BY EMAIL AND COURIER

Dear Mr. Zych:

Re: May 26, 2006 Cost Allocation Review: Staff Proposal EB-2005-0317

Comments of Thunder Bay Hydro Electricity Distribution Inc.

I write on behalf of Thunder Bay Hydro Electricity Distribution Inc. ("Thunder Bay Hydro") in response to the Board's May 26, 2006 Cost Allocation Review: Staff Proposal Regarding Rate Classifications and Associated Load Data Requirements. The Board has requested distributor comments regarding currently-approved rate classifications not included in the Appendix. Thunder Bay Hydro comments that point four of the Appendix: General Service Intermediate User or Discrete Demand Range should allow for multiple groupings as subsets for that classification. Specifically, we have the following approved classifications:

1. General Service 50 to 999 kW;
2. General Service 1000 to 4999 kW.

Further, Run three of the model allows for additional rate classification changes. Rate classifications under consideration for this run of the model are:

1. GS > 500 kW < 3,000 kW; and
2. GS > 3000 kW < 4999 kW.

Please do not hesitate to contact me at (807) 343-1118 with any questions.

Yours truly,

A handwritten signature in black ink, appearing to read 'C. Thomas Wright'. The signature is fluid and cursive, with a large initial 'C' and 'T'.
