South East Kelowna Irrigation District Demand Management Project

In 1994, the South East Kelowna Irrigation District implemented a demand management strategy that included the installation of meters to all agricultural connections. The strategy involves monitoring and reporting water use while promoting irrigation scheduling techniques in the district. This report gives the details of the study and results from the project, which ended in 1999.

This publication contains excellent information which may be of assistance to you. Listed are 9 sections and appendices. Individual section topics may be downloaded at no cost directly to your printer from our website. All the sections listed on the next page make up the published report. Print the sections to your own printer or order this published report, which is available to all British Columbia farmers and ranchers for free. To obtain a copy please contact the following:
