Notes

1 Reporting has been changed to reflect life stage rather than water type. See notes 1, 3 and 4 of Average Mortality Rate report for Q3 2004.

2 Report reflects initial changes to Database; for Q3 2004 only, all fish health events are denoted as "new".

Subsequent quarters will report "ongoing/recurring" and "relapsing" events as they occur.

3 Counts of veterinary diagnosis are based on FISH GROUP (not site); more than one fish group may exist at a site
