#### Notes

- 1 Reporting reflects life stage rather than water type. See notes 1 - 2 of Average Mortality Rate report.
- 2 Counts of veterinary diagnosis are based on FISH GROUP (not site); more than one fish group may exist at a site
- 3 Fish Health Events reflect the following categories:
  - New First time occurrence; new event
  - Ongoing/recurring Repeat or ongoing occurrence from previous calendar quarter
  - Relapsing Repeat occurrence from calendar quarter at least two quarters preceding the current one
- 4 All four "ongoing/ recurring" events were already reported in Quarter 1 and completed just after start of Quarter 2.
- 5 Category requires workup and management steps taken, e.g., further investigation, husbandry change etc.
