Notes

- 1 Reporting has been changed to reflect life stage rather than water type. See notes 1, 3 and 4 of Average Mortality Rate report.
- 2 Counts of veterinary diagnosis are based on FISH GROUP (not site); more than one fish group may exist at a site
- 3 Database upgrades are almost complete. Fish Health Events have been revised to reflect the following categories:
 - New First time occurrence; new event
 - Ongoing/recurring Repeat or ongoing occurrence from previous calendar quarter
 - Relapsing Repeat occurrence from calendar quarter at least two quarters preceding the current one
