

Holiday Fire Safety Crossword Puzzle

Have fun
while you
learn about
fire safety!

Across

- Before you hang these, check them for frayed wires, bare spots, gaps in the insulation, broken or cracked sockets, or wear. These faults can allow electricity to escape.
- Never use this on a tree or near other decorations. This type of fire increases significantly during the holiday season.
- Holiday decorations should be this because they can be a fire hazard.
- All wood burning fireplaces should have a _____ to keep embers out of the room.
- Artificial trees should be?
- Be sure not to place this too close to the lights on your tree. Lights give off heat and can start nearby things on fire.
- This will dry out if you place it too close to a heat source.
- This needs to be kept at least 1 metre away from anything that can burn.
- Do not overload this electrical source.

Down

- When cooking during the holidays be sure to never leave this unattended.
- The number one cause of fires during the holiday season is?
- Do not use this to burn wrapping materials.
- During the December holidays do fires increase or decrease?
- Do not place this under rugs or furniture. It can trap the heat and cause a fire.
