

## Liste des pesticides de la classe 5

Compilation administrative présentée à titre d'information  
mise à jour le 17 novembre 2006

**CETTE LISTE EST MISE À JOUR TROIS FOIS L'AN, SOIT EN MARS, JUIN ET NOVEMBRE.**

**Attention!** Certains produits possédant un même numéro d'homologation peuvent être vendus en plusieurs formats. De plus, certaines étiquettes n'indiquent pas le volume ou le poids du produit. Il est à noter que généralement seuls les pesticides mis en marché en volume ou en poids égal ou inférieur à un litre ou un kilogramme sont de classe 5.

Toutefois, les pesticides constitués d'un mélange qui renferme exclusivement un ou plusieurs des ingrédients actifs suivants, soit le savon, la terre diatomée et le *Bacillus thuringiensis kurstaki*, sont de classe 5, peu importe le format.
