**PRESENT**

FUTURE

Canadian Institutes of Health Research / Instituts de recherche en santé du Canada

# The FUTURE — It's yours to

# change

What's your dream?

- Finding a cure for cancer?
- Helping paralyzed people walk again?
- Keeping your family healthy for a long, long time?
- Still working on it?

Health research can unlock your dreams.

Find out more about your future in health research. It's more than you think.

History, biology, economics, chemistry, engineering, physics, the Internet — they're all part of today's health research.

Synapse — CIHR Youth Connection can help you find your niche. Synapse is a meeting place, a junction where you can connect with health researchers, people who have struggled with the very same questions you face and have found their path.
