

Energy Efficiency Evaluation Report

House file number: 9900D00001

Household, John,
123 Main St.,
Ottawa, Ontario,
K1K 1K1

- Your house currently rates 64.
- If you implement all of the recommendations, you could reduce your space heating energy consumption by up to 28% and increase your home's energy efficiency rating to 74.
- The average energy efficiency rating for a house of this age in Canada is 70.
- By achieving 74, your home would rate in the top 30% of this group of houses.

Home Energy Action Checklist

Recommendations

These activities qualify for an incentive (up to a maximum total incentive value of \$5000):

Replace your gas furnace with an ENERGY STAR qualified furnace that has a 92.0% annual fuel utilization efficiency (AFUE) or better, with a DC variable-speed motor.

1

\$XX.xx

Replace your wood-burning appliance with a model that meets either CSA-B415.1-M92 (Performance Testing of Solid-Fuel-Burning Heating Appliances) or the U.S Environmental Protection Agency (EPA) wood-burning appliance standards (40 CFR Part 60).
