

SASKATCHEWAN PHARMACEUTICAL INFORMATION PROGRAM (PIP) REQUEST TO MASK MEDICATION PROFILE

I understand that the Pharmaceutical Information Program, also known as PIP, is a secure computer system that contains information about my prescribed and dispensed medications and that this system is used by authorized health care professionals to make decisions about health care treatments for me.

I also understand that PIP provides me with the option to globally mask my medication information contained on this system and that this means that all of the prescribing and dispensing medication information about me contained in this system will not be accessible by any health care provider of the system except with my consent or in such exceptional circumstances as where dangerous use of prescription drugs is suspected and/or in emergency circumstances where I am unable to provide my consent.

Therefore, I the undersigned, request that Saskatchewan Health globally mask my medication profile stored in the Pharmaceutical Information Program.

I accept all risk associated with the masking of my medication profile including, but not limited to, any delay which may be experienced in obtaining treatment or any decisions which may be made by health professionals based on not having access to my medication profile stored in PIP.

_____ Signature of Applicant	_____ Signature of Agent if required
_____ Date Signed by Applicant	_____ Date Signed by Agent

If you are signing as an agent for the applicant, please include evidence of your authority (ex. guardianship order, power of attorney, etc.).
