By partnering with NSERC and university and college researchers, your company can stretch your research dollars, reduce your investment risk, gain access to talented future employees and explore breakthrough technologies.

In the mineral exploration industry, NSERC has been sponsoring high-potential R&D for almost three decades. NSERC Collaborative R&D Grants, Industrial Research Chairs and Industrial R&D Fellowships are just some of the programs designed to give industry a big boost.

NSERC invests more than \$860 million annually to support university and college research and training, as well as public-private R&D partnerships. Our partnership programs focus on R&D that has a high potential of creating significant yields for Canadian industry. More than 1,300 Canadian

companies have become NSERC partners, and the number is growing – for good reason. Canada’s universities and colleges are world leaders in many fields. They support cutting-edge researchers with innovative ideas that can help you solve problems, as well as create exciting new commercial opportunities. Our partnerships are the best vehicle for you to capitalize on the strengths of their expertise and facilities.
