Notes

- 1 Reporting reflects life stage rather than water type. See notes 1 - 2 of Average Mortality Rate report.
- 2 Counts of veterinary diagnosis are based on FISH GROUP (not site); more than one fish group may exist at a site
- 3 Fish Health Events reflect the following categories:
 - New First time occurrence; new event
 - Ongoing/recurring Repeat or ongoing occurrence from previous calendar quarter
 - Relapsing Repeat occurrence from calendar quarter at least two quarters preceding the current one
- 4 "Case worked up but no diagnosis" category requires workup and management steps taken, e.g., further investigation, husbandry change etc.
