GENERAL INFORMATION

About the 2006 CAIS Program Inventory Valuation

Prior to the 2006 program year, the Canadian Agricultural Income Stabilization (CAIS) program valued changes in inventory using the end of year price (P2). For crops marketed through the Canadian Wheat Board (CWB), the P2 was based on the CWB initial price in place at your fiscal year end, and therefore represented only a portion of the total expected value of grain.

Starting with the 2006 program year, changes in inventory will be valued using the start of year price (P1) and the end of year price (P2). For crops marketed through the CWB, the start of year price (P1) will be based on the Early Payment Option of 100% (EPO 100) in place at the start of your fiscal year. The end of year price (P2) will be based on the EPO 100 in place at the end of your fiscal year. The EPO 100 represents the highest estimated value that most producers can receive at year-end.

About the CWB Receivables Adjustment

Why is a CWB Receivables Adjustment required? The EPO 100 price more closely reflects the full value of CWB commodities at year end. However, many producers sell their CWB commodities using the initial price, which is less than the EPO 100 at year end. As a result, an additional receivables adjustment is required to ensure that your CWB commodities that were sold at the initial price, and your CWB commodities that are held in inventory, are valued at the same price.

When your 2006 CAIS application is processed, the Administration will calculate the CWB Receivables Adjustment (CWB-RA) using an estimate of the CWB commodities you sold into the active pool (August 1st to your fiscal year end). This default calculation will be done automatically by the Administration based on the information you report on your CAIS application. However, if you feel that the default calculation does not accurately reflect the value of your CWB sales, you may submit a CWB-RA worksheet.

About the CWB Receivables Adjustment Worksheet

The CWB-RA worksheet is an optional CAIS program feature that you may use instead of the default calculation. The worksheet allows you to calculate the CWB-RA using actual sales and the pricing option you used when you sold your CWB commodities into the active pool.

2006 Canadian Wheat Board (CWB) Receivables Adjustment Worksheet Guide

The CWB-RA worksheet is suggested for participants who:

- sell their CWB commodities using the Early Payment Option;
- sell their grain outside of the CWB pool by using Daily, Basis or Fixed Price Contracts;
- carry over inventory of CWB grain from one pool year to another pool year;
- suffer a disaster to stored grain; or
- determine that the default calculation does not accurately reflect the projected value for their operation.

If you submit the 2006 CWB-RA worksheet, your 2006 CAIS benefit will be recalculated using the information you provide. The Administration will not compare the two methods to determine which one is more beneficial. Any additional benefits resulting from the recalculation will be paid to you, and any overpayments resulting from the recalculation will be repayable by you.

If you choose to use the CWB-RA worksheet in place of the default calculation you must continue to use it annually. The Administration will not process any future applications using the default calculation. You must submit a completed CWB-RA worksheet Schedule 2 in each subsequent year of participation by the application deadline.

How the Receivables Adjustment is Calculated

CWB-RA - Default Calculation - The Administration automatically calculates the CWB-RA. The production and inventory information on your CAIS form is used to estimate the quantity of CWB commodities you sold into the active pool (August 1st to your fiscal year end). The estimated quantity of each CWB commodity sold is multiplied by the difference between the CWB initial price and the end of year price (P2) for that commodity. This produces a dollar value that is included as a receivables adjustment in the calculation of your program year margin. For the 2006 Program Year, the Administration will calculate both an opening and ending receivables adjustment.

CWB Receivables Adjustment Worksheet - The CWB-RA worksheet allows you to calculate the CWB-RA and submit the information to the Administration to replace the default calculation. On the worksheet, you report the actual quantity of CWB commodities that you sold into the active pool (August 1st to your fiscal year end). You then multiply the quantity sold by the adjustment value. This produces a dollar value for the receivables adjustment that the Administration will use in the calculation of your program year margin. For the 2006 Program Year, you must calculate both an opening and ending receivables adjustment.

The adjustment values have been calculated by the Administration and can be found in the CWB Adjustment Factors section. The adjustment value is the difference in price between the EPO 100 and the initial, EPO 80%, or EPO 90% price at your fiscal year end.

Who can use the CWB Receivables Adjustment Worksheet?

To be eligible to use the CWB-RA worksheet you must file to the Canada Revenue Agency (CRA) and CAIS on the cash basis.

If You Choose to use the CWB-RA Worksheet

Use your Cash Purchase Tickets and Producer Payment Options contracts or statements to complete the CWB-RA worksheet. Do not submit these documents with the worksheet. However, you must be able to provide this documentation if requested by the Administration.

Submit the CWB-RA worksheet to the Administration:

- **At the same time as your 2006 CAIS harmonized form:** If you are submitting the CWB-RA worksheet to the Administration at the same time as you are submitting your 2006 harmonized form to CRA, check the Other box on page 1 of the 2006 Statement A and specify CWB Receivables Adjustment worksheet.

OR

- **As an adjustment after your 2006 CAIS benefit has been calculated:** The CWB-RA Worksheet will be accepted as an adjustment if it is received by the Administration within 90 days of the issue date of either your original *2006 Calculation of Benefits Notice* or your *2006 CAIS CWB Receivables Adjustment Statement*, whichever is later.

Do not send the CWB-RA worksheet to the CRA. Send your completed CWB-RA worksheet to:

CAIS Administration
PO Box 3200 Station Main
Winnipeg, MB R3C 5R7
Fax (toll free): 1-877-949-4885

How to Complete the CWB Receivables Adjustment Worksheet

Operation Number:

- If you are involved in multiple farming operations, complete *Schedule 1- Opening Receivables Adjustment* and *Schedule 2 - Ending Receivables Adjustment* for each operation, using the same operation numbers that you provided on your 2006 CAIS harmonized form.

Participant information:

- Provide your name, and Personal Identification Number (PIN) on Schedule 1 and Schedule 2.

Fiscal Period:

- For *Schedule 1- Opening Receivables Adjustment*, provide the fiscal year start and end dates for your operation as reported to CRA for the **2005 fiscal year**.

Example 1:

If your 2005 fiscal year end was December 31, 2005, report all CWB commodities that you sold at the CWB Initial Price, the EPO 80% or the EPO 90% from August 1, 2005 to December 31, 2005.

Example 2:

If your 2005 fiscal year end was March 31, 2005, report all CWB commodities that you sold at the CWB Initial Price, the EPO 80% or the EPO 90% from August 1, 2004 to March 31, 2005.

- For *Schedule 2 - Ending Receivables Adjustment*, provide the fiscal year start and end dates for your operation as reported to CRA for the **2006 fiscal year**.

Example 1:

If your 2006 fiscal year end was December 31, 2006, report all CWB commodities that you sold at the CWB Initial Price, the EPO 80% or the EPO 90% from August 1, 2006 to December 31, 2006.

Example 2:

If your 2006 fiscal year end was March 31, 2006, report all CWB commodities that you sold at the CWB Initial Price, the EPO 80% or the EPO 90% from August 1, 2005 to March 31, 2006.

Wheat/Barley

- Complete the applicable sections for all CWB wheat and barley that you sold into the active pool at the initial price, EPO 80%, and EPO 90%. Do not report commodities that you sold using EPO 100, Daily, Basis or Fixed Price Contracts.

Nothing to Report Indicator

Check the "Nothing to Report" box if:

- you did not farm in the 2005 fiscal year (Schedule 1);
- you did not sell any CWB commodities into the active pool (August 1st to your fiscal year end); or
- you sold all your CWB commodities into the active pool at EPO 100, or outside the active pool using the Daily, Basis or Fixed Price Contract.

Column A - Code

- Enter the codes for the commodities sold using the code list in the CWB Adjustment Factors section. The commodity codes should match the commodity codes reported on your CAIS form.

Column B - Crop/Grade

- Enter the matching crop description of the inventory code in column A.

Column C - Price Method Used

- Enter 1 if the grain was sold at the CWB Initial Price.
- Enter 2 if the grain was sold at EPO 80%
- Enter 3 if the grain was sold at EPO 90%

Column D - Quantity Sold

- Provide the quantity sold in metric tonnes. Include the sales of all commodities that you sold at the CWB Initial Price, EPO 80%, or EPO 90% into the active pool.
- This includes commodities that you produced during the program year, and commodities that you produced in previous years but sold into the active pool.
- If the income from the sale was deferred until a later fiscal year, the quantity sold should still be reported on the worksheet if it was sold into the active pool at the CWB Initial Price, EPO 80%, or EPO 90%.

Column E - Adjustment Value \$

- Enter the Adjustment Value using the CWB Adjustment Factors. Report the value for each code for the month of your fiscal year end.

Example:

If your fiscal year end is December 31, on *Schedule 1 Opening Receivables Adjustment*, use the December 2005 Adjustment Value. For *Schedule 2 Ending Receivables Adjustment*, use the December 2006 Adjustment Values.

Column F - Receivables Adjustment Calculation

- Enter the Quantity Sold (column D) multiplied by the Adjustment Value (column E).

Receivables Adjustment Total

- Total Column F.
