

# EWE STANCHION, HOOF TRIMMING CRADLE, & LAMB CASTRATION TABLE

DEVELOPED BY CANADA PLAN SERVICE

**EWE STANCHION, HOOF TRIMMING  
CRADLE, AND LAMB CASTRATION  
TABLE**

**CPS  
PLAN 4223**

These simple sheep holding devices are an asset to any sheep enterprise. They make it easier to do many of the tasks required in all sheep enterprises.

**Ewe Stanchion**

A sturdily built stanchion framed with 2 by 4 inch lumber. Side rails are made of 1 by 4 inch boards. Details are given for a simple stanchion locking device.

**Hoof Trimming Cradle**

The cradle is made of steel angle and 1 inch diameter pipe. Sheet metal cradle rests are made for the lamb to lie on. Complete details are given on the size and length of all rods, pipes and sheet metal required.

**Castration Table**

This wood frame unit provides a table of convenient working height. Side braces of 1 by 4 inch lumber are nailed by 2 by 2 inch lumber legs. The lamb lies in a V-shaped trough of 1 by 6 inch boards and is held there by an H-shaped 1/2 inch diameter rod.
