To: Users of the British Columbia Specifications and Guidelines for Geomatics

Volume3 January 1992

and

Policies and Specifications for TRIM II (1:20 000 and 1:10 000) Revision Data

Capture, Version 2.0 (May 15, 1997)

From: Base Mapping and Data Exchange Unit, Base Mapping and Geomatic Services

Branch

Subject: TRIM II - Update of Specifications

Date: April 01, 2004

Effectively Immediately

British Columbia Specifications and Guidelines for Geomatics Content Seriesl Volume 3 Digital Baseline Mapping at 1:20 000 Release 2.0 January 1992

Appendix A - Deliverables A.1Data Capture Deliverables

Photos / DIAPs if available

AT Scans

Digital Orthophotos / Mosaics

Preset Models

Digital Positional File

Data File 1	Digital Elevation Model
Data File 2	Enhanced Contour File
Data File 3	Non-Positional File
D . T'' 4	D1 1 1 D 11 1D

Data File 4 Planimetric Positional File

Data File 5 Toponymy File

Data File 6 Supplementary Data File

Data File 7 Wooded Area File

All TRIM data will be delivered in SAIF format that meets the current Exchange Data schema unless otherwise notified by Base Mapping and Geomatic Services (BMGS)

On the Web see: http://srmwww.gov.bc.ca/bmgs/dataexchange/data_exchange/bda20revx_csn.pdf

Verification Plots:

- one DEM plot on paper
- one combined planimetric and contour plot in colour on paper
- one polygon closure plot on paper
- one additions plot on paper
- one ortho plot with planimetric overlay

Model set up records for all models covering the sheet.

Sheet sign-off record indicating quality control procedures completed.

Quality Assurance check statistics and related information.

- Right Hand Rule
- Downstream Rule
- Continuity Rule
- Polygon Rule
- Connectivity Rule
- Edge Joins
- Compliance with the relationship to TRIM II Revisions for codification see: Policies and Specifications for TRIM II (1:20 000) and (1:10 000) Revision Data Capture Version 2.0 (May 15, 1997) On the web see: http://srmwww.gov.bc.ca/bmgs/trim/trm2spcs/trm2spcs.pdf

This section no longer applies to these specifications.

A.2 Cartographic Enhancement Deliverables

A.3 Edit Notations

All references to MOEP will now be referred to as BMGS (Base Mapping and Geomatic Services)

This section no longer applies to these specifications.

A.4 Procedures for Marking Contractor Toponymy Submissions

A.5 General Deliverables

Contractors will submit Operating Procedures as part of the deliverables that will include the following:

- production diagram
- resume of all production personnel
- photogrammetric equipment annual calibration reports (scanning)
- quality assurance procedures
- In-house Process Inspection Procedures

A.6 BMGS Audit Process

TRIM Audit Line/Point Checking Criteria and Error Descriptions

- * Archived File: The most current TRIM File available in the Branch Archive
- * Revision File: The updated TRIM File submitted by the Contractor

Line Work

- Step 1 Checks deleted and deletion with replacement lines to ensure that they came from the archived file
 - Step 2 Checks to ensure that addition and modified lines were not in the archived file
 - Step 3 Redundant
 - Step 4 Checks the integrity of the archived file to ensure that features haven't been moved

Point Check (Plan)

- Step 1 Checks to see if the archived file had duplicate points in it
- Step 2 Checks for duplicate points in the revision file except for deleted features
- Step 3 Checks for duplicate points marked as addition features in the revision file
- Step 4 Checks for duplicate points marked as deletion features in the revision file
- Step 5 Checks for duplicate points marked as deletion in the revision file
- Step 6 Checks the deleted features against the addition features for possible errors
- Step 7 Checks for additional point features in the revision file that existed in the archived

file

- Step 8 Checks for deleted point features in the revision file that didn't exist in the archive file
- Step 9 Checks for addition point features to ensure that they haven't been removed from the revision file
- Step 10 Check to ensure that point features in the archived file minus the point features in the revision file

match those points marked as deletions

Step 11 Check to ensure that point features in the archived file minus the point features in the revision file

match those points marked as additions

Point Check (DEM)

- Step 1 Checks to see if the archived file had duplicate points in it
- Step 2 Checks for duplicate points in the revision file except for deleted features
- Step 3 Checks for duplicate points marked as addition features in the revision file
- Step 4 Checks for duplicate points marked as deletion features in the revision file
- Step 5 Checks for duplicate points marked as deletion in the revision file
- Step 6 Checks the deleted features against the addition features for possible errors
- Step 7 Checks for additional point features in the revision file that existed in the archived file
- Step 8 Checks for deleted point features in the revision file that didn't exist in the archive file
- Step 9 Checks for addition point features to ensure that they haven't been removed from the revision file
- Step 10 Check to ensure that point features in the archived file minus the point features in the revision file

match those points marked as additions

Trim Check Error Code

15

Allowable single feature errors per sheet

Allowable total errors per sheet

Allowable total (Categories "A" + "B") errors per sheet 21

Allowable average (Categories "A" + "B") errors per sheet over total audit area

Appendix "C"

TRIM Audit Recommended Monetary Penalties

Based on a \$100,000.00 Contract

Category "A" Errors 1 Error per mapsheet average = \$2,000.00, Maximum allowable

1.5 errors per sheet average = \$3000.00

Category "B" Errors 1 Error per mapsheet average = \$100.00, Maximum allowable

6 errors per sheet average = \$600.00

The Maximum Penalty for "A" and "B" combined would be \$3,600.00

The Minimum Penalty shall be 1 % of the total contract amount

* Note: All penalties shall be levied at the discretion of the Contract Administrator

Example 1

Contract Price	\$100,000.00	
	1	Recommended Penalty
Number of Category "A" Errors	1.5	\$3,000.00
Number of Category "B" Errors	6	\$600.00
Т	otal Calculated Penalty	\$3,600.00

Example 2

	Minimum Penalt	t y 1 %	\$1,000.00
	Total Calculated	l Penalty	\$600.00
Number of Category	"B" Errors	2	\$200.00
Number of Category	"A" Errors	0.2	\$400.00
Contract Price	\$100,000.00	Reco	ommended Penalty
Contract Price	\$100 000 00
