2001 Covered Population

Notice to Readers

INTRODUCTION

As in previous years, the 2001 Covered Population is based on eligibility for health insurance benefits in Saskatchewan. All residents of Saskatchewan are included except: (a) members of the Canadian Armed Forces, members of the Royal Canadian Mounted Police, and inmates of federal prisons, all of whom are covered by the federal government; and (b) people not yet meeting the residency requirement (coverage begins on the first day of the third calendar month following their move to Saskatchewan). Saskatchewan residents moving elsewhere remain eligible for coverage for the same period, and anyone whose coverage extends through June (i.e. who left the province April 1st or later) is included in the report. In the case of death, people who had coverage any time in June are included.

Age distribution is calculated as of June 30th. People born in the period from July 2000 to June 2001 are recorded in the under one (<1) age group. People born between July 1996 and June 2000 comprise the 1 to 4 age group, and so on.

CHANGES IN FORMAT

Prior to 1998, population data were presented in ascending residence code order (please see Methodology, page 2, for a description of residence codes).

Reports for 1998, 1999, 2000 and 2001 group residence codes into health districts. Districts are shown in numerical order, as are the residence codes within them. To assist readers in looking up residence codes, the report includes alphabetical and numerical listings of cities, towns and villages, giving the health district and the page number on which the residence code appears.

Some rural municipalities (RMs) fall into more than one health district. When this occurs, the RM is apportioned among districts (please see Methodology for an explanation of apportioning). In district-specific tables, the district's share of each split RM is indicated in parentheses. For example, the table for South East Health District shows: 007 10 RM Souris Valley (33%), indicating that one third of the RM is located in South East. The table for South Central Health District shows the balance: 007 10 RM Souris Valley (67%). To assist in comparison with previous reports, total populations of split RMs are provided in Appendix 2.

Please note that apportioning results in fractional numbers. Fractional parts are not displayed, and numbers may not add to totals because each is rounded independently.

CHANGES IN CONTENT

The 1998 Covered Population book introduced a change in the method of reporting Registered Indian populations (a "Registered Indian" is a person who is registered under Section 6 of the Indian Act and who has been assigned a ten digit number in the Indian Registry). In past reports, all Registered Indian persons were included under the summary category "Reservations", and the populations reported under the residence code of each band were based on Registered Indian status and band of

origin. Beginning in 1998, Registered Indian persons have been reported on the basis of place of residence. The population under "Reservations" reflects our best estimate of the Registered Indian population living on Saskatchewan reserves, with the population of individual reserves shown by health district (please see Methodology for an explanation of residence code assignment to Registered Indian persons). To assist in comparison with previous reports, population by First Nation of origin (regardless of place of residence) is given in Appendix 1.

In the past, distribution of the non-Registered Indian covered population into residence codes was based on mailing/correspondence address. Current distribution is based, as much as possible, on residence address.

The Rural Municipality of Prairie (408 10) has dissolved and its land area has been absorbed by the rural municipalities of Buffalo (409 10), Glenside (377 10) and Battle River (438 10). Individuals formerly counted in the Rural Municipality of Prairie have been reassigned a residence code of 409 10, 377 10 or 438 10, based on postal code information. The apportioning of RM Buffalo and RM Glenside between Greenhead Health District and Battlefords Health District has been amended to reflect the new boundaries of these rural municipalities.

2001 Covered Population

Methodology

SOURCE FILE

The 2001 Covered Population was run using the Person Registry System (PRS). The design of the PRS provides flexibility to collect information on multiple addresses and to distinguish between residence and correspondence addresses. The residence code carried on the PRS is assigned based on the following hierarchy:

1. land location (e.g. NW ¼ Section 1, Township 8, Range 7, West of 2nd Meridian),
2. residence address (which may or may not also be a correspondence address), and
3. correspondence address.

RESIDENCE CODES

A residence code is a 5 digit numeric code which uniquely identifies each city, town, village, rural municipality (RM) and First Nation in Saskatchewan.

For RMs, cities, towns and villages (except northern villages), the first 3 digits of the code are the community's RM number. RMs are numbered, for the most part sequentially, from east to west and south to north (please see Map of Health Districts and Rural Municipalities, page 3). These numbers range from 001 through 622. The RM itself is always assigned a fourth and fifth digit of 10. Cities are assigned numbers in the 20s, towns in the 30s, and villages in the 50s and 60s. For example, the RM of Orkney (244) is assigned residence code 244 10, the City of Yorkton 244 27, the Town of Springside 244 30, and the Villages of Ebenezer and Willowbrook 244 51 and 244 61 respectively.

Outside the RM structure, residence codes beginning with 7 are assigned to First Nations. The fourth and fifth digits of these codes refer to their zone, designated by Indian and Northern Affairs Canada (please see Appendix 1). It is important to note that residence codes are assigned to uniquely identify First Nations, not reserves. Where a First Nation has more than one parcel of land, these cannot be distinguished from each other under the current residence code system. This creates difficulty, especially where a First Nation's land holdings fall into more than one health district. A correction was able to be made in the case of the Montreal Lake Cree Nation (please see below).

There is no RM structure in northern Saskatchewan. Northern communities are grouped into five broad geographic areas and assigned residence codes beginning with 801 through 805. Northern villages are assigned fourth and fifth digits in the 70s.

APPORTIONING

The boundaries of rural municipalities and health districts are not coterminous. In rural areas, the rural municipality is the smallest geographic unit about which information is collected. This means that they can only be apportioned across districts instead of being assigned to a specific district, as is done with cities, towns and villages. Where an RM crosses health district boundaries, the RM's population is divided among districts in proportion to the RM's land area. In the absence of any additional information

about the distribution of population within the RM, every five-year age and sex group is apportioned this way. Please see Appendix 2 for a list of split RMs and a map showing their locations. RM 394 Hudson Bay is an exception (please see below).

RESIDENCE CODE ASSIGNMENT TO REGISTERED INDIAN PERSONS

Historically, Registered Indian persons have been assigned to residence codes based on band affiliation rather than place of residence. For example, all Saskatchewan beneficiaries whose band of origin is the Cowessess First Nation were assigned to residence code 733 84. As a result, the population shown for this residence code included people living elsewhere in the province, but excluded reserve residents not originally belonging to that band.

Many of these residence codes have now been corrected on the PRS, and this year's methodology retains any residence code indicating residence on reserve. With the exception of Montreal Lake (please see below), no further refinement was done for northern Saskatchewan (Mamawetan Churchill River Health District, Keewatin Yatthé Health District, and Athabasca Health Authority), since it is difficult to distinguish reserves from northern villages. In the southern 30 districts, further analysis resulted in some reassignment of residence codes for Registered Indian persons with a PRS residence code below 700 00 or with residence code 799 84 (a code assigned to Registered Indian persons who are Saskatchewan beneficiaries, but whose band of origin is outside the province). For each reserve, at least one postal code was identified as the reserve's primary mailing address. Regardless of band of origin, any Registered Indian person using this postal code was counted in the population of the reserve identified with the same code. Records without a postal code default to the residence code recorded on the Person Registry System. Where a reserve is close to an urban community, this methodology may overestimate the reserve's population. Estimates will improve in the future as better source data are collected.

EXCEPTIONS: MONTREAL LAKE AND HUDSON BAY

The Montreal Lake Cree Nation has land holdings in both Mamawetan Churchill River and Prince Albert health districts. Although all Montreal Lake on-reserve residents are identified by a single residence code (726 82), people living on the two reserves use different postal codes. In this case, we are able to use postal code information to augment residence information in order to allocate individuals to the correct district. Montreal Lake on-reserve residents not having a postal code on the Person Registry are assigned to these districts in the same proportion as residents with postal codes. Please note that although Montreal Lake appears in the tables in the same way as a split RM, proportions are calculated based on population rather than land area, and vary by five-year age and sex group.

The RM of Hudson Bay (residence code 394 10) is split between Pasquia and North-East health districts (please see map in Appendix 2), however, in district population tables, it is attributed solely to Pasquia. This is because RM residents in North-East are likely to live on reserves of either the Red Earth First Nation (721 82) or Shoal Lake of the Cree First Nation (722 82), which are already counted in North-East.
