

For Immediate Release
August 27, 2006

Notice of Smog Advisory

Today, the Ontario Ministry of the Environment issued a *Smog Advisory* effective immediately, until further notice for the following forecast regions:

Barrie-Orillia-Midland	Niagara
City of Hamilton	Oxford-Brant
City of Toronto	Simcoe-Delhi-Norfolk
Dufferin-Innisfil	Waterloo-Wellington
Dunnville-Caledonia-Haldimand	York-Durham
Halton-Peel	

A *Smog Advisory* is issued when there is a high probability for elevated smog levels.

A slow moving weather system combined with foggy conditions are resulting in a build-up of local pollutants.

Smog is a hazy mix of pollutants made up of ground-level ozone, fine particulate matter and other pollutants. During the summer months, more than half of Ontario's smog-causing pollution originates in the United States. In cooler months, domestic sources can be significant contributors to the formation of fine particulate matter.

The website www.airqualityontario.com contains a list of "spare the air" actions (www.airqualityontario.com/science/spareair.cfm) to help combat smog and minimize its effect on sensitive populations. If you want to learn more about air quality, visit the Ministry of the Environment's website at www.ene.gov.on.ca.
