

Base Map Online Store

The Base Map Online Store is the new, online service replacing LandData BC. The new service gives customers instant access to base maps and related imagery over the Internet, and now some products can be ordered online with a credit card.

WHAT IS THE BASE MAPPING AND GEOMATIC SERVICES BRANCH?

The Integrated Land Management Bureau (ILMB) provides integrated, science-based land, resource and geographic information to clients in government, the private sector and citizens. The ILMB's Base Mapping and Geomatic Services Branch (BMGS) gives customers access to the base map products and services they require to accurately overlay geographic based information such as vegetation cover, utilities and highway infrastructure, oil and gas wells, water licenses, fire evacuation routes, land use plans and zoning.

BMGS is responsible for coordinating the distribution of these common base maps to government and public customers alike to avoid duplication, maintain common standards, enable efficient use of base maps, and promote value-added use.

BASE MAP ONLINE STORE BENEFITS

- Improved client service
- Easy access to quality integrated data
- User friendly set of tools to access and search for data
