

PMRA NEW REGISTRATION ACTIVITIES FY2007-2008

As of September 30, 2007

INTRODUCTION

The *PMRA New Registration Activities* report is a summary of registration decisions concerning new active ingredients, their associated end-use products, new uses for currently registered active ingredients, and emergency registrations made by the Pest Management Regulatory (PMRA) of Health Canada during the current fiscal year. This was initiated in 2006 to meet the goals of a more open and transparent pesticide regulatory system, and will be updated on a quarterly basis.

The *PMRA New Registration Activities* is published in a table format that summarizes each registration decision, including, the pesticide product's name and registration number under the *Pest Control Products Act*, registrant, pesticide type (e.g., insecticide), the specific site or host (where and on what the pesticide can be applied), and the date on which the certificate of registration was issued. The tables also identify both the major and minor crop uses registered and include a listing of emergency registrations with the organization that applied for it. Detailed label information can be obtained from the product label system found at http://pr-rp.pmra-arla.gc.ca/portal/page?_pageid=34,17551&_dad=portal&_schema=PORTAL.

Table 1: Overall Summary of Conventional Chemical, Reduced-risk (Chemical and Biopesticide) and Non-agricultural Registrations

1A: Summary of the Number of New Uses Registered

1B: Summary of the Number of New Active Ingredients Registered and Their Associated New Uses

Table 2: Listing of Conventional Chemical, Reduced-risk (Chemical and Biopesticide) and Non-agricultural Registrations (New Uses)

Table 3: Detailed Summary of Conventional Chemical, Reduced-risk (Chemical and Biopesticide) and Non-agricultural Registrations

Table 4: Listing of Emergency Registrations

Notes:

1. A "new use" is defined as a host/site not previously registered for the active ingredient listed.
2. The overall total number of new uses includes new non-crop uses which cannot otherwise be classified as major or minor crop uses (e.g., forestry, roadsides).
3. Table 2 row shading is indicative of new active ingredient registrations and associated products.
4. Reduced-risk new uses appear in BOLD.
5. The summary numbers of new uses excludes emergency registrations.
6. PMRA's fiscal year begins on April 1st of the current calendar year and ends March 31st of the following year.

TABLE 1: OVERALL SUMMARY OF CONVENTIONAL CHEMICAL, REDUCED-RISK (CHEMICAL & BIOPESTICIDE) AND NON-AGRICULTURAL REGISTRATIONS

Table 1A - Summary of the Number of New Uses Registered

		Major Crop Uses	Minor Crop Uses	Agricultural Uses	Non-Agricultural Uses
Total Food Uses	245	6	239	245	0
Total Non-Food Uses	188	0	143	141	47
OVERALL TOTAL	433	6	382	386	47

**PMRA NEW REGISTRATION ACTIVITIES FY2007-2008
As of September 30, 2007**

Table 1B - Summary of the Number of New Active Ingredients Registered and Their Associated New Uses

Total New Actives	11 (1)
New Uses	184
Conventional chemical	2 (1)
New Uses	14
Reduced-risk chemical	2 (0)
New Uses	53
Reduced-risk biopesticide	5 (0)
New Uses	105
Antimicrobial	2 (0)
New Uses	12

(#) = Number of new active ingredients registered through joint reviews or work sharing with other countries.
