# **Perspectives on Knowledge Translation IMHA IAB**

**Ian D Graham, PhD**

# Knowledge Translation: Our definition

***“the exchange, synthesis and ethically-sound application of knowledge - within a complex system of interactions among researchers and users - to accelerate the capture of the benefits of research for Canadians through improved health, more effective services and products, and a strengthened health care system”***

<http://www.cihr-irsc.gc.ca/e/29418.html> accessed Jan 24)

# Knowledge Translation: what is it really?

## Knowledge translation is about:

- Making users aware of knowledge and facilitating their use of it
- Closing the gap between what we know and what we do
- Moving knowledge into action

## Knowledge translation research is about:

- Studying the determinants of knowledge use and effective methods of promoting the uptake of knowledge

# Knowledge Translation: is about making a difference

(KT research and practice)

Research outputs

Research impacts

# What is involved in KT?

## Two broad categories of KT at CIHR

- **End of grant KT**
- **KT woven into the research process**  
(integrated/embedded KT)

**Broad spectrum of activities including:  
Diffusion/”researcher-push”**

**Conference presentations**

**Peer reviewed publications (Open access policy)**

**Non-peer reviewed publications**

**Website postings**

# End of grant KT

## Also includes:

**Dissemination activities that tailor the message and medium to a specific audience (researcher-push/ user-pull)**

- End of grant report to funders
- Summary/briefings to stakeholders
- Educational sessions with patients, practitioners and/or policy makers
- Engaging end users in developing & executing dissemination/implementation plan
- Commercialization efforts
- Tools creation
- Media engagement
- Use of knowledge brokers

# End of grant KT Efforts

## Related to:

- **Potential importance/impact of using the findings**
- **Strength of the evidence supporting the findings**
- **Target audience(s)**
- **What is known about effective strategies to reach the audience(s)**
- **What is practical and feasible to do**
- **Who else should be involved in KT efforts**

# What is integrated KT?

- **a way of doing research**
- **collaborative research, action-oriented, co-production of knowledge (engaging researchers and stakeholders (end-users))**
- **involves integrating stakeholders into the entire research process**

## **Study stakeholders can be:**

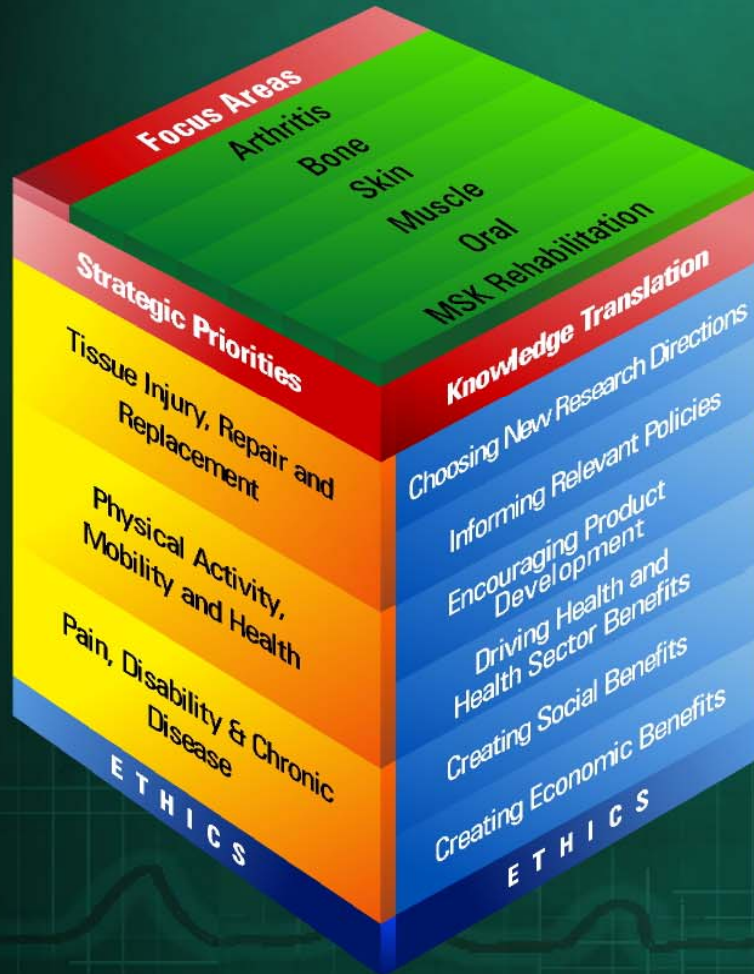

- **Investigators from different disciplines, teams, countries**
- **Policy makers, decision makers, research funders, the public, clinicians, the media**

# What is integrated KT? The role of stakeholders

## **They can be involved in:**

- Shaping the research questions
- Deciding on the methodology
- Helping with data collection and tools development
- Interpreting the study findings
- Crafting the message and disseminating the research results
- Moving the results into practice

# IMHA'S INITIATIVES IN KT

- KT RFA module – researchers can include a KT proposal in operating grants for up to \$25K in additional funds.
- KT database – IMHA is developing a KT “Just in time” database to start receiving reports from IMHA-funded researchers, as per RFA requirements. Research results and metrics will be classified into IMHA’s 6 KT impact areas.
- Knowledge Exchange Task Force (KETF) – comprises stakeholders committed to translating research knowledge to end users and to helping to identify research priorities.
- KT “train the trainer” fall institute for IMHA STIHRs – trainees from each STIHR will be trained in the broad and practical aspects of KT (all 4 pillars). They in turn will take modules to their respective STIHRs and institutions to train others.

# KT Related Funding and Award Opportunities

- Institute strategic initiatives (integrated KT)
- KT workshop and symposium opportunities
- Partnerships in Health Services Innovation (PHSI) (integrated and EGKT)
- Knowledge to Action strategic initiative (integrated and EGKT)\*
- Synthesis RFA (integrated)\*
- KT award – regional and national
- Fellowship priority announcements\*
  - Knowledge Translation
  - Health communications
- \* Dec 2006 launch

# Next steps for the KT Portfolio

- **Consolidate KT, Partnerships and Evaluation staff under the portfolio**
- **Understand SDs' and Institutes' issues and concerns about KT, Partnerships and Evaluation**
  - Meet with SDs, IRT, Attend some IAB meetings
- **Develop working relationships with institute-based KT, partnership, and evaluation experts**

# Next steps for the KT Portfolio

- **Respond to the KT issues raised by the IRP**
- **Update and streamline CIHR's KT definition in keeping with current KT theory and practice**
- **Develop a process for updating CIHR's KT strategic plan**

# Next steps for the KT Branch

- **Branch name change**
  - (?Knowledge Synthesis and Exchange Branch)
- **Pan-CIHR KT Casebooks (launch coming soon)**
  - opportunity to showcase the success stories of all the Institutes
  - opportunity to further our understanding of KT by seeing successful as well as less successful cases

# Next Steps for the KT Branch

- **Develop expectations for KT activities for applicants and KT review criteria for peer-reviewers**
- **Review and revive grants and awards investment in existing and new KT research, training, and synthesis activity**

CIHR IRSC

**Merci- Thank you**
