SMALL WORKING CORRAL

CPS
PLAN 1832 NEW 1:75

This is a good handling facility for a ranch or small feedlot, useful for about 200 head.

The plan features two cutting pens; see 315-01 for fencing details. A crowding pen with crowding gate

(leaflet 315-02) herds animals into the chute with minimum effort. The working chute is shown 36 ft long although this length can be altered. The working chute is detailed in 315-03 and includes blocking gates (315-04), squeeze, and headgate. A catwalk along this chute is essential for easy moving of cattle.

A loading chute (315-08) can be conveniently added at the start of the working chute section to take advantage of the crowding gate.

- | | |
|---------------------------------|---------------------------------------|
| 1 loading chute (315-08) | 6 6'-0" sorting gate |
| 2 crowding pen | 7 working chute and headgate (315-03) |
| 3 10'-0" crowding gate (315-02) | 8 access gate |
| 4 12'-0" gates | 9 blocking gate (315-04) |
| 5 holding pens | |
