Project Location (City, Town, Rural Municipality) _____

Briefly outline the major business activity/activities the new generation coop will perform:

Specify the main products or services the new generation coop will sell/provide:

Project Description

1. Describe in detail the project being pursued. This should include an overview of the scope of operations for the NGC, potential relationships of the NGC with value chain members, market(s) being serviced by the NGC, etc.

2. Explain the impact this project will have on value chain development and how producers will be integrated into the value chain.

3. Does this project create new market opportunities for Saskatchewan? If so, please describe market areas being targeted.

4. Explain why a NGC business structure is being pursued and describe what benefits the NGC can provide to members and investors.

5. Will this project provide any spin off investment activities in other businesses or serve as an avenue for future industry development?

6. Outline the previous experience the applicant group has had in business development.

7. Will this project create new employment opportunities and if so, how many and in what areas (ex. management, processing, etc)?

8. Does this project create any environmental concerns that must be addressed and if so how will they be addressed?

Financial Assistance

9. Has or will this project receive funding from other government sources. If so please outline what sources and how the funding has or will be used.

10. Why does the applicant need financial assistance and how will assistance change the timing or scope of the project?

12. Describe the evaluation criteria that will be used to assess the results of these activities to identify if the project is viable.

13. The AnGen program will cost share up to 50% of eligible activities. Is the funding in place for your share of project costs? If not, how do you plan to contribute the other 50%?
