

## Irrigation Development

Outlook, Saskatchewan is the focal point for the department's efforts to build economic activity around the province's irrigation infrastructure. Engineers, agrolologists, technicians and business development experts specialize in soil and water feasibility testing, crop economics, irrigation business development and irrigation design.

## Financial Programs for Rural Saskatchewan

Our staff administer the Livestock Loan Guarantee Program – an initiative put in place to help grow Saskatchewan's livestock industry. Government-backed loan guarantees help producer associations buy the livestock they need to expand local breeding herds and feeding operations. Those expanded operations provide new opportunities for processing businesses in Saskatchewan.

## Saskatchewan Crop Insurance Corporation

Program staff at our 21 Customer Service Offices can help you find the risk management solutions you need for your farm operation. Program applications, claim adjusters and coverage details are all available.

(1-866-457-2377)

- *“I would like to improve my crop rotation, but need some help...”*
- *“What is the economic threshold for spraying wheat midge?”*
- *“What is the most cost-effective supplement for my calf ration?”*
- *“What kind of savings can I expect if I expand into feedlot production?”*

The Agriculture Knowledge Centre is your place to start for the latest answers on topics ranging from crops and livestock to nutrient management and the economic implications of management decisions. A toll free line puts you in touch with resource agents and specialists who draw on expertise from around the Province and beyond. Our friendly staff will help you find the solutions you need for your operation. Give us a call!

### Agriculture Business Centres

Saskatchewan Agriculture, Food and Rural Revitalization has nine offices to meet your needs. These offices are located in Prince Albert, Saskatoon, Yorkton, Regina, Swift Current, Outlook, North Battleford, Tisdale and Weyburn.

A team of specialists (agribusiness development, livestock, crops and forages) in each office is there to help you build on opportunities for agriculturally based economic development in your region. They can help you with new technology, business development processes and building partnerships with the people and agencies you need to know to expand, change or start your business.

Our staff will be actively involved in the communities in your region. Specialists will regularly meet with community leaders and innovators to help get new projects off the ground.

Each new project yields benefits for your local economy and for Saskatchewan – bringing jobs and wealth back into rural areas.

### Renewal Programming

Our staff also deliver renewal programming under the Federal-Provincial Agricultural Policy Framework, or APF, focusing on farm business assessment, planning and skills training. Details on these new programs will be made public shortly.

### Crown Lands and Pastures

If you want access to Saskatchewan's extensive base of agricultural Crown land or the community pasture program – or if you just have questions about your Crown lease – contact our nearest office.

### Inspection and Regulatory Management

The enforcement and inspection arm of Saskatchewan's world class regulatory system works to protect our environment and the reputation of our agricultural industry. We have professional livestock, game farm and pesticide inspectors on staff, as well as certified engineers and technicians who specialize in agricultural operations.
