teenage girls raised in a minority Francophone environment and to implement a national awareness strategy targeting Francophone youth, their parents and their high-school teachers. Research will help uncover how the determining factors (peers, parents, teachers, television, school, etc.) influence the health perceptions and behaviour of teenage girls and will lead to approaches aimed at helping them take responsibility for their health. The main components of this project are as follows: create an advisory committee representing teenage girls; establish a sample group based on a list of teenage girls in Grade 9 living in five Francophone minority communities (both urban and rural); conduct approximately 200 interviews by telephone and in person, either individually or in groups; submit a research report; draft and produce an awareness guide based on an analysis of the data collected; validate and present the guide; hold consultations on the approaches and the creation of a strategic plan to raise awareness; train 20 teachers who will act as multiplying agents on how to use the guide; implement an awareness campaign aimed at teenage girls in Grade 9 in the 5 targeted schools; work closely with project partners who will help the members of the Réseau national d'action éducation femmes to validate and distribute the guide and promote it through their community network.

Phase two (2) of the Youth Net/Réseau Ado Satellite Program

This project builds on Phase I which helped communities develop youth mental health promotion satellite programs using the YN/RA model.

Phase 2 will focus on three areas of activity:

- building the capacity of communities (including Francophone and rural) across Canada to provide ongoing YN/RA facilitator training and focus group delivery;
- supporting the development, dissemination and evaluation of by-youth-for-youth mental health promotion initiatives;
- increasing the knowledge base for program and policy development in the area of youth mental health.

The establishment of each satellite consists of two important components: community building and fostering community partnerships with local organizations such as YMCA, local school boards, civic governments, CLSCs, hospitals and local suicide prevention centres. National partners include: the Canadian Mental Health Association (both national and local chapters), the Centre of Excellence for Youth Engagement, and the Canadian Association for Suicide Prevention.

Increasing the Capacity of Parent Educators to Support Families

The Canadian Association of Family Resource Programs (FRP Canada) promotes the well-being of families by providing national leadership, consultation and resources.

The co-sponsoring organization is Family Service Canada (FSC). They provide support and services to family-serving, locally based organizations and families.

The project is to support parents and others who care for children in Canada by increasing the capacity of parent educators. Key activities include: conducting a parent-targeted survey about the level of usefulness of parent education; conducting a parent educator-targeted survey about their skills and the level of usefulness of available resources and programs; preparing a parent educator handbook and bulletin regarding quality practices; and developing parent education workshops on the content and issues outlined in the handbook, with focus on skill building.

This community mobilization pilot project is a youth-led initiative that aims to help young people (aged 12-19) recognize and manage the risks in their lives. It involves recruiting and training Youth Ambassadors to do risk education in their communities and it will provide youth with an opportunity to demonstrate community leadership and citizenship.

Several sites will be selected for the pilots, covering diverse populations in various regions of Canada. Ford Motor Company of Canada is also contributing to this initiative.

Early Psychosis Intervention: From Awareness to Action

This project will promote the mental health of adolescents and young adults by encouraging action on early psychosis intervention across Canada. The project proposes to engage key stakeholders to move the practice of early psychosis intervention strategies forward by:

- building a Canada-wide vision of early psychosis policy and practice;
- strengthening affected families and their support networks

The Canadian Mental Health Association will be engaging target populations in capacity building process. Partnering organizations include: Canadian Psychiatric Association, Schizophrenia Society of Canada, National Network for Mental Health and Youth Net.

This project addresses the lack of participatory researchers in the area of adolescent health, and the need to train more researchers in this field. The goal of this project is to foster healthy adolescent development by engaging youth in participatory research and policy action that focuses on creating safe, supportive and violence-free physical and social environments. The partners on this project include the Centre of Excellence for Youth Engagement, the WHO Health Behaviour in School-Aged Children Network, and the Canadian Adolescents At-Risk Research Network.

Supportive School Environments: A Dissemination Project

This project will address the lack of a systematic approach to communicating and working with the front-line workers and volunteers who are involved in schools. Through the use of different modes of communication (ads in journals/newsletters, displays at conferences, posting on email lists, links from web site) this project will establish a communications system that reaches school-based or school linked front-line workers and volunteers with a consistent message about available educational resources and practical program advice on six selected topics. Project outcomes include greater better targeted, and more frequent exposure to educational, planning and policy resources. The partners on this project are the Canadian Association of Health, Physical Education, Recreation and Dance; the Canadian Association for School Health, the Canadian Counselling Association; the Canadian Home Economics Association; the Canadian Association of School Psychologists; the Canadian Teachers Federation; the Canadian Association of Student Activity Advisors; the Canadian Home and School Federation; Peer Resources Inc.; the Canadian School Boards Association; the Canadian Association of School Administrators; and the Canadian School Library Association.

Implementation and Evaluation of the Baby-Friendly Initiative in Health Services

This purpose of this project is to implement and evaluate the Baby-Friendly Initiative (BFI) in community health services in Canada. The Baby Friendly Initiative (BFI) is an international program developed by WHO/UNICEF to promote and support breastfeeding as a strategy to improve the health and well-being of children and families. The partners in this project include: the Provincial and Territorial Baby-Friendly Initiative (BFI) committees, and/or coordinators designated by provincial and territorial governments.

The committees are comprised of health professionals, representatives from health care agencies, provincial/territorial government representatives, Canada Prenatal Nutrition Program (CPNP), La Leche League Canada, consumers, and individual breastfeeding experts.

Allergy/Asthma Information Association's Initiative to Improve the Management of
Allergies, Asthma, and Anaphylaxis Throughout Canada

The goal of this project is to create a safer environment for children with asthma, allergy, and anaphylaxis. The project aims to provide consistent, medically correct information regarding children with asthma, allergies, and anaphylaxis, and give training to those who are in contact with children in schools, day cares, recreational facilities, other public places on procedures to prevent and manage asthma; and to respond appropriately to emergency situations. The AAIA, which works in partnership with the Canadian Society of Allergy and Clinical Immunology, will work in conjunction with other groups in delivering this project including school nurses, schools, recreation and park departments, and other groups that work directly with children.

Building Community Capacity in the Development of Healthy Public Policy and
Programming for Youth: A School-Based, Youth Empowerment Approach

This project is a partnership initiative between the Canadian Association for Health, Physical Education, Recreation and Dance (CAHPERD); and the Canadian Association for School Health (CASH) to increase school community capacity to engage young people in evidence-based school health program and policy development. The project will provide promotion, presentations, workshops and administrative support in the implementation of Health Canada's Voices & Choices: Planning for School Health. Voices & Choices is a practical, do-it-yourself, on-line, strategic planning tool for school communities to engage students in identifying their health and school-related needs, and to develop and implement strategies to address these needs. It includes a Guide to Implementation, a quantitative Student Needs Assessment Questionnaire and a School Health Profile by which students' responses to the questionnaire are reported back to the school community. Voices & Choices is aimed at fostering healthier students in a safe, caring and effective learning environment. It is appropriate for students in Grade 6 to secondary school graduation; and has been tested in schools at the intermediate and secondary levels.

Project Title and Description

The Development of a National Healthy Workplace Coalition

The National Quality Institute (NQI) is establishing a national Healthy Workplace Coalition composed of organizations from the public, private and not-for-profit sectors across Canada. The Coalition membership would assist the NQI to advance the healthy workplace movement and to increase awareness of the benefits of a comprehensive approach to workplace health. Two projects to be conducted in 2003 are:

- A Guide to Comprehensive Workplace Health Promotion will develop and pilot a comprehensive reference guide and "roadmap" of existing tools and programs;
- Healthy Workplace Curriculum will develop a comprehensive healthy workplace module for inclusion in the post-secondary business program curricula

The 18 radio stations that are members of the Alliance des radios communautaires du Canada, as well as their national satellite network RFA (Le Réseau francophone d'Amérique), will produce a total of forty 40 hours of broadcasting on the topic of adult health. For the most part, this series of broadcasts will be produced in 18 Francophone and Acadian communities across the country 36 hours, while the remaining 4 hours will be produced in RFA studios in Ottawa. These broadcasts will bring together various regional, provincial and local representatives working in the health field as well as production crews from community radio stations and RFA.

This series of broadcasts will launch public consultations leading to debates aired by the 18 radio stations serving 400,000 listeners located in 6 provinces and 2 territories. The objective is to increase the awareness of the population in these regions concerning issues relating to adult health. Local residents will also be able to raise health issues with the members of a round table gathered in the studio.

CLANS Connecting Local and National Strategies

This project will develop, implement and evaluate a comprehensive, community-based, sustainable strategic plan to enhance prevention, early detection and control of major risk factors leading to cardiovascular disease.

The Calgary Cardiovascular Network includes representatives of health and education professionals, the government, the community, volunteer agencies, commodity groups and retailers. The following agencies are participating as partners: Alberta Health, Alberta College of Pharmacists, Calgary Health Region, University of Calgary, City of Calgary, Calgary Fire Department, Heart and Stroke Foundation of Canada, Statistics Canada and Health Canada.

The Canadian National Institute for the Blind is sponsoring the Circles of Light Project to suggest culturally appropriate models for a long-term sustainable partnership between its branches, Aboriginal communities and existing health care networks. The Circles of Light Project will use participatory action research to study the issues, needs and wishes of Aboriginal community members and their existing health care providers regarding eye health. The project will produce a culturally relevant framework for providing future services for Aboriginal communities.

This project proposes to contribute to the promotion of health and productivity in the workplace by focussing attention on the importance of fairness in labour relations as a determinant of mental and physical health in the workplace. Project objectives are to develop, evaluate, disseminate a model for enhancing fairness and present the project results as a manual.

For this project the Centre for Addiction and Mental (CAMH) will partner with the National Quality Institute (NQI), B.C. Hydro, and Human Resources Development Canada.

Regional Seminars on Workplace Health

This project will promote the value of workplace health, safety and wellness initiatives in Canadian workplaces. The Canadian Labour and Business Centre will organize three (3) regional seminars (British Columbia, Atlantic, and Ontario) which will feature workplace health case-study presentations from workplaces that are considered to be leaders in the safety, health and wellness field. Other funding partners include the British Columbia Workers Compensation Board and the Labour Management Partnerships Program of Human Resources Development Canada. (HRDC).

Further to “Stepping Toward Health and Success in Your Farm Business”, this project will evaluate the effectiveness and use of the tool by farmers in Canada. The goal of this project is to update the guide, to promote use and develop a new promotional strategies to increase the use of the resource.

The Coalition for Agricultural Safety and Rural Health is a registered non-profit coalition of farm organizations, preventive agencies, research groups, and farmers from across Canada who together address rural health issues, illness, injuries, and accidental deaths among farmers, their families and agricultural workers. Liaisons include Agriculture and Agri-Food Canada and Health Canada's Office of Rural Health. Each provincial Department of Agriculture has a representative who acts in an advisory capacity to the Board. Industry continues to be an important partner, including companies from the farm machinery, and farm safety sector, 3M, Pioneer Hi-Bred, and Farm Credit Corporation.

National Post Polio Network

The Ontario March of Dimes (OMOD) is a provincial association with a mandate to assist physically disabled adults to lead a meaningful and dignified life by building on existing abilities, promoting choice, community integration and self-sufficiency. OMOD, and its partners in the provincial representatives from the Post Polio Associations across Canada and representative consultants from nine named medical and social disciplines, propose to create the National Post Polio Network (NPPN).

This project helps individuals suffering from post polio-related problems. The Ontario March of Dimes proposes the formation and coordination of National Post Polio Network and the development of a national registry.

The project objectives are:

- to increase awareness of the late effects of polio and post polio syndrome.
- to build a national registry of polio survivor
- to develop a national education program for health care professionals and bilingual educational packages.
- to provide advice and assistance to individuals, as well as, to current provincial support groups & associations.

Screening and Managing Medication Problems In Isolated, Independent-Living Seniors

The Canadian Pharmacists Association (CPA) is a professional association providing leadership to pharmacists in all areas of practice. For this project CPA will partner with two key stakeholders: the Canadian Association for Community Care (CACC) and the Canadian Association for the Fifty-Plus (CAF5P).

The overall aim of this project is to reduce medication related illness in the independent-living elderly who receive minimal assistance from a family caregiver. This will be done through the identification of barriers and facilitators to the involvement of home support workers in assisting seniors with medication management, and development of training programme and tools to assist home support workers and seniors with medication management. The second objective is to stimulate a policy discussion related to the roles and practice on non-regulated homecare providers.

This will be accomplished through the development and sharing of a situational analysis of non-regulated homecare providers across Canada.

Stepping In: Long-term Care Collaborative Falls Prevention Project

The Adult Injury Management Network (AIMNet) at the University of Victoria has an established track record in the area of falls and fall-related injury prevention among older people. Project partners include the British Columbia Injury Research and Prevention Unit at the Centre for Community Health & Health Evaluation Research at the Children's & Women's Health Centre of British Columbia, the Institute on Health of the Elderly, University of Ottawa, and the School of Nutrition & Dietetics at Acadia University.

This multi disciplinary project is to reduce falls and fall-related injuries among residents of long-term care facilities in several pilot sites across Canada. The project will address the determinants of health that put residents of care facilities at greatest risk of sustaining a fall and related injuries. The proposed outcomes of the project will include a standardized falls report form, a literature review of best practices in falls prevention in facilities and a Falls Prevention Booklet containing educational materials and guidelines for falls assessment and prevention for residents of Long Term Care Facilities.

Seniors Health: Strengthening Capacity for Physical and Social Well-Being

The Victorian Order of Nurses (VON) Canada will partner with Canadian Centre for Activity and Aging, a research centre which investigates the relationship of physical activity and aging, and develops strategies to promote the independence of older adults.

This project will create the organizational capacity to provide VON branches with the knowledge base, organizational support and best practices template to deliver a professionally structured, wellness exercise program. The project is to document and evaluate both the process and content aspects of programs so that a best practice template can be created and used by VON branches and others. The expected outcomes upon completion of the project are a model for the creation of a nationally-based program, a best practice template, and a program sustainability plan.

This project will improve mental health services for all seniors with cognitive and/or mental illness residing in long-term care facilities. One outcome of this project is the establishment of a Canadian Coalition for Seniors Mental Health which will increase opportunities for partners to share and create best practice models of front line services to residents with mental health needs. The partnerships are among over 150 agencies interested in mental health issues for seniors. A Steering Committee to oversee the project includes representation from the Alzheimer Society of Canada, the Canadian Association for the Fifty Plus, the Canadian Caregivers' Association, as well as ten (10) other key provider and consumer stakeholders.

Project Title and Description

Enhancing the Health of Informal Caregivers Through Physical Activity

The Canadian Association for Community Care proposes to develop, test, and evaluate models of active living programs for older informal caregivers, and to disseminate these models nationally for implementation at local levels.

For this project, the CACC will partner with the Active Living Coalition for Older Adults (ALCOA), an umbrella organization for seniors, and other health providers concerned with healthy aging, active living, and the creation of supportive environments.

The program will be designed to address the unique needs of caregivers with respect to income, availability, schedules, time, lack of respite care, transportation, as well as facilitating social networks to minimize social isolation.

The Canadian Standards Association (CSA) is a not-for-profit membership association serving consumers, industry, business and government. The Association is composed of three different divisions: Canadian Standards Association, CSA International, and QMI (Quality Management Institute). The Canadian Standards Association, the division of CSA Group responsible for standards development and work, has been involved in aging issues since 1998.

The first objective of the project is to identify the most effective process for the assessment of usability of products by seniors and to incorporate the model approach. This project will develop baseline information for the purpose of developing an effective protocol to assess usability for consumer products that affect seniors.

Duration: 22 months**Project Title and Description****Psychosocial Approaches to Mental Health Challenge of Later Life**

The British Columbia Psychogeriatric Association wishes to develop and share knowledge about the psycho-social approach to mental health problem with seniors. Partnership for this project has representation from four regions of Canada and reflects a broad spectrum of provincial and national stakeholder organizations. Both seniors and mental health practitioners will be involved directly in the project.

This project aims to increase the capacity of communities across Canada to use psychosocial approaches to promote seniors mental health, and to prevent and/or address mental health problems. The project goals are:

- to develop a mental health impact model with which to assess the effect of policies and programs on seniors' mental health;
- to develop community resources based on the findings of this project
