Mexico and IFTA

On January 1, 2003, Mexico became a participating jurisdiction under the *International Fuel Tax Agreement* (IFTA). However, Mexico is not considered to have the same status as the states, provinces and territories that are parties to the Agreement. Consequently, in order to correctly calculate the average number of kilometres per litre, you must enter the number of litres of fuel purchased and of kilometres travelled in Mexico in the spaces provided for **non-member jurisdictions** on the quarterly return (CAZ-510-V).

For further information, contact a representative of the Ministère du Revenu du Québec at **(418) 652-IFTA** or **1 800 237-IFTA**.
