

PLYWOOD PALLET BIN

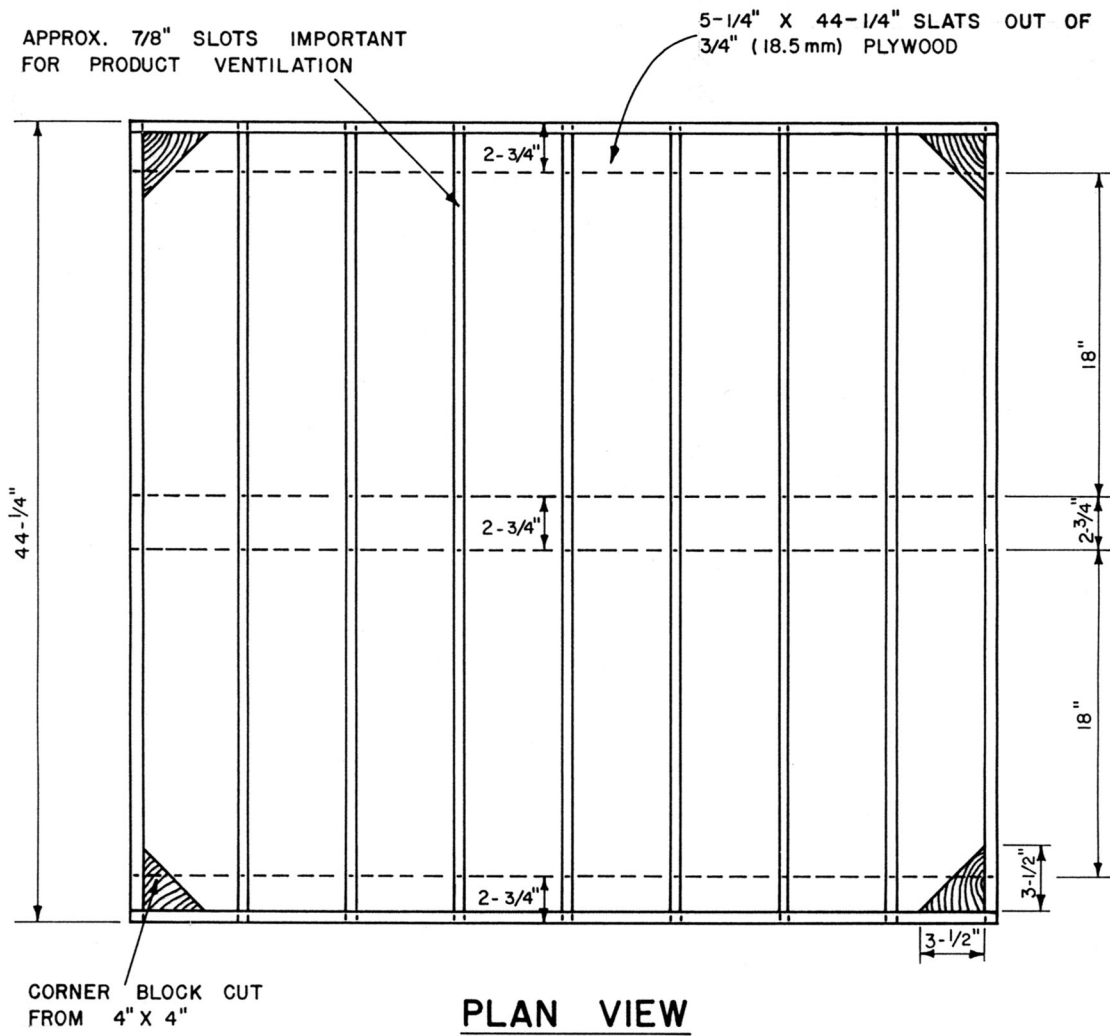

PERSPECTIVE

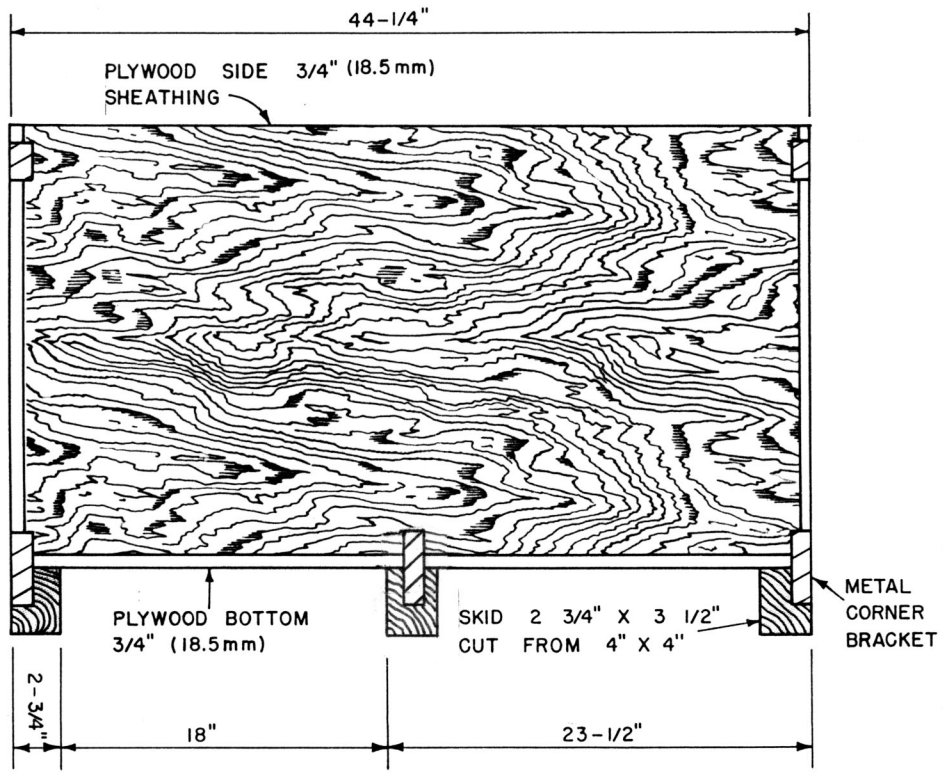

332-10

PLYWOOD PALLET BIN

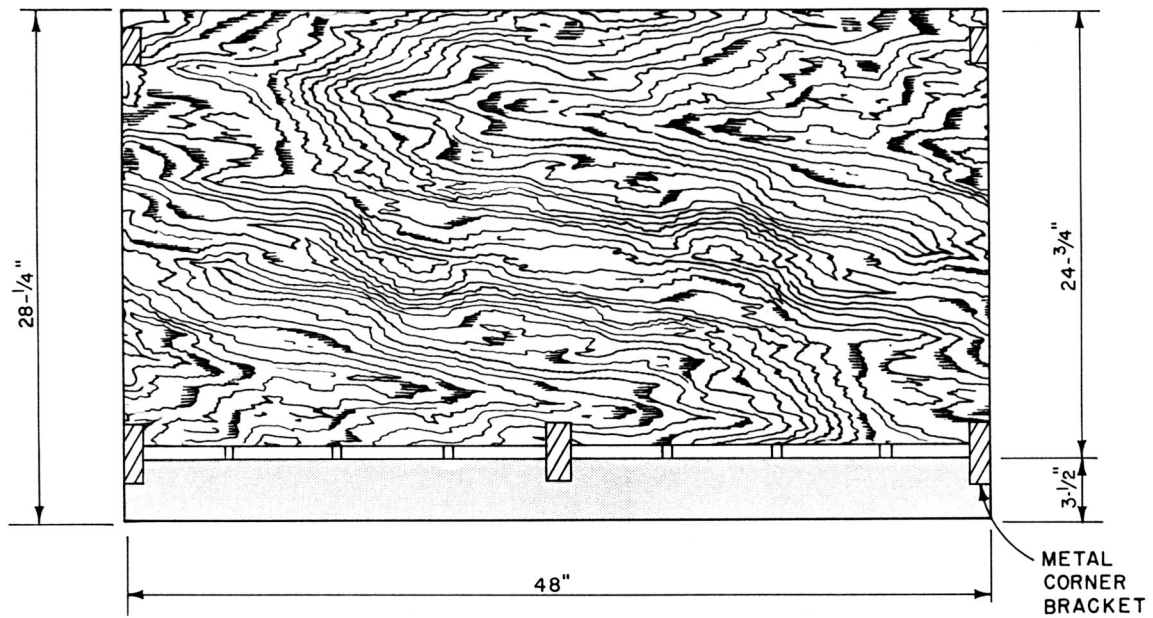

This is a leaflet plan for a wooden pallet bin. It is 48" long by 44 1/4" wide and is 28 1/4" high. It is supported on wood skids cut from 4" x 4" lumber. The corners are reinforced with metal corner brackets.

The pallet bin is constructed from 3/4" plywood on the sides and has slats on the bottom also of 3/4" plywood. The slats have a 7/8" slot between them which is important for product ventilation.
