

SHEARING FLOOR AND FLEECE-SORTING TABLE

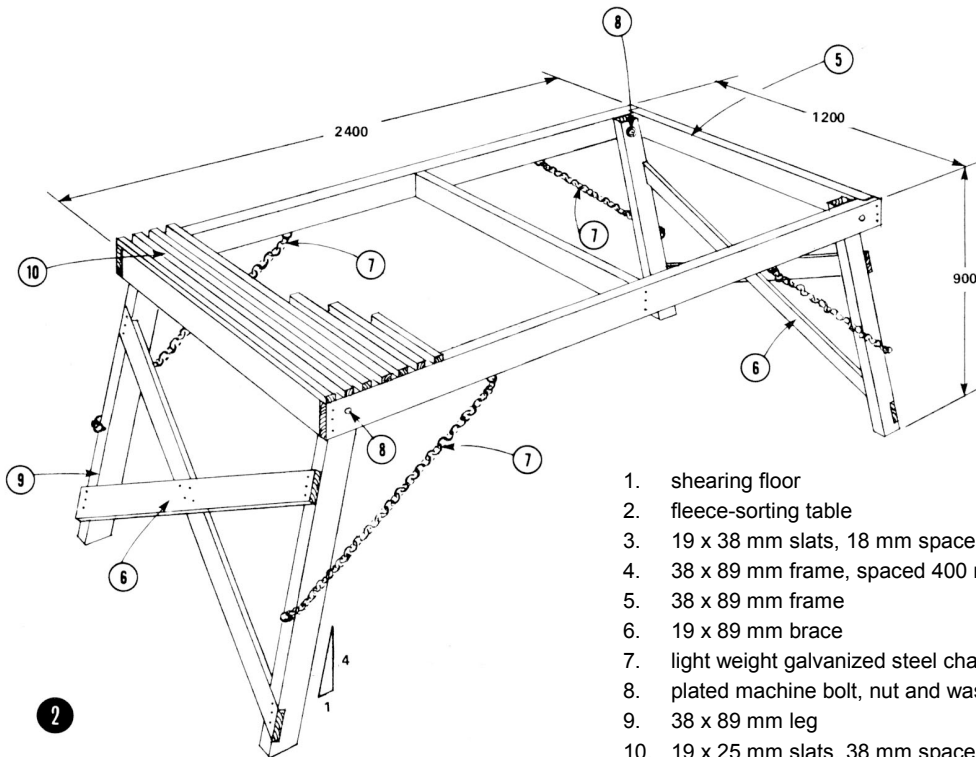

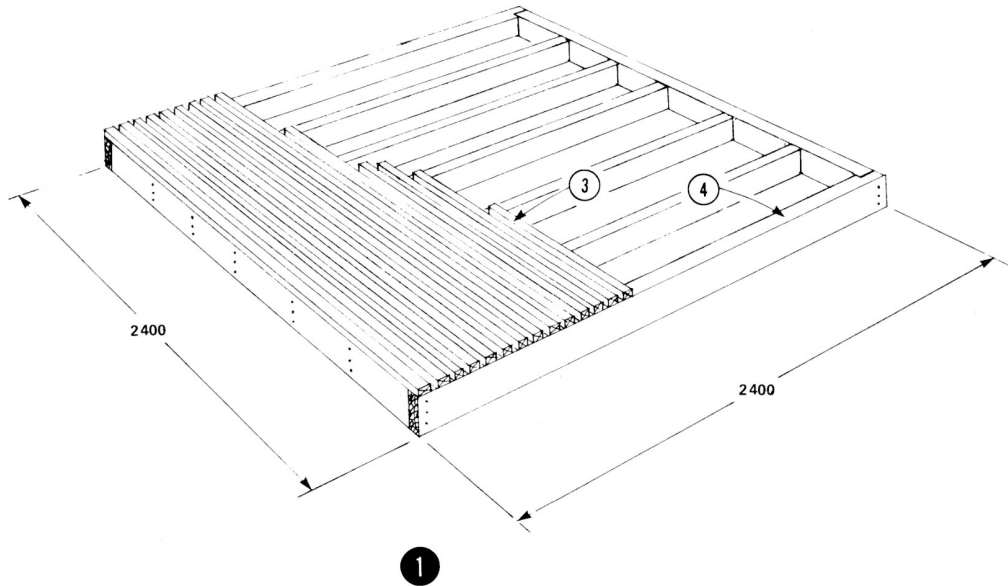

DEVELOPED BY CANADA PLAN SERVICE

SHEARING FLOOR AND FLEECE-SORTING TABLE

CPS
 PLAN M4552 NEW 78:11

Here are two items of equipment for the annual shearing operation. The slotted shearing floor panels keep the wool from becoming soiled during shearing. The same panels may be used also to floor the catch pens where sheep are grouped ready for shearing (see Leaflet 353-51(CPS 4511), Shearing Facilities).

The fleece-sorting table provides a work surface at a comfortable height for sorting and packing wool, and it helps to separate straw and dirt from the fleece. Fold the table legs for storage when not in use.

1. shearing floor
2. fleece-sorting table
3. 19 x 38 mm slats, 18 mm spaces
4. 38 x 89 mm frame, spaced 400 mm oc
5. 38 x 89 mm frame
6. 19 x 89 mm brace
7. light weight galvanized steel chain
8. plated machine bolt, nut and washers (4 required)
9. 38 x 89 mm leg
10. 19 x 25 mm slats, 38 mm spaces
11. ALL DIMENSIONS IN THIS METRIC PLAN ARE IN MILLIMETRES (mm) UNLESS OTHERWISE SPECIFIED
