RE: Title and Survey Services Website

The first phase of the Title and Survey Services Website is now active. This is a great tool for land registry office staff and clients to use to access information. The address of the Ministry site is www.ccr.gov.on.ca. From there you select English or Français, then Services, and then Land Registration Information in English or Information sur l'enregistrement immobilier in French.

Phase one contains a brief description of what Title and Survey Services Office and Real Property Registration Branch are each responsible for. There are links to the current bulletins listed either numerically or by topic in both English and French as well as any Memo that has been issued which may interest clients. There are also links to the listing of Registry Offices and to Teranet's website. Phase two will contain information such as the client guide for Certification of Title under the *Certification of Titles Act* and First Registration under the *Land Titles Act* and should be implemented later this year.

The Intranet website is also active for government users. It contains memos that have been issued which only concern staff of Real Property Registration and Titles and Survey Services Office. The address is www.intra.ccr.gov.on.ca. From there select Our Divisions, Registration Division, Title and Survey Services Office and Memos. The sub-heading labelled "External & Bulletins" is a link to take you to the Internet site mentioned above.

I would like to thank Louise Richard-Beaulne, Bill Snell, Margaret Wiseman and Nicole Mitchell for all of their work in getting these sites operational. In addition, I would like to thank Lisa Wood and Randy Reese for their systems support.
