

ALL PURPOSE BUILDING TRIPLE SPAN TO 52 FT. MAX

373-05

ALL PURPOSE BUILDING 52 FEET WIDE MAXIMUM

This is a detailed plan set which can be used by the part time or full time farmer who needs to house small numbers of various types of animals and store a small amount of feed.

The building can be constructed up to 52 feet wide maximum and 100 feet in length; any longer length required should be referred to the Resource Management Branch. Maximum stud length 12'-0".

This building should be constructed only on level ground with a good bearing soil, otherwise detailed footings and a soil survey will be necessary.

The plan shows several roof structure options using trusses or rafters or a combination of each. Posts are spaced at 12 feet center to center. Stud wall option is also available.

Details for construction of an optional overhead hay storage are provided. Ridge ventilation and side wall ventilation details are also shown and are important features for housing animals within the structure.
