

PART X - GRAIN CORN

This Schedule A, Grain Corn Plan, forms an integral part of the PRODUCTION INSURANCE AGREEMENT and as such contains supplementary information specific to grain corn.

DATE	TOPIC	REQUIREMENTS and/or EFFECTS								
May 31	Application deadline									
	Required deposit	15 - 50% as per subsection 13(2)								
	Perils insured against	See section 8								
	Seed quality standard	Minimum 85% germination rate								
	Approved varieties	All varieties recommended in the Atlantic Provinces Crop Production Guide, Publication 100, or any other variety approved by the Corporation.								
May 12 May 22	Final planting date — Mid Season	Probable yield reduced by 2% per day after May 12. Acres planted after May 22 are not eligible for insurance.								
May 25 June 4	Final planting date — Short Season	Probable yield reduced by 2% per day after May 25. Acres planted after June 4 are not eligible for insurance.								
	Stage I indemnity rate (30 days after planting)	Maximum indemnity is 30% of insured value (section 23).								
	Stage II indemnity rate (unharvested acres) FULL OFFSET between Stage II and Stage III	Maximum indemnity is a 120-day sliding scale from 50 to 80% of insured value (section 24).								
	Stage III indemnity rate (harvested crop)	Indemnity equals the shortfall in production at the unit price (section 25).								
Oct. 30	Final date for harvest	Subsequent field losses are at the insured's risk.								
Nov. 20	Final date for filing PROOF of LOSS in writing									
<p>PRODUCTION TO COUNT FOR GRAIN CORN: For the purpose of calculating production or production to count, the following conversion factors may be used: MT = metric tonnes = 2,204 pounds For grain corn stored in bins - 1 cubic foot equals 0.8 bushels For grain corn sold off farm, use the net sales weight before dockage (MT) All grain corn weights will be adjusted to the standard moisture content when wet weights are provided. Adjusted weight = (actual weight) x (100 - actual moisture content) / (100 - standard moisture content) Production to count for grain corn means the total production before dockage, with a moisture adjustment expressed in metric tonnes. This production will be considered production to count whether sold or fed on farm.</p> <table> <thead> <tr> <th>Standard</th> <th>Crop</th> <th>Bushel Weight</th> <th>Moisture %</th> </tr> </thead> <tbody> <tr> <td></td> <td>Grain corn</td> <td>56 lbs.</td> <td>15.5%</td> </tr> </tbody> </table>			Standard	Crop	Bushel Weight	Moisture %		Grain corn	56 lbs.	15.5%
Standard	Crop	Bushel Weight	Moisture %							
	Grain corn	56 lbs.	15.5%
