Updated Schedule of Community Connections
As of December 11, 2006

The Premier's Technology Council (PTC) identified 366 communities that were a priority for high-speed Internet access. Defined by the PTC, a community is anywhere in British Columbia with a place name and either a public school, a library, or a healthcare facility. Of the 366 communities included in this project, 151 were identified as not having access to broadband in April 2005.

The main table in this document reflects the Schedule of Community Connections in the Connecting Communities Agreement. This schedule identifies the quarter in which the 151 British Columbia communities that will receive a connection point will be connected. The target date for connecting a given community appears in the column of the main table titled "Targeted Upgrade Date – End of Quarter/Year".

Connection of the 151 communities was prioritized jointly by the Province and TELUS to a schedule of quarterly dates and to a set range of available infrastructure types. These infrastructure types are defined in the Service Capabilities table below.

Service Capabilities by Infrastructure Type	
Type 1	Up to E100 bandwidth services, multiple E10s available.
Type 2	Multiple E10s available.
Type 3	Single E10 available.
Type 4	E6 available.
Type 5	Communities served via high-speed satellite.
Type 6	Communities being connected via BRAND projects.

Digital Divide Community Name	TYPE 1 Up to E100, Multiple E10s	TYPE 2 Multiple E10s	TYPE 3 Single E10	TYPE 4 E6	TYPE 5 Satellite	TYPE 6 BRAND	Targeted Upgrade Date - End of Quarter/Year
150 Mile House			1				Complete 2005Q2 DSL rolled out
70 Mile House *			1				Complete 2006Q1
Adams Lake					1		2006
Ahousat			1				Complete 2006Q3
Alexis Creek *		1					Complete 2006Q2
Alkali Lake *			1				Complete 2006Q2
Anahim Lake *			1				Complete 2006Q4
Atlin *					1		Satellite available
Baldonnel *			1				Complete 2006Q1
Bamfield *				1			Complete 2006Q3
Bear Lake *		1					Complete 2006Q2
Beaverdell *			1				Complete 2006Q2
Bella Bella *		1					2006Q4
Bella Coola *			1				Complete 2006Q4
Big Lake (Ranch) *			1				Complete 2006Q3
Blue River *			1				Complete 2006Q2
Boston Bar *			1				Complete 2006Q2
Bridge Lake *			1				Complete 2006Q3
Buick			1				Complete 2006Q3
Burton *			1				Complete 2005Q4
Canal Flats *			1				Complete 2006Q1
Cape Mudge *			1				2006Q4 Complete 2006Q3
Celista *			1				2006Q2 Complete 2006Q1
Charlie Lake			1				Complete 2005Q4
Chilanko Forks			1				Complete 2006Q2
Clearview (Flatrock)			1				Complete 2006Q4
Clinton *			1				Complete 2006Q2
Coal Harbour *			1				2006Q4 Complete 2006Q3
Crawford Bay *			1				Complete 2005Q2
Danskin			1				Complete 2006Q3

* A community shaded in blue means that an Internet Service Provider has been selected to provide high-speed services to businesses and homes in this community.

* A community shaded in blue means that an Internet Service Provider has been selected to provide high-speed services to businesses and homes in this community.

Criteria Used to Prioritize the Community Connection Dates

Provincial Criteria

1. Community must be one of the provincial list of 366 communities originally established by the Premier's Technology Council.
2. Community must be lacking broadband as defined by NetWork BC project.
3. There is an active initiative in place that will develop a broadband system if provided with a transport solution for the community's upstream traffic.
4. There is an active initiative in place that is developing plans to bring broadband into the community but is not ready to implement.
5. There is an initiative in place or individuals who have indicated that they have a strong desire to have broadband in the community but are not yet to the planning stage.
6. There are individuals who have indicated an interest in bringing broadband to the community.
7. There has been no interest expressed in bringing broadband to the community.

Communities were ranked high, low, medium according to the above criteria and were listed 1 – 151. This listing was provided to TELUS.

TELUS Criteria

1. Urgency of demand by local community provided by provincial ranking.
2. Availability of network transport to community (ease of technical solution).
3. Future build plans – e.g., northern Vancouver Island fibre build will not reach some communities ranked high by the Province until late 2006.
4. Ease of implementation.
5. Type of transport chosen and time of year for build.

Communities were then re-ranked by TELUS and NetWork BC. A list of communities has been developed showing when communities will be connected, the type of technology connecting the communities and the quarter when they will be connected.

The table below lists 215 communities that have broadband service available to them. Many of these communities are assigned a date. The communities without a date already have high-speed available for Internet service providers and other users of large amounts of bandwidth according to a provincial pricing structure that was negotiated as part of the TELUS/BC broadband partnership project. The communities with a date showing indicate when higher amounts of bandwidth will be available to them.
