Ontario Residents' Expenditures on Outbound Business Trips, by destination, 1980-2004

Notes:

1. Ontarians' expenditures on outbound trips

Refers to spending by Ontario residents in and outside Ontario while on a trip to a destination outside Ontario.

The "point of origin expenditures" are the amounts of money spent by Ontario residents in Ontario on transportation before going on a trip outside Ontario, which are assumed to have taken place at the location of origin of the trip and not at the locations visited, e.g. in the case of a same-day trip, the expenditures on vehicle rental, vehicle operation and intercity transportation, while in the case of an overnight trip, they are the expenditures on vehicle rental and intercity transportation.

For domestic travellers, their expenditures include the following categories: vehicle rental, vehicle operation, local transportation, inter-city transportation, accommodation, food or beverage purchased at stores during the trips, food and beverage purchased at restaurants or bars, recreation and entertainment, clothing and other expenditures. The following items are excluded: food purchased before the trip for use while on the trip; items purchased to be resold or used in business (include items used on farm); vehicles such as cars, caravans, boats; spending in destination countries, spending on fares of destination countries' carriers, and spending on fares of other countries.

2. Discrepancies are due to roundings.
